Journals of the AIAA

1969 Subject and Author Indexes

AIAA Journal
Journal of Spacecraft and Rockets
Journal of Aircraft
Journal of Hydronautics

A Publication of the American Institute of Aeronautics and Astronautics

1969

TECHNICAL EDITORS

AIAA JOURNAL

EDITOR-IN-CHIEF

GEORGE W. SUTTON
Avco Everett Research Laboratory

ASSOCIATE EDITORS

MAURICE L. ANTHONY
The Martin Marietta Company
RICHARD H. BATTIN
MIT Instrumentation Laboratory
JOHN W. HUTCHINSON
Harvard University
CHARLES H. KRUGER
Stanford University
R. KENNETH LOBB
U. S. Naval Ordnance Laboratory
PAUL S. LYKOUDIS
Purdue University
GEORGE H. MARKSTEIN
Cornell Aeronautical Laboratory Inc.
JEAN MAYERS
Stanford University
HAROLD MIRELS
Aerospace Corporation
DANIEL B. OLFE
University of California at San Diego
M. JONATHAN TURNER
The Boeing Company
ROBERTO VAGLIO-LAURIN
New York University

JOURNAL OF SPACECRAFT AND ROCKETS

EDITOR-IN-CHIEF

GORDON L. DUGGER
Applied Physics Laboratory, Johns Hopkins University

ASSOCIATE EDITORS

DAVID H. GARBER
Consultant
JOHN C. HOUBOLT
Aeronautical Research Associates of Princeton
WILLIAM R. MICKELSEN
Colorado State University
BERNARD P. MILLER
RCA Astro Electronics Division
JOHN E. MILLER
Intermetrics, Inc.
YUSUF A. YOLER
The Boeing Company

JOURNAL OF AIRCRAFT

EDITOR-IN-CHIEF

CARL F. SCHMIDT
Systems Analysis and Research Corporation

ASSOCIATE EDITORS

HERBERT L. GODA
Institute for Defense Analyses
WILLIAM GREATHOUSE
Grumman Aerospace Corporation
HAROLD D. HOEKSTRA
Federal Aviation Agency

JOURNAL OF HYDRONAUTICS

EDITOR-IN-CHIEF

JOHN P. BRESLIN
Stevens Institute of Technology

ASSOCIATE EDITORS

WINFIELD H. ARATA JR.
Northrop Corporation
LEONARD GREINER
Chemical Energy Specialist

AIAA

AMERICAN INSTITUTE OF AERONAUTICS AND ASTRONAUTICS
1290 Avenue of the Americas, New York, N. Y. 10019
Area Code 212 581-4300

1969 OFFICERS*

President
RONALD SMELT (1969)

Treasurer
EDWARD H. SEYMOUR (1970)

Vice-Presidents
Publication: JERRY GREY (1970)
Technical Activities: JOHN C. HOUBOLT (1970)
Section Affairs: FREDERICK L. BAGBY (1970)

1969 STAFF OFFICERS

Executive Secretary: JAMES J. HARFORD
Secretary: ROBERT R. DEXTER
Controller: JOSEPH J. MAITAN

1969 BOARD OF DIRECTORS*

Directors—Technical:
HOLT ASHLEY (1971)
WILLIAM H. AVERY (1970)
ROBERT H. CANNON JR. (1970)
EDGAR M. CORTRIGHT (1971)
DANIEL J. FINK (1969)
GEORGE M. LOW (1969)

Directors-at-Large:
OSCAR BAKKE (1971)
WILLIAM BOLLAY (1969)
CHARLES W. HARPER (1971)
R. PAUL HARRINGTON (1969)
RICHARD HUTTON (1970)
MARVIN WHITLOCK (1970)

Directors—Regional:
B. G. BROMBERG (1970)
ALDEN B. CARDER (1969)
WILLIAM DOUGLASS (1971)
CLYDE R. MURTAUGH (1969)
ALAN Y. POPE (1970)
PETER ROSE (1971)

Director-Past President: FLOYD L. THOMPSON (1969)

* Terms expire in year indicated.

1969 EDITORIAL STAFF

DIRECTOR OF SCIENTIFIC PUBLICATIONS
RUTH F. BRYANS

MANAGING EDITOR, SCIENTIFIC PUBLICATIONS
ANNE HUTH

ASSISTANT TO THE MANAGING EDITOR, SCIENTIFIC PUBLICATIONS
CAROL POPPENDIECK

JOURNAL COPY EDITORS
ELENA CARLES
JANG JU LEE
REBECCA McSWAIN

Published by the American Institute of Aeronautics and Astronautics Inc. at 20th & Northampton Sts., Easton, Pa., 18042, U.S.A. Editorial Offices: 1290 Avenue of the Americas, New York, N. Y. 10019. Cable address: INSAERAST NEWYORK. West Coast Office: 9841 Airport Blvd., Los Angeles, Calif. 90045. European Office: 205 Regent St., London W. 1, England. Price: Free for each journal subscription; additional copies, available from AIAA, 1290 Avenue of the Americas, New York, N. Y. 10019, $5.00 per copy.

April	65–104	October	153–200

SA, TN, EN, and TC indicate Survey Article, Technical Note, Engineering Note, and Technical Comment, respectively. The initials of the Journal in which the paper was published are in parentheses at the end of each entry. In the Subject Index, papers are listed chronologically with Survey papers first, followed by regular articles, Notes, and Comments.

VTOL Cabin Habitability and Design ... 6

LAUNCH VEHICLE AND MISSILE TECHNOLOGY

Launch Vehicle Systems (Including Ground Support) ... 6
Missile Systems ... 6
Sounding Rocket Systems ... 6
Launch Vehicle and Missile Trajectories ... 6
Launch Vehicle and Missile Mission Studies and Economics ... 6
Rocket Vehicle Aerodynamics ... 6
Rocket Vehicle Aerodynamic Heating ... 6
Rocket Vehicle Gust Loading and Wind Shear ... 6
Fuel and Propellant Storage, Transfer and Control Systems ... 6
Launch Vehicle or Missile Propulsion System Integration ... 6
Launch Vehicle and Missile Configurational Design ... 7
Launch Vehicle and Missile Structural Design (Including Loads) ... 7
Launch Vehicle and Missile Fabrication ... 7
Launch Vehicle and Missile Subsystem Design ... 7
Uncontrolled Rocket and Missile Dynamics ... 7
Launch Vehicle and Controlled Missile Dynamics and Control ... 7
Launch Vehicle and Missile Guidance Systems (Including Command and Information Systems) ... 7
Tracking Systems ... 7
Launch Vehicle or Missile System and Component Ground Testing ... 7
Launch Vehicle or Missile Simulation ... 7
Launch Vehicle or Missile Flight Testing ... 7

SPACECRAFT TECHNOLOGY

Unmanned Lunar and Interplanetary Systems ... 7
Unmanned Earth Satellite Systems ... 7
Manned Lunar and Interplanetary Systems ... 8
Manned Space Station Systems ... 8
Entry Vehicles and Landers ... 8
Extraterrestrial Surface Transportation ... 8
Lunar and Planetary Trajectories ... 8
Earth-Orbital Trajectories ... 8
Spacecraft Mission Studies and Economics ... 9
Entry Vehicle Mission Studies and Flight Mechanics ... 9
Post-Entry Deceleration Systems and Flight Mechanics ... 9
Spacecraft Propulsion Systems Integration ... 9
Spacecraft Electric Power Systems ... 9
Spacecraft Temperature Control Systems ... 10
Spacecraft Configurational and Structural Design (Including Loads) ... 10
Meteoroid Protection Systems ... 10
Radiation Protection Systems ... 10
Spacecraft Attitude Dynamics and Control ... 10
Entry Vehicle Dynamics and Control ... 11
Spacecraft Communication Systems ... 11
Spacecraft Navigation, Guidance, and Flight-Path Control Systems ... 11
Spacecraft and Component Ground Testing and Simulation ... 11
Spacecraft Flight Testing ... 11
Re-Entry Vehicle Testing ... 11
Spacecraft Habitability and Life Support Systems ... 11
Space Medicine (Including Weightlessness, Radiation Effects, Psychology, etc.) ... 11
Spacecraft Sterilization ... 11
Extra-Vehicular Activity ... 11
Crew Training ... 11
Data Sensing and Presentation or Transmission Systems ... 12
Spacecraft Tracking ... 12

MARINE TECHNOLOGY

Surface Vessel Systems ... 12
Submerged Vessel Systems ... 12
Mining Systems ... 12
Vessel and Control Surface Hydrodynamics ... 12
Propulsion System Hydrodynamics ... 12
Undersea Acoustics ... 12
Marine Propulsion System Integration ... 12
Marine Electric Power Systems ... 12
Marine Vessel Design (Including Loads) ... 12
Corrosion/Erosion of Materials in Sea Water ... 12
Marine Vessel Vibration ... 12
Marine Vessel Trajectories, Stability, and Control ... 12
Undersea Navigation and Guidance ... 12
Undersea Communication ... 12
Marine Systems Testing ... 12
Undersea Extra-Vehicular Activity ... 12
Undersea Habitability and Life Support Systems ... 12
Undersea Medicine (Including Psychology, Pressure Effects, etc.) ... 12
Physical and Biological Oceanography ... 12

PROPULSION

Properties of Fuels and Propellants ... 12
Combustion in Gases ... 12
Combustion in Heterogeneous Media ... 13
Combustion Stability, Ignition, and Detonation ... 13
Subsonic and Supersonic Airbreathing Propulsion ... 13
Hypersonic Airbreathing Propulsion ... 13
VTOL Propulsion ... 13
Solid and Hybrid Rocket Engines ... 13
Liquid Rocket Engines ... 14
Nuclear Propulsion ... 14
Electric and Advanced Space Propulsion ... 14
Marine Propulsion ... 14
Airbreathing Engine Testing ... 14
Rocket Engine Testing ... 14

THERMOPHYSICS AND THERMOCHEMISTRY

Atomic, Molecular, and Plasma Properties ... 15
Liquid and Solid Thermophysical Properties ... 15
Material Ablation ... 15
Heat Conduction ... 15
Radiation and Radiative Heat Transfer ... 15
Thermal Surface Properties ... 16
Thermochemistry and Chemical Kinetics ... 16
Thermal Modeling and Experimental Thermal Simulation ... 16

FLUID DYNAMICS

Boundary Layers and Convective Heat Transfer ... 16
Boundary Layers and Convective Heat Transfer—Laminary. 17
Boundary Layers and Convective Heat Transfer—Turbulent 17
Boundary-Layer Stability and Transition ... 17
Subsonic and Transonic Flow ... 17
Supersonic and Hypersonic Flow ... 18
Nozzle and Channel Flow ... 18
Rarefied Flows ... 19
Multiphase Flows ... 19
Reactive Flows ... 19
Shock Waves and Detonations ... 20
Jets, Wakes, and Viscid-Inviscid Flow Interactions ... 20
Radiatively Coupled Flows and Heat Transfer ... 21
Viscous Nonboundary-Layer Flows ... 21
Plasma Dynamics and MHD ... 21
Wave Motion and Sloshing ... 21
Hydrodynamics ... 22
Nonsteady Aerodynamics ... 22

STRUCTURAL MECHANICS AND MATERIALS

Structural Static Analysis ... 22
Structural Stability Analysis ... 23
Structural Dynamic Analysis ... 23
Aeroelasticity and Hydroelasticity ... 24
Hypervelocity Impact ... 24
Properties of Materials ... 24
Structural Composite Materials (Including Coatings) ... 24
Optimal Structural Design ... 25
Thermal Stresses ... 25

SUBJECTS

CONVENTIONAL AIRCRAFT TECHNOLOGY

Air Transportation Systems

Analyses of passenger and baggage flows in airport terminal buildings. Robert Horonjeff (JA) 446
Demand for intercity passenger transportation by VTOL aircraft. Norman J. Asher (JA) 452
A comparison of access systems to present world airports. Secor D. Browne (JA, EN) 170

Air Navigation, Communication, and Traffic Control Systems

Design for the future in terminal air traffic control. M. A. Warskow, E. N. Hooton, and H. C. Burns (JA) 360
Development of the waveoff decision device. Robert B. Johnstone (JA) 367
F-111D computer complex. D. H. Daggett and R. Q. Lee (JA) 432
Effect of deflections of the vertical on the performance of a terrestrial inertial navigation system. S. A. Levine and A. Gelb (JSR) 978
Optimum estimation and coordinate conversion for radio navigation. W. D. Bard and T. E. Perfitt (AIAAJ) 2318
Range difference navigation. A. Jones (JSR, EN) 198

General Aviation Systems (Including Ground Support)

Aircraft and Air Transportation Economics

Performance and economic design aspects of the 747 family of airplanes. M. Lynn Olason (JA) 520
Minimum fuel lateral turns at constant altitude. Arthur E. Bryson Jr. and Milind M. Lele (AIAA J, TN) 559

Military Aircraft Missions

High-speed store separation—correlation between wind-tunnel and flight-test data. Robert L. Black (JA) 42
A manned air-to-air combat simulator. F. W. Prilliman, W. W. Huff Jr., and J. T. Hooks Jr. (JA) 353
Mathematical model for the ascent and descent of a high-altitude tethered balloon. George R. Doyle Jr. (JA) 457
Parawing precision aerial delivery system. J. Everette Forehand and Herbert Q. Bair (JA) 463
Experimental research on parachute deployment load control by use of line ties. William B. Pepper and Dennis C. Cronin (JA, EN) 79
A midair-deployed buoyancy suspension system for the Briteye battlefield illumination flare. Russell A. Pohl (JA, EN) 378
Optimum climb trajectories at constant lift coefficient. R. H. Andrews (JA, EN) 475

Aircraft Flight Operations

A new approach to visual simulation. William C. Ebeling (JA) 59
Capabilities of in-flight thrust reversing. R. L. McCormick, W. W. Koepcke, and J. T. Gallagher (JA) 263
A manned air-to-air combat simulator. F. W. Prilliman, W. W. Huff Jr., and J. T. Hooks Jr. (JA) 353
Development of the waveoff decision device. Robert B. Johnstone (JA) 367
A comparison between transonic wind-tunnel and full-scale store separation characteristics. J. F. Reed and W. H. Curry (JA, EN) 281
Range requirements for airborne turbulence detectors. Chester D. Mayerson (JA, EN) 376

Aircraft Performance

Airplane and Component Aerodynamics

Survey of dynamic analysis methods for flight control design. Alfred C. Robinson (JA, SA) 81
Effect of a wing on its tip vortex. Terence L. Grow (JA) 37
Aerodynamic features of the flap-balanced swivel airfoil. J. C. Gibbings (JH) 44
A method of analysis for propellers at extreme angles of attack. Gerald F. Hall (JA) 52
Leading-edge vortices and shock-detachment flow over delta wings. S. C. Ghorai (JA) 228
Airplane flying qualities specification revision. C. R. Chalk and R. K. Wilson (JA) 232
Effects of wingtip-mounted propellers on wing lift and induced drag. Melvin H. Snyder Jr. and Glen W. Zumwalt (JA) 392
Status of research on parawing lifting decelerators. William C. Sleeman Jr. and Thomas G. Gainer (JA) 405
Mathematical model for the ascent and descent of a high-altitude tethered balloon. George R. Doyle Jr. (JA) 457
Parawing precision aerial delivery system. J. Everette Forehand and Herbert Q. Bair (JA) 463
Energy-state approximation in performance optimization of supersonic aircraft. Arthur E. Bryson Jr., Mukund N. Desai, and William C. Hoffman (JA) 481
Lifting-surface theory for V/STOL aircraft in transition and cruise. I E. S. Levinsky, H. U. Thommen, P. M. Yager, and C. H. Holland (JA) 488
Performance and economic design aspects of the 747 family of airplanes. M. Lynn Olason (JA) 520
Effects of vortex separation on the lift distribution on bodies of elliptic cross section. Leon H. Schindel (JA) 537
Propagation of error in the calculation of airplane thrust and drag. Everett W. Dunlap (JA) 543
On the singularity method of subsonic lifting-surface theory. Siegfried Wagner (JA) 549
Peripheral jets: Effects of exit geometry. Andrew Lowenstein, Paul Berry, and Robert E. Duffy (JA) 558
Effects of lengthwise lift distribution on sonic boom of SST configurations. Antonio Ferri and Ahmed Ismail (AIAA J) 1538
Lower bounds for sonic booms in the midfield. A. R. George (AIAA J) 1542
Development of aircraft vortex wakes in turbulent flow. Alan T. Roper (JA, EN) 65
Thin airfoil in nonuniform parallel streams. L. Ting and C. H. Liu (JA, EN) 173
Laminar-sublayer thickness in compressible turbulent boundary layers. K. Sheshagiri Hebbar and P. A. Paranjpe (JA, EN) 470
Airfoil pressure distributions in low-speed stall. F. X. Hurley (JA, EN) 474
Estimation of aerodynamic center and span load distributions of swept wings. D. P. Hickey (JA, EN) 571
Change in pitching-moment coefficient due to ground effect. Gottfried Sachs (JA, EN) 573
Light antiaircraft projectile ballistics. John W. Milenski Jr. (AIAA J, TN) 2144
Lift effectiveness of slender wings with streamwise root gaps and fences. M. Judd (AIAA J, TN) 2179

Aerodynamic and Powerplant Noise (Including Sonic Boom)

Sonic boom theory. R. Seebass (JA, SA) 177
Concept and characteristics of the concorde exhaust noise suppressor. G. Richter and R. Hoch (JA) 98
Development of engineering practices in jet and compressor noise. J. B. Large, E. Grande, and A. O. Andersson (JA) 189
Reduction of sonic boom by azimuthal redistribution of overpressure. A. R. George (AIAA J) 291
Effects of an isobaric, inhomogeneous atmosphere on sonic boom. W. F. Merzkirch (JA, EN) 477
Effects of lengthwise lift distribution on sonic boom of SST configurations. Antonio Ferri and Ahmed Ismail (AIAA J) 1538
Lower bounds for sonic booms in the midfield. A. R. George (AIAA J) 1542

Aircraft Deceleration Systems

Opening time of parachutes under infinite-mass conditions. H. G. Heinrich (JA) 268
Status of research on parawing lifting decelerators. William C. Sleeman Jr. and Thomas G. Gainer (JA) 405
Experimental research on parachute deployment load control by use of line ties. William B. Pepper and Dennis C. Cronin (JA, EN) 79
Initial phase of parachute inflation. Kenneth E. French (JA, EN) 376
A midair-deployed buoyancy suspension system for the Briteye battlefield illumination flare. Russell A. Pohl (JA, EN) 378

Aircraft Gust Loading and Wind Shear

A comparison of C-141A flight test measured and theoretical vertical gust responses. Charles T. Ingram and Frederick D. Eichenbaum (JA) 532
Range requirements for airborne turbulence detectors. Chester D. Mayerson (JA, EN) 376
Gust design envelope of interacting loads. Kenneth L. Roger (JA, EN) 380
Distribution of lengths of high-altitude clear air turbulent regions. Edward V. Ashburn (JA, EN) 381
Comment on "Strength margins for combined random stresses." R. K. Cooper (JA, TC) 286

Aircraft Powerplant Design and Installation

Development of engineering practices in jet and compressor noise. J. B. Large, E. Grande, and A. O. Andersson (JA) 189
Application of statistical parameters in defining inlet airflow dynamics. Leonard C. Kostin and Sidney D. Millstone (JA) 196
NASA programs for development of high-temperature alloys for advanced engines. John C. Freche and Robert W. Hall (JA) 424

Aircraft Fuels and Fuel Systems

Aircraft Propulsion System Noise

Aircraft Rocket Applications

Aircraft Configuration Design

A class of three-dimensional, optimum hypersonic wings. J. D. Cole and Tse-F'ou Zien (AIAA J) 264
Reduction of sonic boom by azimuthal redistribution of overpressure. A. R. George (AIAA J) 291
Effects of wingtip-mounted propellers on wing lift and induced drag. Melvin H. Snyder Jr. and Glen W. Zumwalt (JA) 392

Aircraft Subsystem Design

Survey of dynamic analysis methods for flight control design. Alfred C. Robinson (JA, SA) 81
F-111D computer complex. D. H. Daggett and R. Q. Lee (JA) 432
False signal rejection in optical-infrared collision warning systems. John A. Decker Jr., Melvyn G. Morris, and Martin O. Harwit (JA, EN) 169

Aircraft Structural Design (Including Loads)

Development of the shim-joint concept for composite structural members. J. P. Wong, B. W. Cole, and A. L. Courtney (JA) 18
Minimum weight design of aircraft landing-gear reinforcement rings. R. A. Ridha (JA) 259
Titanium diffusion-bonded honeycomb—optimum structure for material, joining medium, and configuration. Aaron L. Kolom (JA) 410
Damage tolerance and logistic transport design. W. T. Shuler and D. S. Morcock (JA) 416
A method for predicting longitudinal stability derivatives of rigid and elastic airplanes. J. Roskam and A. Dusto (JA) 525
Maximum stress of a stiffened circular cylinder under bending. Tsai-Chen Soong (JA, EN) 68
Ordinary coherence functions and mechanical systems. Richard L. Barnoski (JA, EN) 372
Estimation of aerodynamic center and span load distributions of swept wings. D. P. Hickey (JA, EN) 571
Comment on "Strength margins for combined random stresses." R. K. Cooper (JA, TC) 286

Aircraft Structural Materials

Titanium diffusion-bonded honeycomb—optimum structure for material, joining medium, and configuration. Aaron L. Kolom (JA) 410

Aircraft Vibration

A strip method for prediction of damping in subsonic wind tunnel and flight flutter tests. William P. Rodden and Bernhard Stahl (JA) 9

Aircraft Fabrication

Aircraft Handling, Stability, and Control

Survey of dynamic analysis methods for flight control design. Alfred C. Robinson (JA, SA) 81
Computerized design of optimal direct lift controller. Robert C. Lorenzetti, Gary L. Nelsen, and Roger W. Johnson (JA) 137
Airplane flying qualities specification revision. C. R. Chalk and R. K. Wilson (JA) 232
Direct lift control for approach and landing. Robert C. Lorenzetti, Gary L. Nelsen, and Roger W. Johnson (JA) 240
Capabilities of in-flight thrust reversing. R. L. McCormick, W. W. Koepcke, and J. T. Gallagher (JA) 263
Application of differential synthesis to design of multiaxis stability augmentation systems. Raymond C. Montgomery and Howard G. Hatch Jr. (JA) 336
Flight test evaluation of an advanced stability augmentation system for B-52 aircraft. John B. Dempster and James I. Arnold (JA) 343
Pilot's response to stability augmentation system failures and implications for design. Walter A. Johnson and David H. Weir (JA) 504
Flying qualities: an integral part of a stability augmentation system. Walter J. Rohling (JA) 510
Comments on "Navy variable-stability studies of longitudinal handling qualities." Lawrence G. Malcom (JA, TC) 285
——Reply by author to L. G. Malcom. John A. Eney (JA, TC) 285

Aircraft Landing Dynamics

Damping of high-frequency brake vibrations in aircraft landing gear. A. K. Abu-Akeel (JA) 24
Tire parameters for landing-gear shimmy studies. R. L. Collins and R. J. Black (JA) 252
Minimum weight design of aircraft landing-gear reinforcement rings. R. A. Ridha (JA) 259

Aircraft Testing

High-speed store separation—correlation between wind-tunnel and flight-test data. Robert L. Black (JA) 42
Experimental research on parachute deployment load control by use of line ties. William B. Pepper and Dennis C. Cronin (JA, EN) 79

Aircraft and Component Wind Tunnel Testing

Jet-pump actuation of variable-density subsonic wind tunnels. J. C. Gibbings (JA) 30
High-speed store separation—correlation between wind-tunnel and flight-test data. Robert L. Black (JA) 42
Wind-tunnel wall interference studies at high subsonic speeds. J. R. Ongarato (JA) 144
Wall interference effects in wind-tunnel testing of STOL aircraft. Robert G. Joppa (JA) 209
Design and functional characteristics of a model pressure-measuring system. D. W. Young (JA) 215
Development of a nonrecirculating wind-tunnel configuration insensitive to external winds. C. R. Leef and R. G. Hendry (JA) 221
A one-component, magnetic support-and-balance system. Kenneth R. Sivier (JA) 398
Performance of a ceramic-lined 6-in.-diam arc driver. J. W. Williard (AIAA J, TN) 339
Experimental identification of shock tunnel flow regimes. Clarence J. Harris (AIAA J, TN) 365
A combined temperature and pressure probe for compressible flow. H. U. Meier (AIAA J, TN) 529
Thermocouple total-temperature, probe-radiation errors. F. K. Hube and F. Shahrokhi (AIAA J, TN) 749
Multiple-function probe for airflow research. George E. Glawe, Lloyd N. Krause, and Thomas J. Dudzinski (AIAA J, TN) 776
Determination of the position of a shock wave from Pitot tube experiments. W. J. Bannink and C. Nebbeling (AIAA J, TN) 796
A high-density, high-velocity equilibrium freestream shock-tunnel concept. W. R. Warren and C. H. Marston (AIAA J, TN) 964

Aircraft Crew Training

A new approach to visual simulation. William C. Ebeling (JA) 59

Aircraft Cabin Environment and Life Support Systems

VTOL TECHNOLOGY

VTOL Missions and Transportation Systems

AH-56A onboard fueling capability. F. J. Stockemer (JA) 164
VTOL—1968. AIAA VTOL Systems committee (JA) 289
Demand for intercity passenger transportation by VTOL aircraft. Norman J. Asher (JA) 452

VTOL Flight Operations

Conjugate gradient methods with an application to V/STOL flight-path optimization. R. K. Mehra and A. E. Bryson Jr. (JA) 123
Aerodynamic effects of lift-jet and lift-fan inlets in transition flight. William E. Grahame (JA) 150
Experimental investigations of ground-jet suppression fences for VTOL aircraft prepared sites. K. H. Rogers, R. Lavi, and G. R. Hall (JA) 245

VTOL Ground Support Systems

Rotary Wing and VTOL Aerodynamics

Unsteady aerodynamic and stall effects on helicopter rotor blade airfoil sections. Jaan Liiva (JA) 46
Studies of exhaust-gas recirculation for VTOL aircraft. E. D. G. Kemp (JA) 102
The "fountain effect" and VTOL exhaust ingestion. D. B. Adarkar and G. R. Hall (JA) 109
Reingestion characteristics and inlet flow distortion of V/STOL lift-engine fighter configurations. Jerry V. Kirk and Jerry P. Barrack (JA) 116
Aerodynamic effects of lift-jet and lift-fan inlets in transition flight. William E. Grahame (JA) 150

Experimental aerodynamics of a rotor entry vehicle. Alan D. Levin and Ronald C. Smith (JA) 330
Airload, blade response, and hub force measurements on the NH-3A compound helicopter. Ronald R. Fenaughty and Edward A. Beno (JA) 386
Lifting-surface theory for V/STOL aircraft in transition and cruise. I E. S. Levinsky, H. U. Thommen, P. M. Yager, and C. H. Holland (JA) 488
Flapping response of lifting rotor blades to atmospheric turbulence. Gopal H. Gaonkar and Kurt H. Hohenemser (JA) 496
A correlation of vortex noise data from helicopter main rotors. Sheila E. Widnall (JA, EN) 279
Correlation of the vortex lattice method on rotor/wing configurations. William P. Rodden and David T. Liu (JA, EN) 375

VTOL Landing Dynamics

Ground (or Water-Surface) Effect Machines

Peripheral jets: Effects of exit geometry. Andrew Lowenstein, Paul Berry, and Robert E. Duffy (JA) 558
Dynamics of a multiple-skirt air cushion vehicle. L. L. Bickford and G. K. Olson (JA, EN) 564

VTOL Aircraft Design

Reingestion characteristics and inlet flow distortion of V/STOL lift-engine fighter configurations. Jerry V. Kirk and Jerry P. Barrack (JA) 116
VTOL—1968. AIAA VTOL Systems Committee. (JA) 289

VTOL Structural Design (Including Loads)

VTOL—1968. AIAA VTOL Systems Committee. (JA) 289
Airload, blade response, and hub force measurements on the NH-3A compound helicopter. Ronald R. Fenaughty and Edward A. Beno (JA) 386
Fail-safe criteria and analysis of VTOL dynamic component structures. M. J. Rich (JA, EN) 574

VTOL Vibration

VTOL Handling, Stability, and Control

Design of helicopter stabilization systems using optimal control theory. Richard D. Murphy and Kumpati S. Narendra (JA) 129
VTOL—1968. AIAA VTOL Systems Committee. (JA) 289
VTOL aircraft dynamics. Robert L. Swaim (JA, TC) 176
——Reply by author to R. L. Swaim. Ralph H. Smith (JA, TC) 176

VTOL Testing

VTOL Cabin Habitability and Design

LAUNCH VEHICLE AND MISSILE TECHNOLOGY

Launch Vehicle Systems (Including Ground Support)

Multiple-based air- and ground-launch for inspection, rescue, and other space missions. Robert J. Salkeld (JSR) 1448
Integrated space vehicle ground support equipment. F. R. Radcliffe and J. M. Ray (JSR, EN) 942

Missile Systems

Comments on "Pulse sustaining of low-altitude cruise missiles." A. J. Cruttenden (JSR, TC) 1212
——Reply by author to A. J. Cruttenden. M. H. Ullock (JSR, TC) 1213

Sounding Rocket Systems

Design, development, and testing of a series of air-launched sounding rockets. W. J. Bolster and G. C. Googins (JSR) 460
Measurements of the pressure and thermal environments in an Aerobee 150 sounding rocket. R. C. Anderson and R. M. Fike (JSR, EN) 214
Development of recovery systems for high-altitude sounding rockets. Donald W. Johnson (JSR, EN) 489
Graphically determining sounding rocket vehicle attitudes. Charles F. Miller Jr. (JSR, EN) 1180

Launch Vehicle and Missile Trajectories

Rocket trajectory optimization by a second-order numerical technique. H. J. Kelley, B. R. Uzzell, and S. S. McKay II (AIAA J) 879
Re-entry vehicle launch restrictions considering damage to optical instruments by solar radiation. John C. Flemming and Hwachii Lien (JSR, EN) 70
Relativistic rocket flight with constant acceleration. Gerald M. Anderson and Donald T. Greenwood (AIAA J, TN) 343
Automated mission analysis—trajectory determination procedures. Robert S. Patrick and Donald D. Van Winkle (JSR, EN) 619
Re-entry dispersions due to atmospheric uncertainties. Gerald R. Weiss (JSR, EN) 1193

Launch Vehicle and Missile Mission Studies and Economics

Launch vehicles for future automated space missions. J. E. McGolrick and B. W. Davis (JSR) 129
Common nuclear module for planetary explorations. J. F. Dollard (JSR) 136
The nuclear rocket program—its status and plans. L. C. Corrington (JSR) 465
Nonintegral burn of nuclear rockets—an approach to low-cost space exploration. S. Gronich, R. J. Holl, and K. P. Johnson (JSR) 723
Major factors influencing the development of a nuclear flight stage. J. W. Sandford and W. L. Dowdy (JSR) 778
An advanced cryogenic core concept for a flexible and economical delivery system. Edward W. Gomersall and Robert E. Slye (JSR) 785
Launch constraints for a synchronous communications satellite mission. J. S. Tyler Jr. and E. W. Onstead (JSR) 890
Multiple-based air- and ground-launch for inspection, rescue, and other space missions. Robert J. Salkeld (JSR) 1448
Automated mission analysis—trajectory determination procedures. Robert S. Patrick and Donald D. Van Winkle (JSR, EN) 619
Comments on "Pulse sustaining of low-altitude cruise missiles." A. J. Cruttenden (JSR, TC) 1212
——Reply by author to A. J. Cruttenden. M. H. Ullock (JSR, TC) 1213

Rocket Vehicle Aerodynamics

Hypersonic flowfield effects on small delta-tail surfaces. Humes H. Hart (JSR) 866
An aerodynamic pitch-roll coupling in spinning vehicles. Eugene E. Covert and Milan Vlajinac (JSR, EN) 762

Rocket Vehicle Aerodynamic Heating

Rocket Vehicle Gust Loading and Wind Shear

Characteristics of atmospheric turbulence as related to wind loads on tall structures. George H. Fichtl, John W. Kaufman, and William W. Vaughan (JSR) 1396
Aerodynamic frequency response measurements of a wind anemometer. J. D. Laferty and L. V. Schmidt (JSR, EN) 1080

Fuel and Propellant Storage, Transfer and Control Systems

Dielectrophoretic orientation. James R. Melcher, David S. Guttman, and Mathew Hurwitz (JSR) 25
Spacecraft capillary propellant retention and control for long-life missions. Stephen C. DeBrock (JSR) 32
Influence of a rigid top mass on the response of a pressurized cylinder containing liquid. Daniel D. Kana and Wen-Hwa Chu (JSR) 103
Fluidics for propellant tank pressurization. Coy W. Colquitt Jr. (JSR) 111
Orbital experimentation for advancing cryogenic technology. J. D. Schweikle, G. O. Fredrickson, and P. L. Klevatt (JSR) 257
Main tank injection for packaged liquid missiles. D. A. Fester and J. C. Howell (JSR) 596
Feed systems and nozzles for Phoebus reactor experiments. S. V. Gunn and C. Dunn (JSR) 769
Dielectrophoretic liquid expulsion. James R. Melcher, Mathew Hurwitz, and Ruth G. Fax (JSR) 961
An investigation of fluorine-hydrogen main-tank-injection pressurization. E. C. Cady (JSR) 1248
Surface deformations in a draining liquid. Barry T. Lubin and George S. Springer (JSR, EN) 203
Motion of a bubble in a rotating liquid. James V. Clifton, Richard A. Hopkins, and Donald W. Goodwin (JSR, EN) 215
Application of heat pipes to reduce cryogenic boiloff in space. J. L. Thurman and E. H. Ingram (JSR, EN) 319
Dissolved gas and Helmholtz resonance in rocket injectors. Warren Juran and E. B. Zwick (JSR, EN) 347
A study of baffle effects on flow behavior under low-g conditions. C. C. Lee (JSR, EN) 499
Pneumatic sensing-line nonlinear model. Robert D. Harris and Robert G. Rose (JSR, EN) 1072
Helium injection to reduce resonant frequencies in propellant lines. Brantley R. Hanks and David G. Stephens (JSR, EN) 1202

Launch Vehicle or Missile Propulsion System Integration

Main tank injection for packaged liquid missiles. D. A. Fester and J. C. Howell (JSR) 596
An advanced cryogenic core concept for a flexible and economical delivery system. Edward W. Gomersall and Robert E. Slye (JSR) 785
Theoretical analysis of a fully combustible telescoped round. M. S. Nusbaum (JSR, EN) 84

Launch Vehicle and Missile Configurational Design

Major factors influencing the development of a nuclear flight stage. J. W. Sandford and W. L. Dowdy (JSR) 778

Launch Vehicle and Missile Structural Design (Including Loads)

Air forces on a missile from the motion of the silo near a bomb blast. F. Edward Ehlers (JSR, EN) 847

Launch Vehicle and Missile Fabrication

Launch Vehicle and Missile Subsystem Design

Uncontrolled Rocket and Missile Dynamics

Effect of ablation on the dynamics of spinning re-entry vehicles. A. P. Waterfall (JSR) 1038
Flight testing results on a hypersonic re-entry nose cone. J. Ledu and C. Pollak (JSR) 1044
An analytical technique for studying the anomalous roll behavior of re-entry vehicles. Frank J. Barbera (JSR) 1279
An aerodynamic pitch-roll coupling in spinning vehicles. Eugene E. Covert and Milan Vlajinac (JSR, EN) 762
Graphically determining sounding rocket vehicle attitudes. Charles F. Miller Jr. (JSR, EN) 1180

Launch Vehicle and Controlled Missile Dynamics and Control

Approximate finite-thrust trajectory optimization. Forrester T. Johnson (AIAA J) 993
Trajectory optimization using regularized variables. B. D. Tapley, V. Szebehely, and J. M. Lewallen (AIAA J) 1010
Roll-resonance effects on controlled rocket-boosted projectiles. P. M. Brodie (JSR, EN) 207
An attitude control system for large launch vehicles. Sherman M. Seltzer (JSR, EN) 748
PDM control analysis using the phase plane. Robert Thibodeau and Jerry B. Sharp (JSR, EN) 1054
Re-entry vehicle roll control utilizing recirculating base flow. M. D. Bennett and Amado A. Trujillo (JSR, EN) 1195

Launch Vehicle and Missile Guidance Systems (Including Command and Information Systems)

Iterative guidance applied to generalized missions. Helmut J. Horn, Doris C. Chandler, and Volis L. Buckelew (JSR) 4
Postflight guidance accuracy analysis of Atlas/Centaur/Surveyor flights. Jerome L. Greenstein (JSR) 971
Effect of deflections of the vertical on the performance of a terrestrial inertial navigation system. S. A. Levine and A. Gelb (JSR) 978
Onboard computer requirements for navigation of a spinning and maneuvering vehicle. W. E. Vander Velde, G. K. Bentley, J. H. Fagan, and W. T. McDonald (JSR) 1371
On nonzero miss distance. A. G. Rawling (JSR, EN) 81
Synthesis of a guidance system for a short-range infantry missile. John Frederick Muller (JSR, EN) 314
Operational flight program validation plan for missiles. B. E. Ferrier Jr. (JSR, EN) 628
PDM control analysis using the phase plane. Robert Thibodeau and Jerry B. Sharp (JSR, EN) 1054
Attenuation predictions from exhaust plume models. Horst A. Poehler (JSR, EN) 1057
Erratum: "Orbital gyrocompassing heading reference." Daniel B. DeBra (JSR, TC) 768

Tracking Systems

Refined measurements of exhaust-plume-induced radar amplitude and phase noise. J. W. Williams and L. D. Smoot (JSR) 1268
On nonzero miss distance. A. G. Rawling (JSR, EN) 81

Launch Vehicle or Missile System and Component Ground Testing

Launch Vehicle or Missile Simulation

Titan III propulsion system performance evaluation. Leonard A. Beck (JSR) 583
An analytical technique for studying the anomalous roll behavior of re-entry vehicles. Frank J. Barbera (JSR) 1279
Operational flight program validation plan for missiles. B. E. Ferrier Jr. (JSR, EN) 628

Launch Vehicle or Missile Flight Testing

Design, development, and testing of a series of air-launched sounding rockets. W. J. Bolster and G. C. Googins (JSR) 460
Flight testing results on a hypersonic re-entry nose cone. J. Ledu and C. Pollak (JSR) 1044
Re-entry vehicle launch restrictions considering damage to optical instruments by solar radiation. John C. Flemming and Hwachii Lien (JSR, EN) 70
A new concept for low-range pressure measurements on full-scale flight re-entry vehicles. J. M. Cassanto and F. C. George (JSR, EN) 1184

SPACECRAFT TECHNOLOGY

Unmanned Lunar and Interplanetary Systems

Solar-cell-powered, electric propulsion for automated space missions. J. P. Mullin, T. Barber, and C. Zola (JSR, SA) 1217
Lunar orbiter mission design. Norman L. Crabill and Wilbur L. Mayo (JSR) 18
Launch vehicles for future automated space missions. J. E. McGolrick and B. W. Davis (JSR) 129
Launch-period selection for the 1972 Venus launch opportunity. Donald P. Fields and Charles K. Wilkinson Jr. (JSR) 396
A subsatellite concept for Martian fields and particles measurements. Carle A. Privette and Samuel Urcis (JSR) 443
Mariner Mars 1969 flight-path design and mission analysis. Charles E. Kohlhase (JSR) 537
Radio propagation experiments with interplanetary spacecraft. Glenn A. Reiff (JSR) 551
Trajectory analysis for a grand tour mission to the outer planets. Louis Kingsland Jr. (JSR) 897
Atmospheric entry into Jupiter. Michael E. Tauber (JSR) 1103
Evaluation of entry and terminal deceleration systems for unmanned Martian landers. Edwin F. Harrison and Travis H. Slocumb Jr. (JSR) 1109
Versatility of electrically propelled spacecraft for planetary missions. E. Stuhlinger, D. P. Hale, C. C. Dailey, and L. Katz (JSR) 1162
Spacecraft design for multipurpose solar electric propulsion missions. J. H. Molitor, L. Schwaiger, and D. MacPherson (JSR) 1285
Extraecliptic 1.0 a.u. constant power electric propulsion missions. Alfred C. Mascy (JSR) 1367
A search-theory basis for planetary exploration lander strategy. K. M. Foreman and R. Preston (JSR, EN) 195
Comparison of preflight and postflight error analyses of lunar orbiter missions. Paul B. Liebelt and John P. Dyer (JSR, EN) 471
Unmanned outer planet capture missions. Susan M. Norman (JSR, EN) 473
Lander-to-orbiter communication link geometry characteristics for highly elliptical orbits. William J. Pragluski and R. Terry Gamber (JSR, EN) 478
Mission constraints on solid-propellant motors for unmanned spacecraft. C. L. Robillard and M. J. Cork (JSR, EN) 745
Translational forces on Mariner V from the attitude control system. Roger D. Bourke, Stephen R. McReynolds, and Kathryn L. Thuleen (JSR, EN) 1063

Unmanned Earth Satellite Systems

Launch vehicles for future automated space missions. J. E. McGolrick and B. W. Davis (JSR) 129
Continuous attitude determination for a spin-stabilized satellite. Lyndon M. Hardy (JSR) 156
Attitude determination and control of Syncom, Early Bird and Applications Technology Satellites. W. H. Sierer and W. A. Snyder (JSR) 162
Communications system for the proposed orbiting data relay network. S. H. Durrani (JSR) 166
Transmitted power maximization in communication satellites. Alvise Braga-Illa and David Snider (JSR) 173
Orbit determination from the satellite. Alvise Braga-Illa (JSR) 232
Magnetic attitude control system for the radio astronomy Explorer-A satellite. Barry E. Tossman (JSR) 239
Wobble-spin technique for spacecraft inversion and earth photography. Norman H. Beachley and John J. Uicker Jr. (JSR) 245
Synchronous satellites as part of a complex tracking network. Donald J. Johnson, Frank J. Mullin, and Paul Steiner (JSR) 679
Gravity field exploration by a new gradient technique. Paul H. Savet (JSR) 710
An electromagnetic attitude control system for a synchronous satellite. W. L. Black, B. Howland, and E. A. Vrablik (JSR) 795
Domestic communications services via satellites: Comsat pilot program. Robert D. Briskman (JSR) 835
An evaluation of television broadcast satellite systems. R. W. Hesselbacher (JSR) 1124
Attitude performance of the GEOS-II gravity-gradient spacecraft. J. M. Whisnant, P. R. Waszkiewicz, and V. L. Pisacane (JSR) 1379
Range difference navigation. A. Jones (JSR, EN) 198
A small satellite concept for lower-thermosphere measurements. P. Levine and R. Driscoll (JSR, EN) 221
Geosynchronous meteorological satellite. V. E. Suomi and T. H. Vonder Haar (JSR, EN) 342
Role of correlations in navigation satellite error analysis. David A. Conrad and Stephen Y. Itoga (JSR, EN) 476

Frequency assignment plans for synchronous communication satellites. J. F. Arnaud (JSR, EN) 486
A compatible satellite meteorological data collection system. H. W. Hill and C. F. Whistler (JSR, EN) 741

Manned Lunar and Interplanetary Systems

Common nuclear module for planetary exploration. J. F. Dollard (JSR) 136
Apollo entry aerodynamics. R. S. Crowder and J. D. Moote (JSR) 302
A new criterion for mission selection—Abort capability. R. R. Titus (JSR) 403
Secondary mission optimization. J. D. Mason, D. B. Smith, and W. D. Dickerson (JSR) 409
Approach navigation and entry corridors for manned planetary atmosphere braking. E. M. Repic and J. R. Eyman (JSR) 532
Nonintegral burn of nuclear rockets—An approach to low-cost space exploration. S. Gronich, R. J. Holl, and K. P. Johnson (JSR) 723
Reliability and maintainability analysis of a two-year manned spacecraft mission. Hugh A. Jennings (JSR, EN) 327
A technique for the analysis of Monte Carlo results. F. J. Mullin and B. H. Whalen (JSR, EN) 757

Manned Space Station Systems

Inclusion of time constraints and redundant access on spacecraft return probabilities by the concept of Borel set. S. T. Chu and A. R. Nagy Jr. (JSR) 667
Large space station power systems. Jonathan E. Boretz (JSR) 929
A three-man space escape system. J. Quillinan, H. Bloom, B. Gerberg, J. Axelson, E. Dziedziula, and A. Carter (JSR) 1229
Multiple-based air- and ground-launch for inspection, rescue, and other space missions. Robert J. Salkeld (JSR) 1448
Drag of a small body in the wake of a large satellite. Richard A. Oman (JSR, EN) 329
Mission planning as affected by sun-orbit-plane relationships. R. H. Brown (JSR, EN) 1077
Crew locomotion disturbances in a space cabin simulator. M. Goodman and W. C. Middleton (JSR, EN) 1207
Comparison of separate and integral spacecraft. Robert J. Salkeld (JSR, EN) 1315

Entry Vehicles and Landers

Entry vehicles for space programs. J. D. Stewart and D. H. Greenshields (JSR, SA) 1089
Structural and decelerator design options for Mars entry. L. D. Guy (JSR) 44
Lithium spray structural cooling. A. L. Mistretta and F. M. Anthony (JSR) 59
Evaluation of aerothermoelasticity problems for unmanned Mars-entry vehicles. E. G. Menkes and J. C. Houbolt (JSR) 178
An experiment to determine the structure of a planetary atmosphere. Simon C. Sommer and Layton Yee (JSR) 704
Techniques for autonomously pointing an antenna at Earth from Mars. G. L. Parker (JSR) 1019
Transitional boundary-layer considerations for the heating analyses of lifting re-entry vehicles. M. Masaki and J. K. Yakura (JSR) 1048
Evaluation of entry and terminal deceleration systems for unmanned Martian landers. Edwin F. Harrison and Travis H. Slocumb Jr. (JSR) 1109
Structural research on an impact limiter system for Mars "hub- and tire-" type hard landers. A. C. Knowll (JSR, EN) 491
Experimental study of projectile penetration in Ottawa sand at low velocities. Wen L. Wang (JSR, EN) 497
Subsonic base pressure results for typical planetary entry configurations. J. M. Cassanto (JSR, EN) 636
Prediction of flight performance of a throttling, ablative rocket engine. Robert D. Baker (JSR, EN) 1459

Extraterrestrial Surface Transportation

Hopping transporters for lunar exploration. Marshall H. Kaplan and Howard S. Seifert (JSR) 917

Lunar and Planetary Trajectories

A survey of impulsive trajectories. F. W. Gobetz and J. R. Doll (AIAA J, SA) 801
Lunar orbiter mission design. Norman L. Crabill and Wilbur L. Mayo (JSR) 18
Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters. Harvey M. Berkowitz and David A. Rodriguez (JSR) 50
How to open the heliocentric launch window for Earth-Mars orbiter missions. F. W. Gobetz and J. R. Doll (JSR) 353
Periodic orbits for interplanetary flight. Walter M. Hollister (JSR) 366
Trajectory requirements and performance comparisons of single-stage, electrically propelled space vehicles. R. V. Ragsac (JSR) 370
Guidance analysis of the multiple outer-planet (Grand Tour) mission. Alan L. Friedlander (JSR) 376
Triple-planet ballistic flybys of Mars and Venus. A. A. VanderVeen (JSR) 383
Circumjovian powered and free-return trajectories. Andrey B. Sergeyevsky (JSR) 390
Canonical transformation applications to optimal trajectory analysis. William F. Powers and Byron D. Tapley (AIAA J) 394
Launch-period selection for the 1972 Venus launch opportunity. Donald P. Fields and Charles K. Wilkinson Jr. (JSR) 396
An algorithm for the optimization of trajectories with associated parameters. C. P. Van Dine (AIAA J) 400
A new criterion for mission selection—Abort capability. R. R. Titus (JSR) 403
Secondary mission optimization. J. D. Mason, D. B. Smith, and W. D. Dickerson (JSR) 409
An approximate solution for the short-term motion of a lunar satellite. George H. Born and Byron D. Tapley (JSR) 513
A simplified approach for determining the information content of radio tracking data. D. W. Curkendall and S. R. McReynolds (JSR) 520
Mission window definition for Jupiter swingbys to the outer planets. J. D. Vickery and J. L. Horsewood (JSR) 525
Mariner Mars 1969 flight-path design and mission analysis. Charles E. Kohlhase (JSR) 537
Orbit determination for powered flight space vehicles on deep space missions. James F. Jordan (JSR) 545
Gravity-assisted trajectories for solar-probe missions in the ecliptic plane. Kenneth A. Myers (JSR) 698
Real-time targeting for the Apollo lunar orbit insertion maneuver. Ronald L. Berry and Robert F. Wiley (JSR) 824
Deceleration control system for aerobraking and skipout to orbit at Mars. Albert A. Schy and Jack A. White (JSR) 831
Numerical analysis of the asymptotic solution for Earth-to-Moon trajectories. J. Kevorkian and G. Brachet (AIAA J) 885
Trajectory analysis for a grand tour mission to the outer planets. Louis Kingsland Jr. (JSR) 897
A new method for constructing periodic orbits in nonlinear dynamical systems. Arthur Bennett and Julian Palmore (AIAA J) 998
Stability of periodic orbits in the elliptic, restricted three-body problem. R. Broucke (AIAA J) 1003
Rapid analysis of Moon-to-Earth trajectories. J. E. Lancaster, J. C. Walker, and F. I. Mann (AIAA J) 1017
Stability of the triangular points in the elliptic restricted problem of three bodies. K. T. Alfriend and R. H. Rand (AIAA J) 1024
Analytic solution for optimal two-impulse 180° transfer between noncoplanar orbits and the optimal orientation of the transfer plane. Fang Toh Sun (AIAA J) 1898
Lagrange multipliers and the state transition matrix for coasting arcs. David R. Glandorf (AIAA J, TN) 363
Comparison of preflight and postflight error analyses of lunar orbiter missions. Paul B. Liebelt and John P. Dyer (JSR, EN) 471
Unmanned outer planet capture missions. Susan M. Norman (JSR, EN) 473
Jupiter gravity-assisted trajectories. David A. Klopp and John C. Niehoff (JSR, EN) 480
Effect of linearization of the three-body problem near L_2. Uriel Domb (JSR, EN) 639
A technique for the analysis of Monte Carlo results. F. J. Mullin and B. H. Whalen (JSR, EN) 757
Consistency of lunar orbiter residuals with trajectory and local gravity effects. Paul M. Muller and William L. Sjogren (JSR, EN) 849
Translational forces on Mariner V from the attitude control system. Roger D. Bourke, Stephen R. McReynolds, and Kathryn L. Thuleen (JSR, EN) 1063
A fractional correction procedure for indirect trajectory optimization. D. H. Winfield (JSR, EN) 1084
Two-body perturbation matrix. David F. Crawford (AIAA J, TN) 1163
Illustration of the primer vector in time-fixed orbit transfer. John E. Prussing (AIAA J, TN) 1167
Recurrent nature of Lagrange multipliers for optimal low-thrust Earth-Jupiter transfers. J. D. Hart, W. T. Fowler, and J. M. Lewallen (AIAA J, TN) 1357
Optimum rendezvous, intercept, and injection. Richard E. Dickson and Vitalij Garber (AIAA J, TN) 1402
Low-thrust, constant-acceleration trajectories for solar probe missions. Harvey T. Brock Jr. and Roger W. Johnson (JSR, EN) 1462
Detection of unmodeled errors in recursive trajectory estimation. John W. McRary (AIAA J, TN) 1790
Errata: "Analysis of the optimum two-impulse orbital transfer under arbitrary terminal conditions." Fang Toh Sun (AIAA J, TC) 1664

Earth-Orbital Trajectories

Orbit determination from the satellite. Alvise Braga-Illa (JSR) 232
——"Orbit determination from the satellite": A correction. Alvise Braga-Illa (JSR, TC) 960
Doppler trackling of near-synchronous satellites (DODGE). Bruce B. Holland (JSR) 360
Synchronous satellites as part of a complex tracking network. Donald J. Johnson, Frank J. Mullin, and Paul Steiner (JSR) 679
A simplified approach for correction of perturbations on a stationary orbit. Richard E. Balsam and Bernard M. Anzel (JSR) 805

Launch constraints for a synchronous communications satellite mission. J. S. Tyler Jr. and E. W. Onstead (JSR) 890
Optimal four-impulse fixed-time rendezvous in the vicinity of a circular orbit. John E. Prussing (AIAA J) 928
A manual method for space rendezvous navigation and guidance. Alan M. Schneider, John E. Prussing, and Mitchell E. Timin (JSR) 998
Comparison of the Newtonian and general relativistic orbits of a point mass in an inverse-square law force field. Harry Lass and C. B. Solloway (AIAA J) 1029
Integrals for impulsive orbit transfer from Noether's theorem. H. Gardner Moyer (AIAA J) 1232
Minimum-impulse, time-free transfer between neighboring noncoplanar elliptical orbits with major axes perpendicular to the line of nodes. J. V. Breakwell and W. Heine (AIAA J) 1236
Determination of orbits of planetary artificial satellites and planetary gravitational fields. C. C. H. Tang and C. L. Greer (AIAA J) 1469
Aerodynamics of randomly tumbling bodies. Andrzej Wortman (JSR, EN) 205
A polynomial force model for determining near-equatorial, near-synchronous orbits. Norman S. Hall and Robert H. Gersten (JSR, EN) 503
Mission constraints on solid-propellant motors for unmanned spacecraft. C. L. Robillard and M. J. Cork (JSR, EN) 745
Effect of neglected gravity coefficients on computed satellite orbits and geodetic parameters. R. J. Anderle, C. A. Malyevac, and H. L. Green Jr. (JSR, EN) 951
Optimal continuous low-thrust trajectories for co-altitude rendezvous. Roger R. Burrows and Gordon A. Wood (AIAA J, TN) 983
Mission planning as affected by sun-orbit-plane relationships. R. H. Brown (JSR, EN) 1077
Illustration of the primer vector in time-fixed orbit transfer. John E. Prussing (AIAA J, TN) 1167
Rocket propulsion in an inverse square force field. Theodore F. Stubbs (AIAA J, TN) 1169
A simplified method for predicting satellite passes. Kathleen S. Budlong (JSR, EN) 1341
Detection of unmodeled errors in recursive trajectory estimation. John W. McRary (AIAA J, TN) 1790
Bounds on the motion of objects ejected from an orbiting body. Samuel A. Musa (AIAA J, TN) 2012
Errata: "Analysis of the optimum two-impulse orbital transfer under arbitrary terminal conditions." Fang Toh Sun (AIAA J, TC) 1664

Spacecraft Mission Studies and Economics

Lunar orbiter mission design. Norman L. Crabill and Wilbur L. Mayo (JSR) 18
Space-storable propulsion system comparison. J. E. Piper and F. M. Friedlaender (JSR) 117
Trajectory requirements and performance comparisons of single-stage, electrically propelled space vehicles. R. V. Ragsac (JSR) 370
Triple-planet ballistic flybys of Mars and Venus. A. A. Vanderveen (JSR) 383
Circumjovian powered and free-return trajectories. Andrey B. Sergeyevsky (JSR) 390
Launch-period selection for the 1972 Venus launch opportunity. Donald P. Fields and Charles K. Wilkinson Jr. (JSR) 396
A new criterion for mission selection—Abort capability. R. R. Titus (JSR) 403
A subsatellite concept for Martian fields and particles measurements. Carle A. Privette and Samuel Urcis (JSR) 443
Mariner Mars 1969 flight-path design and mission analysis. Charles E. Kohlhase (JSR) 537
Inclusion of time constraints and redundant access on spacecraft return probabilities by the concept of Borel set. S. T. Chu and A. R. Nagy Jr. (JSR) 667
Gravity-assisted trajectories for solar-polar missions in the ecliptic plane. Kenneth A. Myers (JSR) 698
An evaluation of television broadcast satellite systems. R. W. Hesselbacher (JSR) 1124
Versatility of electrically propelled spacecraft for planetary missions. E. Stuhlinger, D. P. Hale, C. C. Dailey, and L. Katz (JSR) 1162
Extraecliptic 1.0 a.u. constant power electric propulsion missions. Alfred C. Mascy (JSR) 1367
A search-theory basis for planetary exploration lander strategy. K. M. Foreman and R. Preston (JSR, EN) 195
Spacecraft sizing technique for planetary missions. Haim Kennet and E. E. Spear (JSR, EN) 859
Mission planning as affected by sun-orbit-plane relationships. R. H. Brown (JSR, EN) 1077
A method for comparing ballistic and electric propulsion performance. Federico G. Casal (JSR, EN) 1175
Manned maintenance and refueling in near and deep space logistics. Robert J. Salkeld (JSR, EN) 1186
Mission analysis models for power-limited systems. Robert V. Ragsac (JSR, EN) 1196
Comparison of separate and integral spacecraft. Robert J. Salkeld (JSR, EN) 1315

Entry Vehicle Mission Studies and Flight Mechanics

Entry vehicles for space programs. J. D. Stewart and D. H. Greenshields (JSR, SA) 1089
Apollo entry aerodynamics. R. S. Crowder and J. D. Moote (JSR) 302
Inference of vehicle and atmosphere parameters from free-flight motions. Roger L. Barron (JSR) 641
Differential corrections applied to an Izsak-Borchers ballistic trajectory. William A. Allen (AIAA J) 890
Simulation of Venus atmospheric entry by Earth re-entry. Joseph M. Spiegel, Fred Wolf, and Dale W. Zeh (JSR) 1030
Transitional boundary-layer considerations for the heating analyses of lifting re-entry vehicles. M. Masaki and J. K. Yakura (JSR) 1048
Atmospheric entry into Jupiter. Michael E. Tauber (JSR) 1103
A three-man space escape system. J. Quillinan, H. Bloom, B. Gerberg, J. Axelson, E. Dziedziula, and A. Carter (JSR) 1229
Angle-of-attack motion of a spinning entry vehicle. Robert H. Prislin and Peter Jaffe (JSR, EN) 93
Planar tumbling in atmospheric entry. Maurice L. Rasmussen (JSR, EN) 751
Radiation absorption effects on heating loads encountered during hyperbolic entry. C. D. Engel and L. W. Spradley (JSR, EN) 764
Terminal dynamics of atmospheric entry capsules. Peter Jaffe (AIAA J, TN) 1157
Re-entry dispersions due to atmospheric uncertainties. Gerald R. Weiss (JSR, EN) 1193
Vector-matrix second-order sensitivity equation with application to Mars entry. P. J. Cefola and C. N. Shen (AIAA J, TN) 1633

Post-Entry Deceleration Systems and Flight Mechanics

Structural and decelerator design options for Mars entry. L. D. Guy (JSR) 44
Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters. Harvey M. Berkowitz and David A. Rodriguez (JSR) 50
Development status of attached inflatable decelerators. Martin M. Mikulas Jr. and Herman L. Bohon (JSR) 654
An experiment to determine the structure of a planetary atmosphere. Simon C. Sommer and Layton Yee (JSR) 704
Deployable aerodynamic decelerators for space missions. C. L. Gillis (JSR) 885
Hopping transporters for lunar exploration. Marshall H. Kaplan and Howard S. Seifert (JSR) 917
Evaluation of entry and terminal deceleration systems for unmanned Martian landers. Edwin F. Harrison and Travis H. Slocumb Jr. (JSR) 1109
Development of an extremely lightweight, high-altitude decelerator. Peter G. Niederer (JSR) 1274
Parachute system to recover spinning shell subjected to 20,000 g's. William B. Pepper and Robert D. Fellerhoff (JSR, EN) 344
Development of a composite structure hypersonic parachute. William B. Pepper (JSR, EN) 495
Some test results from the NASA planetary entry parachute program. Harold N. Murrow and John C. McFall Jr. (JSR, EN) 621
Damping derivatives of 120° conical spacecraft from flights in a low-density environment. Charles H. Whitlock, Richard J. Bendura, and Allen B. Henning (JSR, EN) 937
Dimensionless products of parachute inflation. Kenneth E. French (JSR, EN) 1199

Spacecraft Propulsion Systems Integration

Space-storable propulsion system comparison. J. E. Piper and F. M. Friedlaender (JSR) 117
Spacecraft design for multipurpose solar electric propulsion missions. J. H. Molitor, L. Schwaiger, and D. MacPherson (JSR) 1285
Surveyor spacecraft Vernier propulsion system survival in lunar environment. Gilbert F. Pasley (JSR) 1430

Spacecraft Electric Power Systems

Large space station power systems. Jonathan E. Boretz (JSR) 929
Propellant condensation on surfaces near an electric rocket exhaust. Thaine W. Reynolds and Edward A. Richley (JSR) 1155
Power-weight optimization of Rankine-type cycle. E. A. DeZubay (JSR, EN) 632
Re-entry safety of isotopic systems. Stewart F. Kahn and Clark V. Dohner (JSR, EN) 939
Solar proton radiation damage of solar cells at synchronous altitudes. L. J. Lanzerotti (JSR, EN) 1086
System requirements for application of a pulsed MPD to electrical propulsion. A. C. Malliaris (JSR, EN) 1325
Comment on "Re-entry of radioactive power sources" C. A. Willis (JSR, TC) 864
——Reply by authors to C. A. Willis. M. J. Brunner, C. V. Dohner, and R. L. Lawit (JSR, TC) 864

Spacecraft Temperature Control Systems

Entry vehicles for space programs. J. D. Stewart and D. H. Greenshields (JSR, SA) 1089
Melting of a finite paraffin slab as applied to phase-change thermal control. P. R. Pujado, F. J. Stermole, and J. O. Golden (JSR) 280
Thermal control of a Mars entry capsule. J. W. Stultz (JSR) 609
Effective thermal conductivity parallel to the laminations, and total conductance of multilayer insulation. John G. Androulakis and Robert L. Kosson (JSR) 841
Optimization of steady-state thermal design of space radiators. J. L. Thurman (JSR) 1114
Application of heat pipes to reduce cryogenic boiloff in space. J. L. Thurman and E. H. Ingram (JSR, EN) 319
Thermal resistance of bolted or screwed sheet metal joints in a vacuum. E. Veilleux and M. Mark (JSR, EN) 339
Analysis of a belt-type heat transport device. T. J. McGean (JSR, EN) 947
Effect of the Moon's infrared emission on thermal calculations. James K. Harrison (JSR, EN) 1059
Heat conduction through fins with nonadiabatic tips. Y. S. Lou (JSR, EN) 1182
Ignition of metals with ClF_3 and ClF_5 for use as spacecraft chemical heaters. Robert Alden Rhein (JSR, EN) 1328
Temperatures predictions during spacecraft maneuvers. D. L. Ayers (JSR, EN) 1343
Comment on "Thermodynamic design fundamentals of high-performance insulation" J. W. Powers (JSR, TC) 512
——Reply by authors to J. W. Powers. N. R. Folkman and T. G. Lee (JSR, TC) 512

Spacecraft Configura. onal and Structural Design (Including Loads)

Comparison of inflation rigidized wire-film and shell-film cylinders in axial compression and bending. Paul E. Wilson (JSR, EN) 200

Meteoroid Protection Systems

Development of meteoroid protection for extravehicular-activity space suits. William E. McAllum (JSR) 1225
Selection of an effective mass-density value for meteoric matter. John J. Volkoff (JSR, EN) 493
A meteoroid stream model for evaluation of the stream hazard to interplanetary flight. R. D. Dycus and A. J. Richardson (JSR, EN) 1070
Projectile size and density effects on hypervelocity penetration. R. J. Arenz, S. J. (JSR, EN) 1319
Particle cloud impingement damage. A. J. Laderman and C. H. Lewis (JSR, EN) 1327
Effect of debris shielding on energy partition. C. H. Lewis and A. J. Laderman (JSR, EN) 1470
Comment on "Evaluation of the computational errors of strapdown navigation systems." James L. Farrell (AIAA J, TC) 571

Radiation Protection Systems

Solar proton radiation damage of solar cells at synchronous altitudes. L. J. Lanzerotti (JSR, EN) 1086

Spacecraft Attitude Dynamics and Control

Effects of energy dissipation on the attitude stability of dual-spin satellites. D. L. Mingori (AIAA J) 20
Thrust vectoring of ion engines. Gordon Sohl and Verryl V. Fosnight (JSR) 143
Performance characteristics of a "Damped" mass expulsion attitude control system. William C. Englehart (JSR) 148
Continuous attitude determination for a spin-stabilized satellite. Lyndon M. Hardy (JSR) 156
Attitude determination and control of Syncom, Early Bird and Applications Technology Satellites. W. H. Sierer and W. A. Snyder (JSR) 162
A description of the CMG and its application to space vehicle control. B. J. O'Connor and L. A. Morine (JSR) 225
Magnetic attitude control system for the radio astronomy Explorer-A satellite. Barry E. Tossman (JSR) 239
Wobble-spin technique for spacecraft inversion and earth photography. Norman H. Beachley and John J. Uicker Jr. (JSR) 245
——Comments on "Wobble-spin technique for spacecraft inversion and Earth photography. L. H. Grasshoff (JSR, TC) 1214
——Reply by authors to L. H. Grasshoff. Norman H. Beachley and John J. Uicker Jr. (JSR, TC) 1215
Continuous and discrete RAE structural models. James L. Farrell and James K. Newton (JSR) 414
Spring-restrained, momentum-wheel orientation and stabilization system for exoatmospheric vehicles. F. T. Murray, M. R. Weinberger, and E. C. Graves (JSR) 436
Attitude control of stable and unstable satellites in elliptic orbits. William H. Boykin Jr. and Irmgard Flügge-Lotz (JSR) 685
Pulsed performance of a steam reaction jet. H. Greer and D. J. Griep (JSR) 691
ATS-III resistojet thruster system performance. T. Kent Pugmire, W. S. Davis, and William Lund (JSR) 790
An electromagnetic attitude control system for a synchronous satellite. W. L. Black, B. Howland, and E. A. Vrablik (JSR) 795
Limit cycle oscillations in pulse-modulated systems. Robert N. Clark and Gene F. Franklin (JSR) 799
Inline hybrid computer for simulation of passively stabilized satellites. Rafael Gluck and Albert Wong (JSR) 812
Motion and stability of a spinning spring-mass system in orbit. S. A. Crist and J. G. Eisley (JSR) 819
Launch constraints for a synchronous communications satellite mission. J. S. Tyler Jr. and E. W. Onstead (JSR) 890
Thermally induced vibration and flutter of a flexible boom. Yi-Yuan Yu (JSR) 902
Cesium contact ion microthruster experiment aboard applications technology satellite (ATS)-IV. Robert E. Hunter, Robert O. Bartlett, Robert M. Worlock and Edmund L. James (JSR) 968
Positive ion measurement of spacecraft attitude: Gemini X and XII. Rita C. Sagalyn and Michael Smiddy (JSR) 985
Satellite attitude determinatiom from celestial sightings. Pranas A. Grusas (JSR) 1007
Satellite attitude control using a torqued, 2-axis-gimbaled boom as the actuator. James A. Gatlin, A. G. Buckingham, and W. H. Pleasants (JSR) 1013
Optimal configurations for hinged, two-body satellites. Gary M. Connell (JSR) 1024
Stationary resonant pitching motions of a controlled satellite. J. A. Morrison (AIAA J) 1032
Nonlinear attitude motion near resonance. D. L. Hitzl (AIAA J) 1039
Stability of the force-free motions of a dual-spin spacecraft. R. Pringle Jr. (AIAA J) 1054
Bounds on the librations of parametrically resonant satellites. Peter W. Likins and Gerald M. Wrout (AIAA J) 1134
Periodic solutions associated with the gravity-gradient-oriented system: Part I. Analytical and numerical determination. V. J. Modi and R. C. Brereton (AIAA J) 1217
——Periodic solutions associated with the gravity-gradient-oriented system. Part II: Stability analysis. V. J. Modi and R. C. Brereton (AIAA J) 1465
Optimal estimation of rotation-coupled flexural oscillations. James L. Farrell, James K. Newton, James A. Miller, and Eliezer N. Solomon (JSR) 1290
Attitude performance of the GEOS-II gravity-gradient spacecraft. J. M. Whisnant, P. R. Waszkiewicz, and V. L. Pisacane (JSR) 1379
Installed thrust vector for scarfed nozzles. Stanton Boraas and Robert L. Ashby (JSR) 1410
Nutation damper instability on spin-stabilized spacecraft. Gerald J. Cloutier (AIAA J) 2110
Optimal lift control of a hypersonic lifting body during atmospheric entry. Yun-Yuan Shi, L. Pottsepp, and M. C. Eckstein (AIAA J) 2233
Possible effects of boom flutter on the attitude dynamics of the OVI-10 satellite. G. M. Connell and V. Chobotov (JSR, EN) 90
Attitude commands for single-axis finite rotation. Carl Grubin (JSR, EN) 202
Friction damping of deployed structures in a weightless state. E. V. Wilms (JSR, EN) 318
Attitude perturbations on a slowly spinning multibody satellite. D. K. Anand, J. M. Whisnant, and M. Sturmanis (JSR, EN) 324
Degree-of-freedom requirements for hinged multibody satellites. Gary M. Connell (JSR, EN) 501
A method of active attitude control based on energy considerations. T. R. Kane and M. P. Scher (JSR, EN) 633
A passive method for scanning the celestial sphere. Albert J. Fleig Jr. (JSR, EN) 846
A satellite rotational kinetic energy dissipator. D. J. Baines (JSR, EN) 850
Attitude stability of an orbiting vehicle containing a gyrostat. E. Y. Yu (JSR, EN) 948
Translational forces on Mariner V from the attitude control system. Roger D. Bourke, Stephen R. McReynolds, and Kathryn L. Thuleen (JSR, EN) 1063
Asymptotic stability of second-order linear systems with semidefinite damping. Gary M. Connell (AIAA J, TN) 1185
Stationkeeping and synchronous satellite orbit determination. Anthony G. Lebowe (AIAA J, TN) 1195
Crew locomotion disturbances in a space cabin simulator. M. Goodman and W. C. Middleton (JSR, EN) 1207
Experimental investigation of a fluidic sun sensor. William V. Miller (JSR, EN) 1305
Gas effects in attitude control systems. W. Juran, E. B. Zwick, and R. L. Moffett (JSR, EN) 1310
Gravity-gradient capture and stability in an eccentric orbit. D. K. Anand, J. M. Whisnant, V. L, Pisacane, and M. Sturmanis (JSR, EN) 1456
Comments on "Energy considerations for attitude stability of dual-spin spacecraft" D. L. Mingori (JSR, TC) 350
——Comments on "Energy consideration for attitude stability of dual-spin spacecraft" William J. Russell (JSR, TC) 351
——Reply by author to D. L. Mingori and W. J. Russell. Bertrand T. Fang (JSR, TC) 352

Entry Vehicle Dynamics and Control

Apollo entry aerodynamics. R. S. Crowder and J. D. Moote (JSR) 302
Inference of vehicle and atmosphere parameters from free-flight motions. Roger L. Barron (JSR) 641
Effect of ablation on the dynamics of spinning re-entry vehicles. A. P. Waterfall (JSR) 1038
Flight testing results on a hypersonic re-entry nose cone. J. Ledu and C. Pollak (JSR) 1044
An analytical technique for studying the anomalous roll behavior of re-entry vehicles. Frank J. Barbera (JSR) 1279
Onboard computer requirements for navigation of a spinning and maneuvering vehicle. W. E. Vander Velde, G. K. Bentley, J. H. Fagan, and W. T. McDonald (JSR) 1371
Analyses of the performance of liquid dampers for nutation in spacecraft. K. Ayache and R. Lynch (JSR) 1385
Dynamic stability of high-drag planetary entry vehicles at transonic speeds. Wayne J. Marko (JSR) 1390
Effect of boundary-layer transition on vehicle dynamics. Lars Eric Ericsson (JSR) 1404
Angle-of-attack convergence and windward-meridian rotation rate of rolling re-entry vehicles. Daniel H. Platus (AIAA J) 2324
Angle-of-attack motion of a spinning entry vehicle. Robert H. Prislin and Peter Jaffe (JSR, EN) 93
Blunt-cone roll-damping derivative. Brian Quinn (AIAA J, TN) 175
Simulation of the Apollo command module aerodynamics at high altitudes. D. E. Boylan and B. J. Griffith (JSR, EN) 334
Laminar hypersonic roll damping derivatives for a 10° cone. Otto Walchner (AIAA J, TN) 342
Asymptotic expansion of a hypervelocity atmospheric entry problem. Yun-Yuan Shi and L. Pottsepp (AIAA J, TN) 353
Center-of-gravity requirements for trim of several axisymmetric bodies. Robert W. Rainey and Peter T. Bernot (JSR, EN) 509
Planar tumbling in atmospheric entry. Maurice L. Rasmussen (JSR, EN) 751
Damping derivatives of 120° conical spacecraft from flights in a low-density environment. Charles H. Whitlock, Richard J. Bendura, and Allen B. Henning (JSR, EN) 937
Re-entry vehicle roll control utilizing recirculating base flow. M. D. Bennett and Amado A. Trujillo (JSR, EN) 1195
A multiple time scaling analysis of re-entry roll dynamics. Ali Hasan Nayfeh (AIAA J, TN) 2155

Spacecraft Communication Systems

A case study in real-time ground control and data processing. E. T. Pfund (JSR) 9
Communications system for the proposed orbiting data relay network. S. H. Durrani (JSR) 166
Transmitted power maximization in communication satellites. Alvise Braga-Illa and David Snider (JSR) 173
Traveling-wave tube for the communication satellite "Symphonie" J. Bretting and W. Klein (JSR) 285
Radio propagation experiments with interplanetary spacecraft. Glenn A. Reiff (JSR) 551
Communications, instrumentation, and data handling for manned planetary missions. M. Noda (JSR) 673
Domestic communications services via satellites: Comsat pilot program. Robert D. Briskman (JSR) 835
Launch constraints for a synchronous communications satellite mission. J. S. Tyler Jr. and E. W. Onstead (JSR) 890
Techniques for autonomously pointing an antenna at Earth from Mars. G. L. Parker (JSR) 1019
An evaluation of television broadcast satellite systems. R. W. Hesselbacher (JSR) 1124
Photometric calibration of the surveyor television system. Melvin I. Smokler and Phil M. Salomon (JSR) 1243
Radiofrequency signal transmissions during Mars orbital entry. C. A. Andrade and H. J. Deacon Jr. (JSR, EN) 208
Lander-to-orbiter communication link geometry characteristics for highly elliptical orbits. William J. Pragluski and R. Terry Gamber (JSR, EN) 478
Frequency assignment plans for synchronous communication satellites. J. F. Arnaud (JSR, EN) 486

Spacecraft Navigation, Guidance, and Flight-Path Control Systems

A case study in real-time ground control and data processing. E. T. Pfund (JSR) 9
Orbit determination from the satellite. Alvise Braga-Illa (JSR) 232
Guidance analysis of the multiple outer-planet (Grand-Tour) mission. Alan L. Friedlander (JSR) 376
Automatic satellite station-keeping. Alvise-Braga-Illa (JSR) 430
Approach navigation and entry corridors for manned planetary atmosphere braking. E. M. Repic and J. R. Eyman (JSR) 532
Orbit determination for powered flight space vehicles on deep space missions. James F. Jordan (JSR) 545
A simplified approach for correction of perturbations on a stationary orbit. Richard E. Balsam and Bernard M. Anzel (JSR) 805
Real-time targeting for the Apollo lunar orbit insertion maneuver. Ronald L. Berry and Robert F. Wiley (JSR) 824
Deceleration control system for aerobraking and skipout to orbit at Mars. Albert A. Schy and Jack A. White (JSR) 831
Postflight guidance accuracy analysis of Atlas/Centaur/Surveyor flights. Jerome L. Greenstein (JSR) 971
Flotation technique for laboratory calibration of low-level accelerometers. Barry K. Likeness and Robert H. Cannon Jr. (JSR) 991
A manual method for space rendezvous navigation and guidance. Alan M. Schneider, John E. Prussing, and Mitchell E. Timin (JSR) 998
An empirical simulation of the translunar injection burn for Apollo. D. T. Martin and R. F. Sievers (JSR, EN) 483
A simulation of stationkeeping for synchronous satellites. Millerd Chandler Crocker II (JSR, EN) 616
Evaluation of strapdown guidance systems on interplanetary missions. Ellis F. Hitt and Edmund J. Koenke (JSR, EN) 623
Impulsive orbit transfer optimization by an accelerated gradient method. Ivan L. Johnson Jr. (JSR, EN) 630
A technique for the analysis of Monte Carlo results. F. J. Mullin and B. H. Whalen (JSR, EN) 757
Comment on "Optimal space flight with multiple propulsion systems." E. A. Willis Jr. and L. H. Fishbach (JSR, TC) 767
Erratum: "Orbital gyrocompassing heading reference." Daniel B. DeBra (JSR, TC) 768

Spacecraft and Component Ground Testing and Simulation

Attitude control of stable and unstable satellites in elliptic orbits. William H. Boykin Jr. and Irmgard Flügge-Lotz (JSR) 685
Flotation technique for laboratory calibration of low-level accelerometers. Barry K. Likeness and Robert H. Cannon Jr. (JSR) 991
Attitude perturbations on a slowly spinning multibody satellite. D. K. Anand, J. M. Whisnant, and M. Sturmanis (JSR, EN) 324
Simulation of the Apollo command module aerodynamics at high altitudes. D. E. Boylan and B. J. Griffith (JSR, EN) 334
A simulation of stationkeeping for synchronous satellites. Millerd Chandler Crocker II (JSR, EN) 616
Prediction of flight performance of a throttling, ablative rocket engine. Robert D. Baker (JSR, EN) 1459

Spacecraft Flight Testing

Orbital experimentation for advancing cryogenic technology. J. D. Schweikle, G. O. Fredrickson, and P. L. Klevatt (JSR) 257
Cesium contact ion microthruster experiment aboard applications technology satellite (ATS)-IV. Robert E. Hunter, Robert O. Bartlett, Robert M. Worlock, and Edmund L. James (JSR) 968
Positive ion measurement of spacecraft attitude: Gemini X and XII. Rita C. Sagalyn and Michael Smiddy (JSR) 985
Simulation of Venus atmospheric entry by Earth re-entry. Joseph M. Spiegel, Fred Wolf, and Dale W. Zeh (JSR) 1030
Attitude performance of the GEOS-II gravity-gradient spacecraft. J. M. Whisnant, P. R. Waszkiewicz, and V. L. Pisacane (JSR) 1379
Surveyor spacecraft Vernier propulsion system survival in lunar environment. Gilbert F. Pasley (JSR) 1430

Re-Entry Vehicle Testing

Performance characteristics of a multiple-arcjet wind tunnel. Charles Cason and T. A. Barr Jr. (JSR) 878
Crew locomotion disturbances in a space cabin simulator. M. Goodman and W. C. Middleton (JSR, EN) 1207

Spacecraft Habitability and Life Support Systems

Resistojet biowaste utilization—Evaluation and system selection. R. V. Greco and R. M. Byke (JSR) 37

Space Medicine (Including Weightlessness, Radiation Effects, Psychology, etc.)

Spacecraft Sterilization

Sterilizable liquid propulsion system. S. C. Lukens (JSR) 717
Effects of sterilization and decontamination on hydrazine propulsion systems. M. H. Heinz and G. F. Orton (JSR, EN) 853

Extra-Vehicular Activity

Development of meteoroid protection for extravehicular-activity space suits. William E. McAllum (JSR) 1225
A real-time hybrid solution of human body dynamics used to simulate zero-g activity. Larry M. Hunt (JSR, EN) 752
Manned maintenance and refueling in near and deep space logistics. Robert J. Salkeld (JSR, EN) 1186

Crew Training

A manual method for space rendezvous navigation and guidance. Alan M. Schneider, John E. Prussing, and Mitchell E. Timin (JSR) 998

A real-time hybrid solution of human body dynamics used to simulate zero-g activity. Larry M. Hunt (JSR, EN) 752

Data Sensing and Presentation or Transmission Systems

A case study in real-time ground control and data processing. E. T. Pfund (JSR) 9
Continuous attitude determination for a spin-stabilized satellite. Lyndon M. Hardy (JSR) 156
Attitude determination and control of Syncom, Early Bird and Applications Technology Satellites. W. H. Sierer and W. A. Snyder (JSR) 162
Communications, instrumentation, and data handling for manned planetary missions. M. Noda (JSR) 673
Gravity field exploration by a new gradient technique. Paul H. Savet (JSR) 710
Positive ion measurement of spacecraft attitude: Gemini X and XII. Rita C. Sagalyn and Michael Smiddy (JSR) 985
Flotation technique for laboratory calibration of low-level accelerometers. Barry K. Likeness and Robert H. Cannon Jr. (JSR) 991
Satellite attitude determination from celestial sightings. Pranas A. Grusas (JSR) 1007
Techniques for autonomously pointing an antenna at Earth from Mars. G. L. Parker (JSR) 1019
Photometric calibration of the surveyor television system. Melvin I. Smokler and Phil M. Salomon (JSR) 1243
A new concept for low-range pressure measurements on full-scale flight re-entry vehicles. J. M. Cassanto and F. C. George (JSR, EN) 1184
Experimental investigation of a fluidic sun sensor. William V. Miller (JSR, EN) 1305

Spacecraft Tracking

Doppler tracking of near-synchronous satellites (DODGE). Bruce B. Holland (JSR) 360
Guidance analysis of the multiple outer-planet (Grand-Tour) mission. Alan L. Friedlander (JSR) 376
Automatic satellite station-keeping. Alvise Braga-Illa (JSR) 430
A simplified approach for determining the information content of radio tracking data. D. W. Curkendall and S. R. McReynolds (JSR) 520
Orbit determination for powered flight space vehicles on deep space missions. James F. Jordan (JSR) 545
Synchronous satellites as part of a complex tracking network. Donald J. Johnson, Frank J. Mullin, and Paul Steiner (JSR) 679
Role of correlations in navigation satellite error analysis. David A. Conrad and Stephen Y. Itoga (JSR, EN) 476
Postflight guidance accuracy analysis of Atlas/Centaur/Surveyor flights. Jerome L. Greenstein (JSR) 971
A compatible satellite meteorological data collection system. H. W. Hill and C. F. Whistler (JSR, EN) 741
Consistency of lunar orbiter residuals with trajectory and local gravity effects. Paul M. Muller and William L. Sjogren (JSR, EN) 849
A simplified method for predicting satellite passes. Kathleen S. Budlong (JSR, EN) 1341

MARINE TECHNOLOGY

Surface Vessel Systems

Future dynamics of United States flag oceanborne transportation. F. Kosofsky and S. Mazursky (JH) 154
Hovercraft range. A. A. West (JH, EN) 50
Utilization of satellite navigation techniques in marine operations. Joseph Chernof (JH, EN) 102

Submerged Vessel Systems

Underwater systems within the scientific, technological, and economic framework. Carl F. Kottler Jr. (JH, SA) 2
Development of a manned transparent capsule for panoramic marine observation. Kiyoshi Tsuji, Dan T. Stowell, and Jerry D. Stachiw (JH) 12
Space and deep submergence vehicles: Integrated systems synthesis. Jacob L. Meiry (JH) 88
Glass submersibles. Will Forman (JH, EN) 51

Mining Systems

Vessel and Control Surface Hydrodynamics

Propulsion System Hydrodynamics

Thermodynamic performance evaluation of a hydroduct using a thermite fuel. D. S. Hacker and P. Lieberman (JH) 139
Tandem propeller in review. Frederick R. Haselton (JH) 161

Undersea Acoustics

Suspended rigid underwater arrays. F. T. Geyling (JH) 72
Spurious signals from cable-suspended sonar systems. John R. Dale and Roger A. Holler (JH) 83
A theory of boundary-layer flow noise, with application to pressure gradients and polymer solutions. Frank M. White (JH) 95

Marine Propulsion System Integration

Optimum design parameters for hypergolic reciprocating engines—A mathematical solution. R. DiPippo (JH) 38

Marine Electric Power Systems

Closed cycle gas turbine as a proposed undersea power source. Thomas W. Phillips (JH) 184
Eutectic molten salt thermal storage system. Gerrit DeVries, H. Edmund Karig, and Gary Drage (JH) 191

Marine Vessel Design (Including Loads)

Corrosion/Erosion of Materials in Sea Water

A review of aluminum corrosion in tap waters. William H. Ailor Jr. (JH, SA) 105

Marine Vessel Vibration

Marine Vessel Trajectories, Stability, and Control

Deterministic response to free-surface waves. Charles J. Henry (JH) 80
A study of prediction techniques for aircraft carrier motions at sea. Paul Kaplan (JH) 121
Comments on "A three-dimensional dynamic analysis of a towed system." P. A. Laura and M. J. Casarella (JH, TC) 63

Undersea Navigation and Guidance

Effect of deflections of the vertical on the performance of a terrestrial inertial navigation system. S. A. Levine and A. Gelb (JSR) 978

Undersea Communication

Marine Systems Testing

Buoys as platforms for environmental measurements. J. E. Wesler (JH) 132

Undersea Extra-Vehicular Activity

Undersea Habitability and Life Support Systems

Undersea Medicine (Including Psychology, Pressure Effects, etc.)

Physical and Biological Oceanography

The North Pacific study. John D. Isaacs (JH) 65
Perforation of the Arctic sea-ice cover by projectile impact. Bernard Ross (JH) 115

PROPULSION

Properties of Fuels and Propellants

Some aspects of nonlinear mechanical behavior of a composite propellant. E. C. Francis and C. H. Carlton (JSR) 65
Effects of acceleration upon solid-rocket performance. G. B. Northam and M. H. Lucy (JSR) 456
Inerting and extinguishment of aerozine-50 with water and/or CF_3Br. D. S. Burgess, G. H. Martindill, J. N. Murphy, F. J. Perzak, J. M. Singer, and R. W. Van Dolah (JSR) 1259
Analysis of N_2H_4-RFNA reaction product. Michel A. Saad and Michael B. Detweiler (AIAA J) 1588
Theoretical analysis of a fully combustible telescoped round. M. S. Nusbaum (JSR, EN) 84
Burning rate of composite propellants containing irradiated ammonium perchlorate. Charles U. Pittman Jr. (JSR, EN) 87
Development of 7.62-mm and 30-mm combustible cartridge case ammunition. F. J. Zimmerman (JSR, EN) 312
Solubilities of gases in simple and complex propellants. E. J. Chang, N. A. Gokcen, and T. M. Poston (JSR, EN) 1177
Burning characteristics of composite solid propellants at high pressures. Charles Haff and Eugene Garner (JSR, EN) 1204
Ignition of metals with ClF_3 and ClF_5 for use as spacecraft chemical heaters. Robert Alden Rhein (JSR, EN) 1328

Combustion in Gases

Analysis of N_2H_4-RFNA reaction product. Michel A. Saad and Michael B. Detweiler (AIAA J) 1588

Reaction and ignition delay times in the oxidation of propane. B. F. Myers and E. R. Bartle (AIAA J) 1862
Turbulent swirling jet diffusion flames. Amnon Chervinsky (AIAA J) 1877

Combustion in Heterogeneous Media

Location of action of burning-rate catalysts in composite propellant combustion. Charles U. Pittman Jr. (AIAA J) 328
A technique for controlling the position of a burning solid-propellant sample in a combustion bomb. R. L. Derr and J. R. Osborn (JSR) 1120
Inerting and extinguishment of aerozine-50 with water and/or CF_3Br. D. S. Burgess, G. H. Martindill, J. N. Murphy, F. J. Perzak, J. M. Singer, and R. W. Van Dolah (JSR) 1259
Combustion considerations in fuel-rich propellant systems. Norman S. Cohen (AIAA J) 1345
Mixing, ignition, and combustion analysis of air-augmented solid rockets with boron particles. R. S. Channapragada, R. Anderson, Duvvuri Tirumalesa, and A. Gopalakrishnan (AIAA J) 1581
Study of solid-fuel ablation by liquid and physically homogeneous nitric acid. Michel L. Bernard, Max Auzanneau, Francois Baronnet, and Pierre Joulain (AIAA J) 1676
Combustion of solid fuels in a high-temperature supersonic airstream. Louis J. Spadaccini and Wallace Chinitz (AIAA J) 1682
Theoretical study of propellant behavior during thrust chamber depressurization. Tsuyoshi Hiroki and Edward A. Fletcher (AIAA J) 1884
Relevance of analytical models for perturbation of combustion of solid propellants. T. W. Price (AIAA J, TN) 153
Experimental studies of drop breakup in hypersonic flow. John L. Beal (JSR, EN) 337
Combustion of composite solid rocket propellants. R. P. Rastogi and B. L. Gupta (AIAA J, TN) 541
Extinction criterion of a monopropellant droplet burning in an atmosphere of inerts. V. K. Jain and N. Ramani (AIAA J. TN) 567
Onset of surface combustion in still atmosphere. S. W. Liu (AIAA J, TN) 734
Catalyzed ignition of composite propellent fuels by gaseous oxygen. G. S. Pearson and D. Sutton (AIAA J, TN) 770
Theory of propellant ignition by heterogeneous reaction. C. H. Waldman and M. Summerfield (AIAA J, TN) 1359
Remarks on extinguishment and the response function for a burning solid propellant. F. E. C. Culick (AIAA J, TN) 1403
Supercritical burning of liquid droplets in stagnant environment. Amon Chervinsky (AIAA J, TN) 1815
Combustion of an ablative fuel in a constant-area channel. Louis J. Spadaccini and Ely Reiss (AIAA J, TN) 2031

Combustion Stability, Ignition, and Detonation

Design consideration for combustion stability. R. L. Coates and M. D. Horton (JSR) 296
Laser spark ignition of chemically reactive gases. John H. Lee and R. Knystautas (AIAA J) 312
Development of 7.62-mm and 30-mm combustible cartridge case ammunition. F. J. Zimmerman (JSR) 312
Transverse waves in detonations: I. Spacing in the hydrogen-oxygen system. Roger A. Strehlow, Rolf E. Maurer, and S. Rajan (AIAA J) 323
Transverse waves in detonations: II. Structure and spacing in H_2–O_2, C_2H_2–O_2, C_2H_4–O_2, and CH_4–O_2 systems. Roger A. Strehlow and Carl D. Engel (AIAA J) 492
A model of solid-propellant ignition in a neutral environment. L. J. Shannon and L. I. Deverall (AIAA J) 497
Analysis of acoustic waves in a cold-flow rocket. F. E. C. Culick and George L. Dehority (JSR) 591
Two-phase detonation of a liquid layer. K. W. Ragland and J. A. Nicholls (AIAA J) 859
Electromagnetic effect on flows behind gaseous detonations. E. G. Plett and T. Y. Toong (AIAA J) 1127
Role of pressure in spontaneous ignition. Michel A. Saad and Samuel R. Goldwasser (AIAA J) 1574
Deflagration limits in an adiabatic model for steady linear burning of a monopropellant. William Nachbar (AIAA J) 1593
Entropy waves produced in oscillatory combustion of solid propellants. H. Krier, M. Summerfield, H. B. Mathes, and E. W. Price (AIAA J) 2079
An experimental study of fuel droplet ignition. Bernard J. Wood and Willis A. Rosser Jr. (AIAA J) 2288
Injector response to strong, high-frequency pressure oscillations. J. George Sotter, Joe W. Woodward, and Richard M. Clayton (JSR, EN) 504
Catalyzed ignition of composite propellent fuels by gaseous oxygen. G. S. Pearson and D. Sutton (AIAA J, TN) 770
Stability and space-time measurements of concentric detonations. B. Ahlborn and J. P. Huni (AIAA J, TN) 1191
T-burner data and combustion instability in solid propellant rockets. F. E. C. Culick and E. H. Perry (AIAA J, TN) 1204
Rocket combustion stability monitoring by temporal radiometry. W. F. Herget, R. L. Proffit, and J. E. Witherspoon (JSR, EN) 1336
Exothermic bimetallic ignition system. P. N. Laufman (JSR, EN) 1466
Plasma-dynamic stabilization in a coaxial-jet, gas-core reactor. J. S. Cory (AIAA J, TN) 1614
Erratum: "Correlations between deflagration characteristics and surface properties of nitramine-based propellants." R. Zimmer-Galler (AIAA, J, TC) 800
Comment on "Investigation of the AP composite solid-propellant deflagration mechanism by means of experimental analog techniques." J. Burger (AIAA J, TC) 988——Reply by authors to J. Burger. R. F. McAlevy III and R. B. Cole (AIAA J, TC) 988
Comment on "Large-amplitude transverse instability in rocket motors" John M. Bonnell (AIAA J, TC) 989
Systems of first-order, nonlinear differential equations convertible to classical forms. B. V. Dasarathy (AIAA J, TC) 989
"Catastrophic" pressure peaks in solid-propellant combustion. E. W. Price (AIAA J, TC) 990——Reply by author to E. W. Price. Samuel Temkin (AIAA J, TC) 991
Comment on "Heat-transfer characteristics of hot-gas ignition." Wiktor M. Jungowski (AIAA J, TC) 1216——Reply by author to W. M. Jungowski. L. W. Carlson (AIAA J, TC) 1216

Subsonic and Supersonic Airbreathing Propulsion

Concept and characteristics of the concorde exhaust noise suppressor. G. Richter and R. Hoch (JA) 98
Measurement of drag from interaction of jet exhaust and airframe. Donald Chamberlain (JA) 160
Development of engineering practices in jet and compressor noise. J. B. Large, E. Grande, and A. O. Andersson (AJ) 189
Evaluation of internal heat-transfer coefficients for impingement-cooled turbine airfoils. Raymond E. Chupp, Harold E. Helms, Peter W. McFadden, and Tony R. Brown (JA) 203
A control system concept for an axisymmetric supersonic inlet. K. S. Chun and R. H. Burr (JA) 306
Measurement of XB-70 propulsion performance incorporating the gas generator method. Warren Beaulieu, Ralph Campbell, and William Burcham (JA) 312
Development of metal-matrix composite blading for gas-turbine engines. J. A. Mangiapane, S. A. Sattar, D. F. Gray, and J. A. Timoshenko (JA) 318
NASA programs for development of high-temperature alloys for advanced engines. John C. Freche and Robert W. Hall (JA) 424
Theoretical and experimental studies of ducted mixing and burning of coaxial streams. C. E. Peters, W. J. Phares, and T. H. M. Cunningham (JSR) 1435
Gross thrust coefficient—turbofan engines. Joseph F. Boytos (JA, EN) 565

Hypersonic Airbreathing Propulsion

One-dimensional combustor optimization. Alan Brandt and Luigi L. Perini (JSR) 570
Theoretical effects of vitiated air contamination on ground testing of hypersonic airbreathing engines. Raymond B. Edelman and Louis J. Spadaccini (JSR) 1442
Experimental investigation of boron combustion in air-augmented rockets. K. Schadow (AIAA J) 1870
Active cooling of a hydrogen-fueled scramjet engine. L. L. Pagel and W. R. Warmbold (JA,EN) 472

VTOL Propulsion

Studies of exhaust-gas recirculation for VTOL aircraft. E. D. G. Kemp (JA) 102
The "fountain effect" and VTOL exhaust ingestion. D. B. Adarkar and G. R. Hall (JA) 109
Reingestion characteristics and inlet flow distortion of V/STOL lift-engine fighter configurations. Jerry V. Kirk and Jerry P. Barrack (JA) 116
Aerodynamic effects of lift-jet and lift-fan inlets in transition flight. William E. Grahame (JA) 150
Full-scale development of lift engine inlets for the XV-4B aircraft. Paul K. Shumpert and Anthony E. Harris (JA) 299

Solid and Hybrid Rocket Engines

Some aspects of nonlinear mechanical behavior of a composite propellant. E. C. Francis and C. H. Carlton (JSR) 65
Development of a laser-Doppler particle sensor for the measurement of velocities in rocket exhausts. Howard L. Morse, Barclay J. Tullis, Howard S. Seifert, and Wayne Babcock (JSR) 264
Prediction of nozzle material performance for NASA's 260 SL-3 motor. H. L. Moody and F. C. Price (JSR) 273
Design considerations for combustion stability. R. L. Coates and M. D. Horton (JSR) 296
Effects of acceleration upon solid-rocket performance. G. B. Northam and M. H. Lucy (JSR) 456
Evaluation of concepts for reuse of large booster nozzles. Edgar G. Parks Jr. and Richard L. Bailey (JSR) 577
Analysis of acoustic waves in a cold-flow rocket. F. E. C. Culick and George L. Dehority (JSR) 591

Measurement of solid rocket motor thermally induced radial bond stresses. W. H. Miller (JSR) 1253
A hazards model for exploding solid-propellant rockets. J. C. McMunn, Jon D. Collins, and Billings Brown (JSR) 1423
Theoretical study of propellant behavior during thrust chamber depressurization. Tsuyoshi Hiroki and Edward A. Fletcher (AIAA J) 1884
Aluminized composite solid-propellant burning rates in acceleration fields. E. J. Sturm and R. E. Reichenbach (AIAA J) 2087
An investigation of the swirling flow in a spinning end-burning rocket. Roger Dunlap (AIAA J) 2293
Stress analysis of incompressible solids of revolution by point matching. F. R. Wallis (JSR, EN) 86
Burning rate of composite propellants containing irradiated ammonium perchlorate. Charles U. Pittman Jr. (JSR, EN) 87
A photochemical microrocket for attitude control. J. N. Maycock and V. R. Pai Verneker (JSR, EN) 336
Mission constraints on solid-propellant motors for unmanned spacecraft. C. L. Robillard and M. J. Cork (JSR, EN) 745
A practical mathematical approach to the dendrite design of solid-propellant grains. Arie Peretz (JSR, EN) 944
Failure of solid rocket motors undergoing sudden case failure. Glenn A. Secor (JSR, EN) 1075
Stress analysis of solid-propellant rocket charges by point matching. F. R. Wallis (JSR, EN) 1082
Burning characteristics of composite solid propellants at high pressures. Charles Haff and Eugene Garner (JSR, EN) 1204
Exothermic bimetallic ignition system. P. N. Laufman (JSR, EN) 1466

Liquid Rocket Engines

Design criteria for film cooling for small liquid-propellant rocket engines. R. Carl Stechman, Joelee Oberstone, and J. C. Howell (JSR) 97
Fluidics for propellant tank pressurization. Coy W. Colquitt, Jr. (JSR) 111
Space-storable propulsion system comparison. J. E. Piper and F. M. Friedlaender (JSR) 117
Titan III propulsion system performance evaluation. Leonard A. Beck (JSR) 583
Main tank injection for packaged liquid missiles. D. A. Fester and J. C. Howell (JSR) 596
Pulsed performance of a steam reaction jet. H. Greer and D. J. Griep (JSR) 691
Sterilizable liquid propulsion system. S. C. Lukens (JSR) 717
An advanced cryogenic core concept for a flexible and economical delivery system. Edward W. Gomersall and Robert E. Slye (JSR) 785
Dielectrophoretic liquid expulsion. James R. Melcher, Mathew Hurwitz, and Ruth F. Fax (JSR) 961
A liquid rocket performance model based on vaporization interactions. D. L. Kors, L. B. Bassham, and R. E. Walker (JSR) 1133
Saturn V/S-IC stage base thermal environment. C. R. Mullen and R. L. Bender (JSR) 1138
An investigation of fluorine-hydrogen main-tank-injection pressurization. E. C. Cady (JSR) 1248
Performance of the aerobell extendible rocket nozzle. G. A. Hosack and R. R. Stromsta (JSR) 1416
Surveyor spacecraft Vernier propulsion system survival in lunar environment. Gilbert F. Pasley (JSR) 1430
Dissolved gas and Helmholtz resonance in rocket injectors. Warren Juran and E. B. Zwick (JSR, EN) 347
Injector response to strong, high-frequency pressure oscillations. J. George Sotter, Joe W. Woodward, and Richard M. Clayton (JSR, EN) 504
Effects of sterilization and decontamination on hydrazine propulsion systems. M. H. Heinz and G. F. Orton (JSR, EN) 853
Attenuation predictions from exhaust plume models. Horst A. Poehler (JSR, EN) 1057
Like and unlike impinging injection element droplet sizes. R. A. Dickerson (JSR, EN) 1306
An experimental technique for measurement of injector spray mixing. W. H. Nurick and S. D. Clapp (JSR, EN) 1312
Nonequilibrium combustion and nozzle flow in propellant performance. M. C. Branch and R. F. Sawyer (JSR, EN) 1322
Approximate analysis of nonisentropic flow in conical nozzles. Joe D. Hoffman (JSR, EN) 1329
Ablative materials for controlled high regression rates in rocket motors. H. O. Davis and H. M. Evensen (JSR, EN) 1334
Rocket combustion stability monitoring by temporal radiometry. W. F. Herget, R. L. Proffit, and J. E. Witherspoon (JSR, EN) 1336
Prediction of flight performance of a throttling, ablative rocket engine. Robert D. Baker (JSR, EN) 1459

Nuclear Propulsion

Common nuclear module for planetary exploration. J. F. Dollard (JSR) 136
The nuclear rocket program—Its status and plans. L. C. Corrington (JSR) 465
Recent NERVA technology development. C. M. Rice and W. H. Arnold (JSR) 565
Nonintegral burn of nuclear rockets—An approach to low-cost space exploration. S. Gronich, R. J. Holl, and K. P. Johnson (JSR) 723
Feed systems and nozzles for Phoebus reactor experiments. S. V. Gunn and C. Dunn (JSR) 769
Major factors influencing the development of a nuclear flight stage. J. W. Sandford and W. L. Dowdy (JSR) 778
Radio-frequency plasma simulation of gas-core reactor. Merle L. Thorpe (JSR) 923
Criticality studies of a nuclear light bulb engine. Thomas S. Latham (JSR) 1148

Electric and Advanced Space Propulsion

Solar-cell-powered, electric propulsion for automated space missions. J. P. Mullin, T. Barber, and C. Zola (JSR, SA) 1217
Resistojet biowaste utilization—Evaluation and system selection. R. V. Greco and R. M. Byke (JSR) 37
Thrust vectoring of ion engines. Gordon Sohl and Verryl V. Fosnight (JSR) 143
Bombardment thruster investigations at the Lewis Research Center. Edward A. Richley and William R. Kerslake (JSR) 289
Trajectory requirements and performance comparisons of single-stage, electrically propelled space vehicles. R. V. Ragsac (JSR) 370
An advanced contact ion microthruster system. R. Worlock, J. J. Davis, E. James, P. Ramirez, and O. Wood (JSR) 424
Ion drag and current partitioning at the cathode of a plasma accelerator. Vijay K. Rohatgi and Sol Aisenberg (AIAA J) 502
Research and development of a charged-particle bipolar thruster. Julius Perel, John F. Mahoney, R. David Moore, and Arthur Y. Yahiku (AIAA J) 507
Thrust system technology for solar electric propulsion. T. D. Masek and E. V. Pawlik (JSR) 557
ATS-III resistojet thruster system performance. T. Kent Pugmire, W. S. Davis, and William Lund (JSR) 790
Characteristics of a finite-length MHD traveling-wave cylindrical accelerator or generator. Jerry L. Jester and Jerome B. Fanucci (AIAA J) 864
Cesium contact ion microthruster experiment aboard applications technology satellite (ATS)-IV. Robert E. Hunter, Robert O. Bartlett, Robert M. Worlock, and Edmund L. James (JSR) 968
Colloid microthruster test stand. Sidney Zafran and Robert F. Kemp (JSR) 1144
Versatility of electrically propelled spacecraft for planetary missions. E. Stuhlinger, D. P. Hale, C. C. Dailey, and L. Katz (JSR) 1162
Ion accelerator designs for Kaufman thrusters. Walter C. Lathem (JSR) 1237
Spacecraft design for multipurpose solar electric propulsion missions. J. H. Molitor, L. Schwaiger, and D. MacPherson (JSR) 1285
Theoretical analyses of electrothermal thrusters with supersonic heat addition. Harry I. Leon and William R. Mickelsen (JSR) 1362
Extraecliptic 1.0 a.u. constant power electric propulsion missions. Alfred C. Mascy (JSR) 1367
Onset of instabilities in coaxial Hall current accelerators. H. A. Hassan and Charles C. Thompson (AIAA J) 2300
A photochemical microrocket for attitude control. J. N. Maycock and V. R. Pai Verneker (JSR, EN) 336
A study of the axial velocities in an ammonia MPD thruster. R. J. Sovie and D. J. Connolly (AIAA J, TN) 723
$Hg^+ + Cs$ charge transfer with comments on ion engine neutralization. Howard L. Daley and Julius Perel (AIAA J, TN) 733
Mission analysis models for power-limited systems. Robert V. Ragsac (JSR, EN) 1196
System requirements for application of a pulsed MPD to electrical propulsion. A. C. Malliaris (JSR, EN) 1325
Theory for oscillations in MPD accelerators. E. A. Witalis (AIAA J, TN) 1383
Plasma-Dynamic Stabilization in a Coaxial-Jet, Gas-Core Reactor. J. S. Cory (AIAA J, TN) 1614

Marine Propulsion

Airbreathing Engine Testing

Theoretical effects of vitiated air contamination on ground testing of hypersonic airbreathing engines. Raymond B. Edelman and Louis J. Spadaccini (JSR) 1442

Rocket Engine Testing

Recent NERVA technology development. C. M. Rice and W. H. Arnold (JSR) 565
Evaluation of concepts for reuse of large booster nozzles. Edgar G. Parks Jr. and Richard L. Bailey (JSR) 577
Feed systems and nozzles for Phoebus reactor experiments. S. V. Gunn and C. Dunn (JSR) 769
Colloid microthruster test stand. Sidney Zafran and Robert F. Kemp (JSR) 1144
Measurement of solid rocket motor thermally induced radial bond stresses. W. H. Miller (JSR) 1253

Refined measurements of exhaust-plume-induced radar amplitude and phase noise. J. W. Williams and L. D. Smoot (JSR) 1268
Penetration of a high-velocity gas stream by a water jet. E. L. Geery and M. J. Margetts (JSR, EN) 79
Dynamic behavior of thrust-balance systems. L. H. Luehr and L. L. Bickford (JSR, EN) 92
Like and unlike impinging injection element droplet sizes. R. A. Dickerson (JSR, EN) 1306
An experimental technique for measurement of injector spray mixing. W. H. Nurick and S. D. Clapp (JSR, EN) 1312
Comparison of predicted and measured low-density plume impingement effects. L. M. Shaw and R. S. Hickman (JSR, EN) 1338
A realistic measure of combustion efficiency. David M. Adams (AIAA J, TN) 1398
Analysis of air backflow and pressurization characteristics in the nuclear exhaust system duct. B. Misra, R. S. Fairall, and B. Mandell (JSR, EN) 1454

THERMOPHYSICS AND THERMOCHEMISTRY

Atomic, Molecular, and Plasma Properties

Transport coefficients of partially ionized krypton and xenon. R. S. Devoto (AIAA J) 199
A conductivity probe for tenuous plasmas. Fred N. Holmquist (AIAA J) 205
Determination of thermodynamic properties with optical cross-correlation methods. F. R. Krause, W. O. Davies, and M. W. P. Cann (AIAA J) 587
Criticality studies of a nuclear light bulb engine. Thomas S. Latham (JSR) 1148
Propellant condensation on surfaces near and electric rocket exhaust. Thaine W. Reynolds and Edward A. Richley (JSR) 1155
Refined measurements of exhaust-plume-induced radar amplitude and phase noise. J. W. Williams and L. D. Smoot (JSR) 1268
Spectroscopic temperature measurements of shock-heated helium. Thomas Garland McRae Jr. (AIAA J, TN) 350
Optimum discrete approximation of the Maxwell distribution. J. G. Laframboise and A. D. Stauffer (AIAA J, TN) 520
——Comment on "Optimum discrete approximation of the Maxwell distribution." D. P. Giddens and A. B. Huang (AIAA J, TC) 2190
——Reply by authors to A. B. Huang and D. P. Giddens. J. G. Laframboise and A. D. Stauffer (AIAA J, TC) 2191
Plasma-transport property correlation using ionization fraction. E. J. Roschke (AIAA J, TN) 552
Electron-beam rotational temperature measurements including the effect of secondary electrons. D. C. Lillicrap and J. K. Harvey (AIAA J, TN) 980
Formulas for the thermodynamic properties of dense nitrogen. K. R. Enkenhus and S. Culotta (AIAA J, TN) 1187
Emission spectra of atmospheric gases excited by an electron beam. David J. McCaa and Dietmar E. Rothe (AIAA J, TN) 1648
Production of free sodium atoms for the spectrum-line reversal technique. Michael J. Lewis, Michael J. Teague, David J. Malcolme-Lawes, and Leonard Bernstein (AIAA J, TN) 1798
Comment on "Effects of a dynamic gas on breakdown potential" Bert Zauderer (AIAA J, TC) 2189
——Reply by author to B. Zauderer. Jack A. Gardner (AIAA J, TC) 2190

Liquid and Solid Thermophysical Properties

Evaluation of internal heat-transfer coefficients for impingement-cooled turbine airfoils. Raymond E. Chupp, Harold E. Helms, Peter W. McFadden, and Tony R. Brown (JA) 203
Transient behavior of infiltrated composites during melt layer formation. Maurice R. Berry Jr., Martin Crawford, Frederick B. Gessner (JSR) 1299
Evaluation of a polyurethane foam for ablative protection at low heating rates. Ronald B. Pope, Salvatore R. Riccitiello, and John A. Parker (JSR, EN) 74
Equation of state of polydiethylene glycol-bis-allyl carbonate. Joseph G. Berke and Leslie B. Seely (AIAA J, TN) 985
Formulas for the thermodynamic properties of dense nitrogen. K. R. Enkenhus and S. Culotta (AIAA J, TN) 1188
An estimate of the melting point of ammonium perchlorate. Herman F. Cordes (AIAA J, TN) 1193

Material Ablation

Entry vehicles for space programs. J. D. Stewart and D. H. Greenshields (JSR, SA) 1089
Effect of pyrolysis-gas chemical reactions on surface recession of charring ablators. Roy M. Wakefield, John H. Lundell, and Robert R. Dickey (JSR) 122
Thermal and ablative lag induced by a periodic heat input. R. J. Nichols and M. Sichel (AIAA J) 139
Prediction of nozzle material performance for NASA's 260 SL-3 motor. H. L. Moody and F. C. Price (JSR) 273
Evaluation of concepts for reuse of large booster nozzles. Edgar G. Parks Jr. and Richard L. Bailey (JSR) 577
Effect of ablation on the dynamics of spinning re-entry vehicles. A. P. Waterfall (JSR) 1038
Atmospheric entry into Jupiter. Michael E. Tauber (JSR) 1103
Transient behavior of infiltrated composites during melt layer formation. Maurice R. Berry Jr., Martin Crawford, and Frederick B. Gessner (JSR) 1299
Surface ablation patterns: A phenomenology study. A. L. Laganelli and D. E. Nestler (AIAA J) 1319
Application of photographic pyrometry to ablation models. Reginald J. Exton (AIAA J) 2262
Evaluation of a polyurethane foam for ablative protection at low heating rates. Ronald B. Pope, Salvatore R. Riccitiello, and John A. Parker (JSR, EN) 74
Experimental evaluation of polyurethane foam composites for low-heating-rate thermal protection. Ronald B. Pope, Salvatore R. Riccitiello, and John A. Parker (JSR, EN) 506
Discontinuous supersonic flow past an ablating wavy wall G. R. Inger (AIAA J, TN) 762
Radiation absorption effects on heating loads encountered during hyperbolic entry. C. D. Engel and L. W. Spradley (JSR, EN) 764
Experiments on the use of dry ice ablating wind-tunnel models. David L. Kohlman and Richard W. Richardson (JSR, EN) 1061
Laser-induced teflon char. W. Brandkamp, A. DeCecco, and J. Hanson (JSR, EN) 1087
Evaluation of a quartz-fiberfrax heat shield at high radiative heating rates. G. F. Greenwald and V. A. Corea (JSR, EN) 1200
Ablative materials for controlled high regression rates in rocket motors. H. O. Davis and H. M. Evensen (JSR, EN) 1334
Ablation effects on the Apollo afterbody heat transfer. George Lee (AIAA J, TN) 1616
Origin of striations on ablative materials. Harold Mirels (AIAA J, TN) 1813
Effect of angle-of-attack oscillation on the stability of liquid films. Ali Hasan Nayfeh (AIAA J, TN) 2026
Surface recession of phenolic nylon in low-density arc-heated air. John J. Bertin, William D. Conine, and Michael J. Nipper (AIAA J, TN) 2163
Particle removal in the ablation of artificial graphite. Howard G. Maahs and David R. Schryer (AIAA J, TN) 2178

Heat Conduction

Melting of a finite paraffin slab as applied to phase-change thermal control. P. R. Pujado, F. J. Stermole, and J. O. Golden (JSR) 280
On the variational principles for the heat conduction problem. Pawel Rafalski and Wiktor Żyszkowski (AIAA J) 606
Effective thermal conductivity parallel to the laminations, and total conductance of multilayer insulation. John G. Androulakis and Robert L. Kosson (JSR) 841
Heat conduction through fins with nonadiabatic tips. Y. S. Lou (JSR, EN) 1182
Thermal resistance of bolted or screwed sheet metal joints in a vacuum. E. Veilleux and M. Mark (JSR, EN) 339
Experimental evidence of thermal resistance at soldered joints. M. Michael Yovanovich and M. Tuarze (JSR, EN) 855
Numerical solutions of the unsteady heat equation. Chiang-Fang Lo (AIAA J, TN) 973
Temperature distribution in a porous surface. Paul A. Libby (AIAA J, TN) 1206
Asymptotic solutions for heat conduction in radiating shells subject to discontinuous solar flux. Gregory J. Sova and Norman D. Malmuth (AIAA J, TN) 1631
Analysis of lateral conduction and radiation along two parallel long plates. C. L. Tien, P. S. Jagannathan, and B. F. Armaly (AIAA J, TN) 1806
Comments on "Heat conduction in a bounded, anisotropic medium" W. D. Pilkey (AIAA J, TC) 380

Radiation and Radiative Heat Transfer

An engineering survey of radiating shock layers. John D. Anderson Jr. (AIAA J, SA) 1665
Measurements of the total radiant intensity of air. Allen D. Wood, Hiroshi Hoshizaki, J. C. Andrews, and K. H. Wilson (AIAA J) 130
Computer program to predict heat transfer through glass. A. A. Fowle, P. F. Strong, D. F. Comstock, and C. Sox (AIAA J) 478
A thick gas model near boundaries. Vedat S. Arpaci and Poul S. Larsen (AIAA J) 602
Temperature distribution and curvature produced in long solid cylinders in space. S. Sikka, M. Iqbal, and B. D. Aggarwala (JSR) 911
Simulation of Venus atmospheric entry by Earth re-entry. Joseph M. Spiegel, Fred Wolf, and Dale W. Zeh (JSR) 1030
Optimization of steady-state thermal design of space radiators. J. L. Thurman (JSR) 1114
Radiative transfer in the low Reynolds number, blunt-body stagnation region at hypersonic speeds. J. T. C. Liu and E. Sogame (AIAA J) 1273
Radiation transport for stagnation flows including effects of lines and ablation layers. Jin H. Chin (AIAA J) 1310

Application of the method of parametric differentiation to radiative gasdynamics. Martin C. Jischke and Judson R. Baron (AIAA J) 1326
Simulation of total equilibrium shock-layer radiation for three typical entry body shapes. H. B. Dyner and W. G. Reinecke (AIAA J) 1561
Mercury cadmium telluride as a 1–20 μm wavelength infrared detector for space applications. Richard D. Packard (AIAA J) 1570
An improved differential approximation for radiative transfer with spherical symmetry. S. C. Traugott (AIAA J) 1825
Formulation of two-dimensional radiant heat flux for absorbing-emitting plane layer with nonisothermal bounding walls. Y. Taitel (AIAA J) 1832
NO_2 chemiluminescent wake radiation. Richard L. Schapker and Morton Camac (AIAA J) 2254
High-temperature reflectance measurements with the paraboloid reflectometer. B. E. Newnam, E. E. Luedke, and J. T. Bevans (JSR, EN) 72
Angular-moment-averaged absorption coefficients in nongrey radiation. Kuei-yuan Chien (AIAA J, TN) 183
Radiative heat flux for an optically thin gas. S. T. Wu (AIAA J, TN) 727
Radiation absorption effects on heating loads encountered during hyperbolic entry. C. D. Engel and L. W. Spradley (JSR, EN) 764
Radiant heating of a solid spherical satellite. M. Iqbal and B. D. Aggarwala (AIAA J, TN) 784
An investigation of radiative heat transfer in participating media. F. Shahrokhi and P. Wolf (AIAA J, TN) 791
Analysis of a belt-type heat transport device. T. J. McGean (JSR, EN) 947
Surface roughness effects on equilibrium temperature. R. G. Hering and T. F. Smith (JSR, EN) 955
Effect of the Moon's infrared emission on thermal calculations. James K. Harrison (JSR, EN) 1059
Evaluation of a quartz-fiberfrax heat shield at high radiative heating rates. G. F. Greenwald and V. A. Corea (JSR, EN) 1200
Surface roughness effects on radiant heat transfer. R. G. Hering and T. F. Smith (JSR, EN) 1465
Selection of spacecraft optical coatings for temperature control. F. A. Costello, T. P. Harper, R. Kidwell, and G. L. Schrenk (JSR, EN) 1469
Numerical studies in semigray radiative transfer. David Finkleman (AIAA J, TN) 1602
Configuration factors between a small plane and a large sphere. R. P. Heinisch and R. N. Schmidt (AIAA J, TN) 1622
Stagnation region heat transfer with nongray gas subjected to external radiation. J. Q. Lilly and S. T. Wu (AIAA J, TN) 1800
Analysis of lateral conduction and radiation along two parallel long plates. C. L. Tien, P. S. Jagannathan, and B. F. Armaly (AIAA J, TN) 1806
Solid-propellant flame zone radiation. David W. Blair and William Lake (AIAA J, TN) 1808
Spectral and integrated emittance of ablation chars and carbon. R. Gale Wilson and Cary R. Spitzer (AIAA J, TN) 2140
View factor from conical surface by contour integration. J. B. Urquhart (AIAA J, TN) 2157
A further note on shock-tube measurements of end-wall radiative heat transfer in air. Paul R. Knott, Leland A. Carlson, and Robert M. Nerem (AIAA J, TN) 2170
A numerical solution of the conduction problem with radiating surface. Carolyn Mason (AIAA J, TN) 2182
Comment on "Convective and radiative heat transfer to an ablating body" H. T. Yang (AIAA J, TC) 1656
——Reply by authors to H. T. Yang. H. Hoshizaki and L. E. Lasher (AIAA J, TC) 1656
Comment on "Radiation from conical surfaces with nonuniform radiosity" D. K. Edwards (AIAA J, TC) 1656
——Reply by author to D. K. Edwards. Richard P. Bobco (AIAA J, TC) 1659

Thermal Surface Properties

Theoretical and practical implication of the bidirectional reflectance of spacecraft surfaces. John T. Neu and R. S. Dummer (AIAA J) 484
Spectral emissivity measurements of ablating phenolic graphite. John H. Chang and George W. Sutton (AIAA J) 1110
Propellant condensation on surfaces near an electric rocket exhaust. Thaine W. Reynolds and Edward A. Richley (JSR) 1155
Thermal contact resistance of selected low-conductance interstitial materials. Leroy S. Fletcher, Paul A. Smuda, and Donald A. Gyorog (AIAA J) 1302
Angular distribution of visible and near IR radiation reflected from CO_2 cryodeposits. A. M. Smith, K. E. Tempelmeyer, P. R. Muller, and B. E. Wood (AIAA J) 2274
High-temperature reflectance measurements with the paraboloid reflectometer. B. E. Newnam, E. E. Luedke, and J. T. Bevans (JSR, EN) 72
Surface roughness effects on equilibrium temperature. R. G. Hering and T. F. Smith (JSR, EN) 955
Surface roughness effects on radiant heat transfer. R. G. Hering and T. F. Smith (JSR, EN) 1465
Selection of spacecraft optical coatings for temperature control. F. A. Costello, T. P. Harper, R. Kidwell, and G. L. Schrenk (JSR, EN) 1469

Thermochemistry and Chemical Kinetics

Effects of pyrolysis-gas chemical reactions on surface recession of charring ablators. Roy M. Wakefield, John H. Lundell, and Robert R. Dickey (JSR) 122
Photometric methods for determining radical concentrations in hot gases in nozzles. C. J. Halstead and D. R. Jenkins (AIAA J) 318
A liquid rocket performance model based on vaporization interactions. D. L. Kors, L. B. Bassham, and R. E. Walker (JSR) 1133
Experimental and analytical study of H_2-air reaction kinetics using a standing-wave normal shock. Roger A. Strehlow and Philip M. Rubins (AIAA J) 1335
Selection of recombination rate constants for H-F-O Reactions. G. S. Bahn, S. S. Cherry, P. I. Gold, R. C. Mitchell, and J. Q. Weber (AIAA J, TN) 181
A modified model for vibration-dissociation coupling phenomena. N. M. Reddy (AIAA J, TN) 1179
Kinetics of complex molecules in aerodynamic flows. George Emanuel (AIAA J, TN) 1208
Nonequilibrium combustion and nozzle flow in propellant performance. M. C. Branch and R. F. Sawyer (JSR, EN) 1322
Collisional ionization and recombination rates of atomic nitrogen. Chul Park (AIAA J, TN) 1653
Evaluation of electron quench additives in a subsonic air arc channel. K. E. Starner (AIAA J, TN) 2357
Vibrational energy exchange on N_2-O_2 collision. Goro Kamimoto and Hiroyuki Matsui (AIAA J, TN) 2358

Thermal Modeling and Experimental Thermal Simulation

Selection of spacecraft optical coatings for temperature control. F. A. Costello, T. P. Harper, R. Kidwell, and G. L. Schrenk (JSR, EN) 1469

FLUID DYNAMICS

Boundary Layers and Convective Heat Transfer

Design criteria for film cooling for small liquid-propellant rocket engines. R. Carl Stechman, Joelee Oberstone, and J. C. Howell (JSR) 97
Laminar boundary-layer control by combined blowing and suction in the presence of surface roughness. G. F. Anderson, V. S. Murthy, and S. P. Sutera (JH) 145
Similar solutions of the boundary-layer equations for a non-Newtonian fluid. E. R. Thompson (JH) 151
Heat-transfer and pressure analysis of rocket exhaust impingement on flat plates and curved panels. William C. Rochelle and Douglas E. Kooker (JSR) 248
Experimental observation of transition of the hypersonic boundary layer E. J. Softley, B. C. Graber, and R. E. Zempel (AIAAJ) 257
Effect of gaseous injection on the hypersonic flow around transpiration-cooled bodies. G. R. Inger and S. Sayano (JSR) 649
Active cooling heat protection. M. J. Brunner (JSR) 661
Magnetic hypersonic flow near the stagnation point at low Reynolds number. S. Y. Chen (JSR) 872
Transitional boundary-layer considerations for the heating analyses of lifting re-entry vehicles. M. Masaki and J. K. Yakura (JSR) 1048
Saturn V/S-IC stage base thermal environment. C. R. Mullen and R. L. Bender (JSR) 1138
Characteristics of atmospheric turbulence as related to wind loads on tall structures. George H. Fichtl, John W. Kaufman, and William W. Vaughan (JSR) 1396
Effect of boundary-layer transition on vehicle dynamics. Lars Eric Ericsson (JSR) 1404
"Power law" profiles in thermally stratified shear flows. Hsing Chuang and Jack E. Cermak (JA, EN) 71
Heat-transfer telemetry for models using thermocouple sensors. Dean R. Harrison and William K. Lockman (JSR, EN) 76
A new solution for the skin-friction drag on a cylinder. E. P. Russo and O. A. Arnas (JA, EN) 76
Turbulent skin-friction coefficient and momentum thickness in adverse pressure gradient. C. Y. Liu (JA, EN) 78
Skin friction of compliant surfaces with foamed material substrate. Roger L. Smith and Edward F. Blick (JH, EN) 100
Criterion for tolerable roughness in a laminar boundary layer. J. C. Gibbings and D. J. Hall (JA, EN) 171
Skin-friction formula for tapered and delta wings. Arne Barkhem (JA, EN) 284
Quasi-steady compressible flow with heat transfer in accelerating nozzles and ducts. W. W. L. Chen, R. I. Vachon, and D. F. Dyer (JSR, EN) 308
Analysis of heat transfer in evaporative-transpiration - cooled system. Ji Wu Yang (JSR, EN) 759
Compliant surface drag as a function of speed. Humphrey H. Chu and Edward F. Blick (JSR, EN) 763

Comment on "Investigation of heating transfer and of suction for tripping boundary layers." W. J. McCroskey (JA, TC) 285
——Reply by authors to W. J. McCroskey. Tuncer Cebeci and A. M. O. Smith (JA, TC) 286

Boundary Layers and Convective Heat Transfer—Laminary

Unsteady compressible laminar boundary-layer flow over a flat plate. Wen-Jei Yang and Harng-Sen Huang (AIAA J) 100
Supersonic laminar boundary layer along a two-dimensional adiabatic curved ramp. Denny R. S. Ko and Toshi Kubota (AIAA J) 298
Further theoretical investigation of the laminar boundary layer over rotating blades and yawed infinite wings. Z. U. A. Warsi (AIAA J) 687
Binary boundary layers on sharp cones in low-density supersonic and hypersonic flow. Arloe W. Mayne Jr., G. E. Gilley, and Clark H. Lewis (AIAA J) 699
Electron number density distribution in the laminar air boundary layer on sharp cones. F. G. Blottner (AIAAA J) 1064
Hypersonic laminar boundary layer approaching the base of a slender body. G. R. Olsson and A. F. Messiter (AIAA J) 1261
Hypersonic viscous interaction on sharp and blunt inclined plates. Joseph H. Kemp Jr. (AIAA J) 1280
Application of a quasi-steady stability model to periodic boundary-layer flows. Henry J. Obremski and Mark V. Morkovin (AIAA J) 1298
Hypersonic interactions near sharp leading edges. S. G. Rubin, T. C. Lin, M. Pierucci, and S. Rudman (AIAA J) 1744
Flow and heat transfer in laminar boundary layers with swirl. L. H. Back (AIAA J) 1781
Sudden acceleration of a laminar boundary layer by a moving belt. A. Mager (AIAA J) 2247
Viscous shock layer at the stagnation point with nonequilibrium air chemistry. F. G. Blottner (AIAA J) 2281
Effect of tip blunting on cone laminar heat transfer. E. Vallerani (AIAA J, TN) 145
Hypersonic strong interaction on flat plate with uniform blowing. W. S. King (AIAA J, TN) 146
Normal injection in a three-dimensional laminar boundary layer. Egon Krause, E. H. Hirschel, and Th. Bothmann (AIAA J, TN) 367
Correlation of mass injection drag data for slender cones at hypersonic speeds. B. J. Griffith and Herbert R. Little (AIAA J, TN) 525
High Prandtl number boundary layers with mass injection. E. R. Thompson (AIAA J, TN) 547
Loitsianskii's method for boundary layers with suction and injection. Y. Y. Chan (AIAA J, TN) 562
Further similar laminar-flow solutions. David F. Rogers (AIAA J, TN) 976
——Erratum: "Further similar laminar-flow solutions" David F. Rogers (AIAA J, TC) 2191
Locally similar hypersonic laminar boundary-layer error estimate. S. Keith Jackson Jr. (AIAA J, TN) 979
Stagnation-point heat transfer in arc-heated helium and argon. Ronald B. Pope (AIAA J, TN) 1159
Generalized series solutions of the boundary-layer equations. Ralph T. Cheng and Ching-Shi Liu (AIAA J, TN) 1183
Laminar boundary layers on slender paraboloids. Tuncer Cebeci, Tsung Y. Na, and George Mosinskis (AIAA J, TN) 1372
Free convection flows about inclined cylinders. S. B. Savage (AIAA J, TN) 1628
Physical flows with self-similar laminar boundary layers. Daniel Weiss (AIAA J, TN) 1792
Downstream cooling effectiveness of massive upstream transpiration from a slender cone. James C. Dunavant and James C. Mulligan (AIAA J, TN) 1796
Boundary-layer growth behind a plane wave. Chen-Chi Hsu (AIAA J, TN) 1810
Laminar Reynolds analogy factor on a sharp flat plate at Mach 10.4. Howard W. Stone (AIAA J, TN) 2176
Laminar boundary layers with zero wall shear, large suction, and strong adverse pressure gradients. D. R. Kassoy and P. A. Libby (AIAA J, TN) 2360
Comment on "Solution of a three-dimensional boundary-layer flow with separation." Egon Krause (AIAA J, TC) 575
——Reply by author to E. Krause. Harry A. Dwyer (AIAA J, TC) 576
Comment on "An investigation of the effect of suction on hypersonic laminar boundary-layer separation." H. Harvey Album (AIAA J, TC) 798
——Reply by authors to H. H. Album. K. O. W. Ball and R. H. Korkegi (AIAA J, TC) 800

Boundary Layers and Convective Heat Transfer—Turbulent

An experimental investigation of hypersonic turbulent boundary layers in adverse pressure gradient. Walter G. Hoydysh and Victor Zakkay (AIAA J) 105
On a finite-difference solution for the constant-property turbulent boundary layer. Richard H. Pletcher (AIAA J) 305
Approximate calculation of Reynolds analogy for turbulent boundary layer with pressure gradient. N. Tetervin (AIAA J) 1079
Calculation of turbulent boundary layers on rough surfaces in pressure gradient. F. A. Dvorak (AIAA J) 1752
Experiments in supersonic turbulent flow with large distributed surface injection. F. L. Fernandez and E. E. Zukoski (AIAA J) 1759
Temperature laws for a turbulent boundary layer with injection and heat transfer. L. K. Isaacson and S. J. AlSaji (AIAA J, TN) 157
Mean shear in a constant-pressure turbulent boundary layer. M. K. Bull (AIAA J, TN) 359
Comment on "Inner region of transpired turbulent boundary layers." Roger L. Simpson (AIAA J, TN) 732
Hypersonic turbulent boundary-layer measurements using an electron beam. J. E. Wallace (AIAA J, TN) 757
Velocity fluctuation intensities in a hypersonic turbulent boundary layer. William D. Harvey and Dennis M. Bushnell (AIAA J, TN) 760
The drag of small protuberances immersed in a turbulent boundary layer. Frank W. Spaid (AIAA J, TN) 780
Skin friction in compressible turbulent boundary layers. K. Sheshagiri Hebbar and P. A. Paranjpe (AIAA J, TN) 793
Heat transfer to steps and cavities in hypersonic turbulent flow. D. E. Nestler, A. R. Saydah, and W. L. Auxer (AIAA J, TN) 1368
Turbulent skin friction on compliant surfaces. P. B. S. Lissaman and Gordon L. Harris (AIAA J, TN) 1625
Effective viscosity in a turbulent boundary layer. S. W. Chi and C. C. Chang (AIAA J, TN) 2032
Comments on "Compressible turbulent boundary-layer equations." P. Bradshaw (AIAA J, TC) 191
——Reply by author to P. Bradshaw. Stanley G. Rubin (AIAA J, TC) 191
Erratum "Boundary layer on the wall of a curved converging channel." Dale B. Taulbee and Hirabhai N. Patel (AIAA J, TC) 192

Boundary Layer Stability and Transition

Orbital experimentation for advancing cryogenic technology. J. D. Schweikle, G. O. Fredrickson, and P. L. Klevatt (JSR) 257
A computer study of an analytical model of boundary-layer transition. Coleman duP. Donaldson (AIAA J) 271
Radiated aerodynamic noise effects on boundary-layer transition in supersonic and hypersonic wind tunnels. S. R. Pate and C. J. Schueler (AIAA J) 450
Experiments on roughness effects on cone boundary-layer transition up to Mach 16. Jack D. Whitfield and F. A. Iannuzzi (AIAA J) 465
Unusual boundary-layer transition results on cones in hypersonic flow. George G. Mateer and Howard K. Larson (AIAA J) 660
Experiments on control of supersonic transitional flow separation using distributed suction. Samuel R. Pate (AIAA J) 847
Transitional boundary-layer considerations for the heating analyses of lifting re-entry vehicles. M. Masaki and J. K. Yakura (JSR) 1048
Stability theory as a guide to the evaluation of transition data. Eli Reshotko (AIAA J) 1086
Effect of boundary-layer transition on vehicle dynamics. Lars Eric Ericsson (JSR) 1404
Acoustic technique for detection of flow transition on hypersonic re-entry vehicles. Hanno H. Heller (AIAA J) 2227
Flow of a non-Newtonian fluid past wedges with wall mass injection. Kun Ha Kim and Arsev H. Eraslan (JH, EN) 57
Effects of polymer addition on friction in a 10-in.-diam pipe. R. H. Forester, R. E. Larson, J. W. Hayden, and J. M. Wetzel (JH, EN) 59
The hypersonic slipper bearing—A test track problem. R. H. Korkegi and R. A. Briggs (JSR, EN) 210
Laminar-sublayer thickness in compressible turbulent boundary layers. K. Sheshagiri Hebbar and P. A. Paranjpe (JA, EN) 470
Hypersonic turbulent boundary-layer separations at high Reynolds numbers. Arnold Polak and Chris A. Kalivretenos (JSR, EN) 954
Stability of a liquid film over a rotating cylinder. Ali Hasan Nayfeh (AIAA J, TN) 1812
Hypersonic boundary-layer transition on ablating and nonablating cones. Michael C. Fischer (AIAA J, TN) 2037
Effect of varying wall temperature and total temperature on transition Reynolds number at Mach 6.8. Dal V. Maddalon (AIAA J, TN) 2355

Subsonic and Transonic Flow

Effect of a wing on its tip vortex. Terence L. Grow (JA) 37
Transformations for infinite regions and their application to flow problems. Jerry A. Sills (AIAA J) 117
——Comments on "Transformations for infinite regions and their applications to flow problems." J. P. Crenshaw and J. E. Hubbartt (AIAA J, TC) 2189
Wind-tunnel wall interference studies at high subsonic speeds. J. R. Ongarato (JA) 144
Measurement of drag from interaction of jet exhaust and airframe. Donald Chamberlain (JA) 160
Application of statistical parameters in defining inlet airflow dynamics. Leonard C. Kostin and Sidney D. Millstone (JA) 196
A doublet-lattice method for calculating lift distributions on oscillating surfaces in subsonic flows. Edward Albano and William P. Rodden (AIAA J) 279

——Errata: "Doublet-lattice method for calculating lift distributions on oscillating surfaces in subsonic flows" E. Albano and W. P. Rodden (AIAA J, TC) 2192
Quasi-steady compressible flow with heat transfer in accelerating nozzles and ducts. W. W. L. Chen, R. I. Vachon, and D. F. Dyer (JSR) 308
Effects of vortex separation on the lift distribution on bodies of elliptic cross section. Leon H. Schindel (JA) 537
On the singularity method of subsonic lifting-surface theory. Siegfried Wagner (JA) 549
Coanda flow over a circular cylinder with injection normal to the surface. Gary W. Felsing and Paul S. Moller (AIAA J) 842
Second-order theory for steady or unsteady subsonic flow past slender lifting bodies of finite thicknesses. James D. Revell (AIAA J) 1070
Transonic swirling flow. W. S. Lewellen, W. J. Burns, and H. J. Strickland (AIAA J) 1290
Dynamic stability of high-drag planetary entry vehicles at transonic speeds. Wayne J. Marko (JSR) 1390
A new solution for the skin-friction drag on a cylinder. E. P. Russo and O. A. Arnas (JA, EN) 76
Turbulent skin-friction coefficient and momentum thickness in adverse pressure gradient. C. Y. Liu (JA, EN) 78
Thin airfoil in nonuniform parallel streams. L. Ting and C. H. Liu (JA, EN) 173
Stability of density stratified rotating flows. S. Leibovich (AIAA J, TN) 177
A comparison between transonic wind-tunnel and full-scale store separation characteristics. J. F. Reed and W. H. Curry (JA, EN) 281
Flow of a circular jet into a cross flow. P. T. Wooler (JA, EN) 283
Skin-friction formula for tapered and delta wings. Arne Barkhem (JA, EN) 284
Initial phase of parachute inflation. Kenneth E. French (JA, EN) 376
An algorithm for the induced velocity of curved vortex lines. Thomas Arthur McMahon (JA, EN) 382
Unsteady solution of the flowfield over concave bodies. Ricardo A. Bastianon (AIAA J, TN) 531
Compliant surface drag as a function of speed. Humphrey H. Chu and Edward F. Blick (JSR, EN) 763
Pressure distribution in inviscid transonic flow past axisymmetric bodies ($M_{\infty} = 1$). K. Leelavathi and N. R. Subramanian (AIAA J, TN) 1362
Numerical integration of a double integral with Cauchy-type singularity. Charles C. S. Song (AIAA J, TN) 1389
Comment on "Numerical lifting-surface theory—problems and progress" Stavros Tsakonas (AIAA J, TC) 1661
——Reply by authors to S. Tsakonas. Mårten T. Landahl and Valter J. E. Stark (AIAA J, TC) 1661

Supersonic and Hypersonic Flow

Sonic boom theory. R. Seebass (JA, SA) 177
Aerodynamics of bodies of revolution in coning motion. Murray Tobak, Lewis B. Schiff, and Victor L. Peterson (AIAA J) 95
Surface geometry of three-dimensional inviscid hypersonic flows. Donald C. Leigh and Bruce B. Ross (AIAA J) 123
Study of a family of supersonic inlet systems. Norman E. Sorensen, Donald B. Smeltzer, and Robert W. Cubbison (JA) 184
Investigation of the leeward side of a delta wing at hypersonic speeds. E. J. Cross Jr. and W. L. Hankey (JSR) 185
Heat-transfer and pressure analysis of rocket exhaust impingement on flat plates and curved panels. William C. Rochelle and Douglas E. Kooker (JSR) 248
A class of three-dimensional, optimum hypersonic wings. J. D. Cole and Tse-F'ou Zien (AIAA J) 264
Reduction of sonic boom by azimuthal redistribution of overpressure. A. R. George (AIAA J) 291
Influence of drag on the mission performance of hypersonic aircraft. Lionel L. Levy Jr. (JA) 326
Experimental aerodynamics of a rotor entry vehicle. Alan D. Levin and Ronald C. Smith (JA) 330
Maximum lift-to-drag ratio airfoils at moderate supersonic speeds. Angelo Miele and John N. Damoulakis (AIAA J) 471
Effect of gaseous injection on the hypersonic flow around transpiration-cooled bodies. G. R. Inger and S. Sayano (JSR) 649
Surface mass injection at supersonic and hypersonic speeds as a problem in turbulent mixing: Part I. Two-dimensional flow. Lester Lees and Robert L. Chapkis (AIAA J) 671
Flow over a finite plate with massive injection. P. D. Thomas (AIAA J) 681
Application of Godunov's method to blunt-body calculations. B. S. Masson, T. D. Taylor, and R. M. Foster (AIAA J) 694
Hypersonic flowfield effects on small delta-tail surfaces. Humes H. Hart (JSR) 866
Surface measurements on sharp flat plates and wedges in low-density hypersonic flow. R. J. Vidal and J. A. Bartz (AIAA J) 1099
Supersonic flow past a finite cone with large surface mass injection. T. D. Taylor, B. S. Masson, and R. M. Foster (AIAA J) 1268
Similarity solutions to the massive blowing problem. James Wallace and Nelson Kemp (AIAA J) 1517
Effects of lengthwise lift distribution on sonic boom of SST configurations. Antonio Ferri and Ahmed Ismail (AIAA J) 1538
Lower bounds for sonic booms in the midfield. A. R. George (AIAA J) 1542
Hypersonic low-Reynolds-number flow over a blunt body with mass injection. Sang-Wook Kang (AIAA J) 1546
Axisymmetric hypersonic flow with mass transfer and large transverse curvature. John Webster Ellinwood and Harold Mirels (AIAA J) 2049
Hypersonic laminar separation on a cone with slip flow. H. Harvey Album (AIAA J) 2057
Theory of laminar viscous-inviscid interactions in supersonic flow. John M. Klineberg and Lester Lees (AIAA J) 2211
Hypersonic interaction along a rectangular corner. R. J. Cresci, S. G. Rubin, C. T. Nardo, and T. C. Lin (AIAA J) 2241
A closed-form solution to oblique shock-wave properties. Vincent R. Mascitti (JA, EN) 66
Recent flight-test results in deploying a 20-ft-diam ribbon parachute. William B. Pepper (JA, EN) 74
Inviscid hypersonic flow past blunt bodies. Yon-Sun Chou (AIAA J, TN) 149
A Stokes-like region around a slightly yawed needle in the hypersonic strong-interaction regime. H. T. Iida and H. K. Cheng (AIAA J, TN) 163
Shoulder pressures for slender cone-afterbody combinations in hypersonic flow. T. D. Fiorino and M. L. Rasmussen (AIAA J, TN) 169
Axially symmetric bodies having a minimum pressure variation with Mach number. W. James Franks and Jack W. Headley (AIAA J, TN) 173
The lift and drag of axisymmetric bodies in Newtonian flow. J. Pike (AIAA J, TN) 185
Aerodynamics of randomly tumbling bodies. Andrzej Wortman (JSR, EN) 205
Effect of nose bluntness on hypersonic unsteady aerodynamics. Lars Eric Ericsson and Ira M. Scholnick (JSR, EN) 321
Simulation of the Apollo command module aerodynamics at high altitudes. D. E. Boyland and B. J. Griffith (JSR, EN) 334
New features of the method of integral relations for the blunt body problem. Jerry C. South Jr. (AIAA J, TN) 369
Correlation of mass injection drag data for slender cones at hypersonic speeds. B. J. Griffith and Herbert R. Little (AIAA J, TN) 525
Sharp cone drag measurements in a rarefied hypersonic flow. Michael H. Jones and John T. Miller (AIAA J, TN) 558
Limit case for supersonic inviscid flow in the corner of intersecting wedges. R. H. Korkegi (AIAA J, TN) 569
Hypersonic turbulent boundary-layer separations at high Reynolds numbers. Arnold Polak and Chris A. Kalivretenos (JSR, EN) 954
A simple formula for the shock polar. Lawrence L. Lee (AIAA J, TN) 985
Correlation of free-flight base pressure data for M = 4 to M = 19. J. M. Cassanto, N. S. Rasmussen, and J. D. Coats (AIAA J, TN) 1154
Simple formulas for unsteady pressure on slender wedges and cones in hypersonic flow. K. J. Orlik-Rückemann (JSR, EN) 1209

Nozzle and Channel Flow

Study of a family of supersonic inlet systems. Norman E. Sorensen, Donald B. Smeltzer, and Robert W. Cubbison (JA) 184
Application of statistical parameters in defining inlet airflow dynamics. Leonard C. Kostin and Sidney D. Millstone (JA) 196
Prediction of nozzle material performance for NASA's 260 SL-3 motor. H. L. Moody and F. C. Price (JSR) 273
Quasi-steady compressible flow with heat transfer in accelerating nozzles and ducts. W. W. L. Chen, R. I. Vachon, and D. F. Dyer (JSR) 308
Expansion of simulated storable propellants in a supersonic nozzle. Robert Friedman, Raymond E. Gaugler, and Erwin A. Lezberg (AIAA J) 1115

Theoretical analyses of electrothermal thrusters with supersonic heat addition. Harry I. Leon and William R. Mickelsen (JSR) 1362
Installed thrust vector for scarfed nozzles. Stanton Boraas and Robert L. Ashby (JSR) 1410
Performance of the aerobell extendible rocket nozzle. G. A. Hosack and R. R. Stromsta (JSR) 1416
Theoretical and experimental studies of ducted mixing and burning of coaxial streams. C. E. Peters, W. J. Phares, and T. H. M. Cunningham (JSR) 1435
An analytical and experimental investigation of swirling flow in nozzles. David J. Norton, B. W. Farquhar, and Joe D. Hoffman (AIAA J) 1992
Improvement of ejector-diffuser performance by reduction of backflow. Robert E. Anderson and Philip A. Graham (JA, EN) 73
Experimental data from underwater conical nozzles exhausting N_2 gas. John D. Ferguson (JH, EN) 200
Compressible flow processes involving area, friction, and total temperature change. E. William Beans (JSR, EN) 331
Time-dependent calculations for transonic nozzle flow. David Migdal, Kenneth Klein, and Gino Moretti (AIAA J, TN) 372
Incompressible flow through an asymmetric two-dimensional contraction. Gordon C. Oates and James L. Nash-Webber (AIAA J, TN) 542
Divergence losses for noncircular C-D nozzles, based on source flow. Helmut H. Korst and Robert A. White (JSR, EN) 637
Laminarization of a turbulent boundary layer in nozzle flow. L. H. Back, R. F. Cuffel, and P. F. Massier (AIAA J, TN) 730
Density field of directed free-molecular flow from an annulus. John W. Brook (JSR, EN) 755
Condensation and probe interference effects on planar expansion-deflection nozzle experiments. Thomas J. Mueller and Wayne P. Sule (JSR, EN) 857
Measurements of the decay of swirl in turbulent flow. L. Wolf, Jr., Z. Lavan, and A. A. Fejer (AIAA J, TN) 971
Nonequilibrium combustion and nozzle flow in propellant performance. M. C. Branch and R. F. Sawyer (JSR, EN) 1322
Approximate analysis of nonisentropic flow in conical nozzles. Joe D. Hoffman (JSR, EN) 1329
Transonic flowfield in a supersonic nozzle with small throat radius of curvature. R. F. Cuffel, L. H. Back, and P. F. Massier (AIAA J, TN) 1364
Transonic flow in small throat radius of curvature nozzles. J. R. Kliegel and J. N. Levine (AIAA J, TN) 1375
Numerical solution of subsonic compressible flow at two-dimensional inlets. Ronald H. Howell and Edward D. Spong (AIAA J, TN) 1392
Analysis of the air backflow and pressurization characteristics in the nuclear exhaust system duct. B. Misra, R. S. Fairall, and B. Mandell (JSR, EN) 1454
Computation of axisymmetric contractions. Hartmut H. Bossel (AIAA J, TN) 2017
An approximate solution for the flow far downstream of condensation in a hypersonic nozzle. P. M. Sherman and D. D. McBride (AIAA J, TN) 2161
Nozzle boundary-layer displacement thickness at Mach numbers 30 to 70. Charles G. Miller (AIAA J, TN) 2165
Errata: "General solution for two-dimensional couple-stress elasticity" Charles W. Bert and Franklin J. Appl (AIAA J, TC) 384
Comment on "Transonic flow in unconventional nozzles" D. B. Morden and B. W. Farquhar (AIAA J, TC) 1661

Rarefied Flows

Free-molecule flow past a cone. J. Parker Elliott and Maurice L. Rasmussen (AIAA J) 78
Recondensation from a particle-vapor source flow into vacuum. L. A. Glenn (AIAA J) 593
Evaporation of high-velocity particles in free-molecule flow. J. F. Friichtenicht (AIAA J) 598
Binary boundary layers on sharp cones in low-density supersonic and hypersonic flow. Arloe W. Mayne Jr., G. E. Gilley, and Clark H. Lewis (AIAA J) 699
Magnetic hypersonic flow near the stagnation point at low Reynolds number. S. Y. Chen (JSR) 872
Surface measurements on sharp flat plates and wedges in low-density hypersonic flow. R. J. Vidal and J. A. Bartz (AIAA J) 1099
Free-molecular drag for flow along a concave cylindrical surface. J. Daniel Stewart (AIAA J) 1530
Hypersonic low-Reynolds-number flow over a blunt body with mass injection. Sang-Wook Kang (AIAAJ) 1546
Hypersonic laminar separation on a cone with slip flow. H. Harvey Album (AIAA J) 2057
Rarefied flow past a sphere. Lee H. Sentman and Krishnamurty Karamcheti (AIAA J, TN) 161
Drag of a small body in the wake of a large satellite. Richard A. Oman (JSR, EN) 329
Sharp cone drag measurements in a rarefied hypersonic flow. Michael H. Jones and John T. Miller (AIAA J, TN) 558
Density field of directed free-molecular flow from an annulus. John W. Brook (JSR, EN) 755
Near free-molecule heat transfer and density distribution between concentric spheres. John C. Havekotte and George S. Springer (AIAA J, TN) 782
Unsteady spherically symmetric expansion of a fixed mass of gas into vacuum. R. E. Grundy and D. R. Thomas (AIAA J, TN) 967
Properties of low-density freejets measured using molecular-beam techniques. Sam S. Fisher and Eldon L. Knuth (AIAA J, TN) 1174
Comparison of predicted and measured low-density plume impingement effects. L. M. Shaw and R. S. Hickman (JSR, EN) 1338
Rarefaction in underexpanded flows. James Stark Draper and Jacques A. F. Hill (AIAA J, TN) 1400
Experimental cylinder drag data for hypersonic, rarefied flow. Charles L. Sharpe (AIAA J, TN) 1611
Monte Carlo calculation of free molecule flow over concave spherical surfaces. Chien Fan (AIAA J, TN) 1803
Entrance configuration effects on tube flow in the transition regime. James F. Marchman III (AIAA J, TN) 2147
Steady cylindrical expansion of a monatomic gas into vacuum. R. E. Grundy (AIAA J, TN) 2349
A theoretical model for the sharp flat plate in rarefied hypersonic flow. William B. Bush (AIAA J, TC) 189
Comment on "Rotational relaxation in hypersonic low-density flows" R. H. Edwards, H. K. Cheng, R. S. Hickman, and P. B. Scott (AIAA J, TC) 378
——Reply by author to Edwards et al. Duvvuri Tirumalesa (AIAA J, TC) 378
Erratum: "Conical nozzle flow with velocity slip and temperature jump." James C. Williams III (AIAA J, TC) 384
Comment on "Drag coefficient of small spherical particles." Frederick L. Schuyler (AIAA J, TC) 573
——Reply by author to F. L. Schuyler. J. A. Nicholls (AIAA J, TC) 574

Multiphase Flows

Development of laser-Doppler particle sensor for the measurement of velocities in rocket exhausts. Howard L. Morse, Barclay J. Tullis, Howard S. Seifert, and Wayne Babcock (JSR) 264
Aerodynamic shattering of liquid drops. A. A. Ranger and J. A. Nicholls (AIAA J) 285
Stationary radial source flow of liquid particles into vacuum. L. A. Glenn (AIAA J) 443
Recondensation from a particle-vapor source flow into vacuum. L. A. Glenn (AIAA J) 593
Evaporation of high-velocity particles in free-molecule flow. J. F. Friichtenicht (AIAA J) 598
Direct current MHD generators with variable conductivity, velocity, and magnetic field. John J. Roberts, W. Roy Wessel, and Michael Petrick (JSR) 729
Theoretical analyses of electrothermal thrusters with supersonic heat addition. Harry I. Leon and William R. Mickelsen (JSR) 1362
Pitot probe measurements of mercury drop growth rates. G. E. Merritt (AIAA J) 1774
Measurement of mean drop sizes for sprays from superheated waterjets. Paul B. Gooderum and Dennis M. Bushnell (JSR, EN) 197
Experimental studies of drop breakup in hypersonic flow. John L. Beal (JSR, EN) 337
Time-of-flight measurement of particle velocity. A. J. Laderman, C. H. Lewis, and S. R. Byron (AIAA J, TN) 556
Analysis of two-phase impingement from a cryogen vented in orbit. E. A. Evans and A. B. Walburn (JSR, EN) 1189
Helium injection to reduce resonant frequencies in propellant lines. Brantley R. Hanks and David G. Stephens (JSR, EN) 1202
Gas effects in attitude control systems. W. Juran, E. B. Zwick, and R. L. Moffett (JSR, EN) 1310
Hydrogen bubble flow visualization at low Reynolds numbers. Frederick W. Roos and William W. Willmarth (AIAA J, TN) 1635

Reactive Flows

Electron and ion distributions in chemical nonequilibrium boundary-layer flows. Kenneth Wang (AIAA J) 616
Electron number density distribution in the laminar air boundary layer on sharp cones. F. G. Blottner (AIAA J) 1064
Several new research results in the fields of flows with energy supply. A. W. Quick (AIAA J) 1410
Hypersonic flow of a diatomic dissociating gas with power-law shock R. X. Meyer (AIAA J) 1966
Role of charge separation and pressure diffusion in the gascap of entry objects. John T. Howe and Yvonne S. Sheaffer (AIAA J) 1971
A simplified statistical model of turbulent, chemically reacting shear flows. Paul M. Chung (AIAA J) 1982
Measurement of electron temperature and number density in shock-tunnel flows. Part II: $NO^+ + e^-$ dissociative recombination rate in air. Michael G. Dunn and John A. Lordi (AIAA J) 2099
NO_2 chemiluminescent wake radiation. Richard L. Schapker and Morton Camac (AIAA J) 2254
Numerical solutions of reflected shock-wave flowfields with nonequilibrium chemical reactions. Leroy L. Presley and Ronald K. Hanson (AIAA J) 2267

Viscous shock layer at the stagnation point with nonequilibrium air chemistry. F. G. Blottner (AIAA J) 2281
Effect of nonequilibrium dissociation on constant pressure laminar mixing. R. J. Wright and C. F. Chen (AIAA J, TN) 165
Numerical solution of near-equilibrium boundary layers. Harvey Kaye (AIAA J, TN) 172
Binary scaling of air ionization on slender cones at small yaw. Richard H. C. Lee and Richard L. Baker (AIAA J, TN) 355
Carbon dioxide dissociation relaxation times, measured in a shock tube. D. Weihs and Y. Manheimer-Timnat (AIAA J, TN) 764
Thin viscous shock layer analysis of blunt body stagnation-point air ionization. John C. Adams Jr. (AIAA J, TN) 1396
Ballistic-range measurements of vibrational-nonequilibrium effects for cone-cylinders at supersonic speeds. George S. Campbell and Paul C. Klimas (AIAA J, TN) 2162
Thermal transport and relaxation processes in shock-heated argon. Klaus Willeke and Daniel Bershader (AIAA J, TN) 2172
Evaluation of electron quench additives in a subsonic air arc channel. K. E. Starner (AIAA J, TN) 2357
Electron density measurements ahead of shock waves in air. Masayuki Omura and Leroy L. Presley (AIAA J, TN) 2363

Shock Waves and Detonations

Aerodynamics, noise, and the sonic boom. W. R. Sears (AIAA J) 577
Analysis of acoustic waves in a cold-flow rocket. F. E. C. Culick and George L. Dehority (JSR) 591
Effects of lengthwise lift distribution on sonic boom of SST configurations. Antonio Ferri and Ahmed Ismail (AIAA J) 1538
Lower bounds for sonic booms in the midfield. A. R. George (AIAA J) 1542
Deflagration limits in an adiabatic model for steady linear burning of a monopropellant. William Nachbar (AIAA J) 1593
Sonic boom waveforms and amplitudes in a real atmosphere. A. R. George and Kenneth J. Plotkin (AIAA J) 1978
Numerical solutions of reflected shock-wave flowfields with nonequilibrium chemical reactions. Leroy L. Presley and Ronald K. Hanson (AIAAJ) 2267
Higher-order perturbation solutions for blast waves. G. G. Bach and J. H. Lee (AIAA J, TN) 742
Erratum: "Higher-order perturbation solutions for blast waves" G. G. Bach and J. H. Lee (AIAA J, TC) 2368
An interferometric study of the shock-reflection process in ionizing argon. Ralph A. Kuiper and Daniel Bershader (AIAA J, TN) 777
Generation of implosions by area change in a shock tube. B. E. Milton and R. D. Archer (AIAA J, TN) 779
Propagation of an N wave across a nonuniform medium. Y. S. Pan (AIAA J, TN) 788
Air forces on a missile from the motion of the silo near a bomb blast. F. Edwards Ehlers (JSR, EN) 847
Effects of oblique shock waves in the near field of rocket plumes. Jarvis Leng, Charles W. Osonitsch, and Thomas M. Lacinski (JSR, EN) 1316
Interpretation of pressure measurements behind the reflected shock in a rectangular shock tube. R. J. Sanderson (AIAA J, TN) 1370
A correlation of the windward shock angle on yawed cones. Joseph B. Williams (AIAA J, TN) 1398
Interaction of a strong shock with Mach waves in unsteady flow. Wai How Hui (AIAA J, TN) 1605
Thermal transport and relaxation processes in shock-heated argon. Klaus Willeke and Daniel Bershader (AIAA J, TN) 2172
Electron density measurements ahead of shock waves in air. Masayuki Omura and Leroy L. Presley (AIAA, J, TN) 2363

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Two-dimensional turbulent jet in a uniform, parallel stream. I. Wygnanski (AIAA J) 86
Fluctuation intensity of passive species in a turbulent subsonic jet. George W. Sutton (AIAA J) 90
Investigation of the leeward side of a delta wing at hypersonic speeds. E. J. Cross Jr. and W. L. Hankey (JSR) 185
Use of Langmuir probes for hypersonic turbulent wakes. George W. Sutton (AIAA J) 193
Heat-transfer and pressure analysis of rocket exhaust impingement on flat plates and curved panels. William C. Rochelle and Douglas E. Kooker (JSR) 248
Underexpanded jet noise reduction using radial flow impingement. Darshan S. Dosanjh and Francis J. Montegani (AIAA J) 458
Effect of gaseous injection on the hypersonic flow around transpiration-cooled bodies. G. R. Inger and S. Sayano (JSR) 649
Vortex rings and the plate jet. Percival D. McCormack (AIAA J) 654
Fluctuation measurements in the near wake of a wedge with and without base injection. John E. Lewis and Wilhelm Behrens (AIAA J) 664
Surface mass injection at supersonic and hypersonic speeds as a problem in turbulent mixing: Part I. Two-dimensional flow. Lester Lees and Robert L. Chapkis (AIAA J) 671
Flow over a finite plate with massive injection. P. D. Thomas (AIAA J) 681
Turbulent shear flows of variable density. John Laufer (AIAA J) 706
Mean and intermittent flow of a self-preserving plasma jet. Anthony Demetriades and Ernest L. Doughman (AIAA J) 713
Mean properties of the turbulent near wake of a slender body with and without base injection. John E. Lewis and Robert L. Chapkis (AIAA J) 835
Hypersonic flowfield effects on small delta-tail surfaces. Humes H. Hart (JSR) 866
Experimental investigation of a highly ionized, arc-heated, supersonic freejet. Arvel Witte, Toshi Kubota, and Lester Lees (AIAA J) 870
Experimental investigation of separated flow over a cavity at hypersonic speed. Mansop Hahn (AIAA J) 1092
Saturn V/S-IC stage base thermal environment. C. R. Mullen and R. L. Bender (JSR) 1138
Installed thrust vector for scarfed nozzles. Stanton Borass and Robert I. Ashby (JSR) 1410
Performance of the Aerobell extendible rocket nozzle. G. A. Hosack and R. R. Stromsta (JSR) 1416
Laboratory measurements of electron-density distributions in the near wake. S. Lederman, M. H. Bloom, and G. F. Widhopf (AIAA J) 1421
Theoretical and experimental studies of ducted mixing and burning of coaxial streams. C. E. Peters, W. J. Phares, and T. H. M. Cunningham (JSR) 1435
Experimental studies of a laminar hypersonic cone wake. Earll M. Murman (AIAA J) 1724
Spectral characterization of dielectric constant fluctuation in hypersonic wake plasmas. Shao-Chi Lin (AIAA J) 1853
Experimental investigation of far wakes behind two-dimensional slender bodies at $M\infty = 6$. Richard G. Batt and Toshi Kubota (AIAA J) 2064
Laminar mixing of heterogeneous axisymmetric coaxial confined jets. Kirti N. Ghia, T. Paul Torda, and Zalman Lavan (AIAA J) 2072
Theory of laminar viscous-inviscid interactions in supersonic flow. John M. Klineberg and Lester Lees (AIAA J) 2211
NO_2 chemiluminescent wake radiation. Richard L. Schapker and Morton Camac (AIAA J) 2254
Penetration of a high-velocity gas stream by a water jet. E. J. Geery and M. J. Margetts (JSR, EN) 79
A reattachment criterion for turbulent supersonic separated flows. J. P. Batham (AIAA J, TN) 154
Comments on "A reattachment criterion for turbulent supersonic separated flows." R. H. Page (AIAA J, TC) 1659
Reply by author to R. H. Page. J. P. Batham. (AIAA J, TC) 1660
Measurement of mean drop sizes for sprays from super-heated waterjets. Paul B. Gooderum and Dennis M. Bushnell (JSR, EN) 197
Effect of nose bluntness of hypersonic unsteady aerodynamics. Lars Eric Ericsson and Ira M. Scholnick (JSR, EN) 321
Drag of a small body in the wake of a large satellite. Richard A. Oman (JSR, EN) 329
Experimental studies of drop breakup in hypersonic flow. John L. Beal (JSR, EN) 337
Further experiments on spreading of liquids injected into a supersonic flow. K. P. Horn and R. E. Reichenbach (AIAA J, TN) 358
Boundary of underexpanded axisymmetric jets in still air. K. D. Korkan and L. S. Knowles (AIAA J, TN) 362
Normal injection in a three-dimensional laminar boundary layer. Egon Krause, E. H. Hirschel, and Th. Bothmann (AIAA J, TN) 367
Merging of uniform shear flows at a trailing edge. Raimo J. Hakkinen and Elizabeth J. O'Neil (AIAA J, TN) 523
Determination of the wake behind a bluff body of revolution at high Reynolds numbers. Jean-Yves Parlange (JA, EN) 569
Far field approximation for a nozzle exhausting into a vacuum. John W. Brook (JSR, EN) 626
Subsonic base pressure results for typical planetary entry configurations. J. M. Cassanto (JSR, EN) 636
Derivation of the spectral density function of the energy scattered from an underdense turbulent wake. Joseph L. Neuringer (AIAA J, TN) 728
Measurement of electrical conductivity in the wake neck. Allen E. Fuhs (JSR, EN) 743
Effect of upstream mass injection on the pressure field in a cavity. C. Gene Voorhees and John J. Bertin (AIAA J, TN) 747
Density field of directed free-molecular flow from an annulus. John W. Brook (JSR, EN) 755
A heat-transfer correlation for laminar separated flows. Jerry A. Sills (AIAA J, TN) 969
Predicted air entrainment by subsonic, free round jets. E. B. Cook and J. M. Singer (JSR, EN) 1066
Correlation of free-flight base pressure data for $M = 4$ to $M = 19$. J. M. Cassanto, N. S. Rassmussen, and J. D. Coats (AIAA J, TN) 1154
Analysis of two-phase impingement from a cryogen vented in orbit. E. A. Evans and A. B. Walburn (JSR, EN) 1189
Vortex shedding from circular cylinders in sheared flow. C. F. Chen and Bruce J. Mangione (AIAA J, TN) 1211
Rocket exhaust plume dimensions. Philip Onni Jarvinen and Harry B. Dyner (JSR, EN) 1309
Effects of oblique shock waves in the near field of rocket plumes. Jarvis Leng, Charles W. Osonitsch, and Thomas M. Lacinski (JRS, EN) 1316
Comparison of predicted and measured low-density plume impingement effects. L. M. Shaw and R. S. Hickman (JSR, EN) 1338

A quasi-axisymmetric approximation for turbulent, three-dimensional jets and wakes. Pasquale M. Sforza (AIAA J, TN) 1380
Incompressible turbulent wake of a flat plate. R. J. El-Assar and R. H. Page (AIAA J, TN) 1388
Base pressure measurements on slender cones with domed afterbodies. J. M. Cassanto, J. Schiff, and E. J. Softley (AIAA J, TN) 1607
Reverse-flow profiles in turbulent freejet mixing with streamwise pressure gradient. C. J. Scott, C. J. Boerner, and T. M. Kuzay (AIAA J, TN) 1623
Slot-jet interaction studies at $M_\infty = 4$ and 5. R. E. Phinney, M. J. Werle, J. Knott, and W. C. Volz (AIAA J, TN) 1627
Turbulence measurements in the wake of a thin flat plate. René Chevray and Leslie S. G. Kovasznay (AIAA J, TN) 1641
Observations in the transition zone of a turbulent plasma jet. Anthony Demetriades and Ernest L. Doughman (AIAA J, TN) 1646
A study of high-velocity (4.0–6.5 cm/μ sec) jet propagation through expansion chambers. H. David Glenn and Barbara K. Crowley (AIAA J, TN) 2148
Virtual origins of a free plane turbulent jet. James J. Flora Jr. and Victor W. Goldschmidt (AIAA J, TN) 2344
Effect of real gas properties on the base pressure of a blunt-nosed vehicle. Wendell Norman (AIAA J, TN) 2347
Investigations of flow in triangular cavities. T. P. Torda and B. R. Patel (AIAA J, TN) 2365
Comments on "A study of penetration of a liquid injectant into a supersonic flow." M. Adelberg (AIAA J, TC) 798
Reply by authors to M. Adelberg. K. P. Horn, R. E. Reichenbach, and M. A. Kolpin (AIAA J, TC) 798
A further note on laminar incipient separation. K. O. W. Ball (AIAA J, TC) 1215

Radiatively Coupled Flows and Heat Transfer

Approximate solutions of combined conduction-radiation problems. Thomas J. Lardner (AIAA J, TN) 167
Correlations for stagnation-point radiative heat transfer. Walter B. Olstad (AIAA J, TN) 170
Accuracy of constant density and constant pressure assumptions for radiating shock waves. R. C. Sepucha and D. B. Olfe (AIAA J, TN) 551

Viscous Nonboundary-Layer Flows

Spacecraft capillary propellant retention and control for long-life missions. Stephen C. DeBrock (JSR) 32
Effect of turbulent fluctuations in an optically active fluid medium. George W. Sutton (AIAA J) 1737
Optical measurements of mass density in a high-speed, confined, gaseous vortex. George Gyarmathy (AIAA J) 1838
An approximate solution for the flow of a fluid through a porous solid. H. G. Timmer and R. B. Dirling Jr. (AIAA J, TN) 371
Slender channel approximation in low Reynolds number channel flow. J. C. Williams III and R. E. Oliver II (AIAA J, TN) 375
Nonexistence of axisymmetric separated flow. J. Peter Reding, Rolf A. Guenther, Lars E. Ericsson, and Alan D. Leff (AIAA J, TN) 1374
Optimized acceleration of convergence of an implicit numerical solution of the time-dependent Navier-Stokes equations. Joe F. Thompson (AIAA J, TN) 2186
Interpretation of scalar correlation coefficients. H. Guthart and K. A. Graf (AIAA J, TN) 2338

Plasma Dynamics and MHD

Microwave study of the elastic scattering of electrons from argon atoms. H. S. Glick and T. G. Jones (AIAA J) 4
Investigation of plasma rotation in a pulsed inductive accelerator. C. L. Dailey (AIAA J) 13
Use of Langmuir probes for hypersonic turbulent wakes. George W. Sutton (AIAA J) 193
A conductivity probe for tenuous plasmas. Fred N. Holmquist (AIAA J) 205
Arc structure in a magnetic annular discharge. J. B. Workman (AIAA J) 512
Nonequilibrium boundary layer along an insulator wall. Arthur Sherman and Eli Reshotko (AIAA J) 610
Direct current MHD generators with variable conductivity, velocity, and magnetic field. John J. Roberts, W. Roy Wessel, and Michael Petrick (JSR) 729
Experimental investigation of a highly ionized, arc-heated, supersonic freejet. Arvel Witte, Toshi Kubota, and Lester Lees (AIAA J) 870
Magnetic hypersonic flow near the stagnation point at low Reynolds number. S. Y. Chen (JSR) 872
Performance characteristics of a multiple-arcjet wind tunnel. Charles Cason and T. A. Barr Jr. (JSR) 878
Radio-frequency plasma simultion of gas-core reactor. Merle L. Thorpe (JSR) 923
Radiation-resisted MHD shocks with viscosity and finite electrical conductivity. Tatsuo Yamanaka (AIAA J) 1119
Electromagnetic effect on flows behind gaseous detonations. E. G. Plett and T. Y. Toong (AIAA J) 1127
Several new research results in the fields of flows with energy supply. A. W. Quick (AIAA J) 1410
Low-pressure arc discharge motion between concentric cylindrical electrodes in a transverse magnetic field. David L. Murphree and Richard P. Carter (AIAA J) 1430
Experimental and theoretical studies of electrothermal waves. Robert R. Gilpin and Edward E. Zukoski (AIAA J) 1438
Experimental studies of the interaction between collisionless plasmas and electromagnetic fields. Leonard G. Cohen and Sture K. F. Karlsson (AIAA J) 1446
Plane blast wave produced by "Dense plasma focus" R. J. Wolf and Y. Nakagawa (AIAA J) 1453
Measurement of electron temperature and number density in shock-tunnel flows. Part I: Development of free-molecular Langmuir probes. Michael G. Dunn and John A. Lordi (AIAA J) 1458
An actuator-disk model for azimuthally nonuniform MPD arcs. James A. Fay and Robert A. Cochran (AIAA J) 1688
Investigation of errors in measuring magnetic fields in high-temperature plasma discharges. Paul W. Schreiber, Karl H. Schumaker, and Kenneth R. Benedetto (AIAA J) 1693
Electric arc stabilization in crossed convective and magnetic fields. Y. Y. Winograd and J. F. Klein (AIAA J) 1699
Performance of a 500-kjoule MHD wind tunnel. W. R. Grabowsky, D. A. Durran, and H. Mirels (AIAA J) 1846
Collisionless flow of a plasma mixture. S. H. Lam (AIAA J) 2094
Energy dissipation in MHD duct flow. W. T. Snyder and A. H. Eraslan (AIAA J, TN) 150
Effects of altitude on radar attenuation in nonequilibrium afterburning rocket exhaust plumes. Ronald R. Mikatarian and Harold S. Pergament (AIAA J, TN) 159
Temperature distributions in MHD channels with Hall effect. Arsev H. Eraslan (AIAA J, TN) 186
Some experiments on the "spoke" phenomenon in MPD operation. F. Maisenhälder, E. Üngerer, and G. Krulle (AIAA J, TN) 348
Some characteristics of an electric discharge in a supersonic gas stream. J. M. Wu, S. C. Lee, and J. M. Whoric (AIAA J, TN) 536
Coaxial-flow stabilization of an alternating-current plasma arc. Chester D. Lanzo (AIAA J, TN) 538
Investigation of an MPD plasma jet by gasdynamic experimental methods. S. Krause (AIAA J, TN) 554
Measurement of electrical conductivity in the wake neck. Allen E. Fuhs (JSR, EN) 743
Attenuation predictions from exhaust plume models. Horst A. Poehler (JSR, EN) 1057
Interaction of electromagnetically produced shocks with detonation waves. E. G. Plett (AIAA J, TN) 1180
Isotherms in nonconstant area tube arcs. W. Pasko and S. N. B. Murthy (AIAA J, TN) 1197
Unsteady MHD flow in arbitrary ducts by point-matching method. S. T. Wu and D. R. Jeng (AIAA J, TN) 1612
Dynamic gas effects on the breakdown potential for helium, nitrogen, and argon. J. A. Gardner (AIAA J, TN) 1639
Direct and indirect measurements of the anode fall in a coaxial arc configuration. T. K. Bose and E. Pfender (AIAA J, TN) 1643
Correct formulation of airfoil problems in magnetoaerodynamics. L. Dragos (AIAA J, TN) 2014
Determination of charge/mass and thrust from a positively charged colloidal beam. Brian Makin and Alfred William Bright (AIAA J, TN) 2020
Arc motion in high-pressure cross-field devices. R. B. Stewart and A. P. Sabol (AIAA J, TN) 2024
Current ratios in coaxial plasma accelerators. R. P. Henry and D. S. Scott (AIAA J, TN) 2153
Spectroscopically measured velocity profiles of an MPD arcjet. M.-U. Beth and M. G. Kling (AIAA J, TN) 2181
Stability and shape of magnetically balanced cross-flow arcs. David M. Benenson and Allen J. Baker (AIAA J, TN) 2335
Magneto-hypersonic boundary-layer interactions. M. S. Sastry and S. Chandran (AIAA J, TN) 2362
Comments on "Acceleration process in a stabilized high-current arc." F. Y. Sorrell (AIAA J, TC) 1408
——Reply by authors to F. Y. Sorrell. Rodney L. Burton and O. Y. Chang (AIAA J, TC) 1408
Comments on "Effects of a dynamic gas on breakdown potential." Eugene E. Covert (AIAA J, TC) 1662

Wave Motion and Sloshing

Dielectrophoretic orientation. James R. Melcher, David S. Guttman, and Mathew Hurwitz (JSR) 25
Influence of a rigid top mass on the response of a pressurized cylinder containing liquid. Daniel D. Kana and Wen-Hwa Chu (JSR) 103
Dielectrophoretic liquid expulsion. James R. Melcher, Mathew Hurwitz, and Ruth G. Fax (JSR) 961
Analyses of the performance of liquid dampers for nutation in spacecraft. K. Ayache and R. Lynch (JSR) 1385
Surface deformations in a draining liquid. Barry T. Lubin and George S. Springer (JSR, EN) 203
A simple hydraulic analog of acoustic waves in baffle cells. John W. Converse and Joe D. Hoffman (JSR, EN) 212

Erratum: "Natural frequency of longitudinal modes of liquid propellant space launch vehicles." C. Desmond Pengelley (JSR, TC) 767

Hydrodynamics

A new procedure for the solution of lifting-surface problems. Winnifred R. Jacobs and Stavros Tsakonas (JH) 20
Dielectrophoretic orientation. James R. Melcher, David S. Guttman, and Mathew Hurwitz (JSR) 25
Nonlinear free-surface effects on a submerged sphere. W. D. Kim (JH) 29
Spacecraft capillary propellant retention and control for long-life missions. Stephen C. DeBrock (JSR) 32
Aerodynamic features of the flap-balanced swivel airfoil. J. C. Gibbings (JH) 44
Fluid-free-surface proximity effect on a sphere vertically accelerated from rest. J. G. Waugh and A. T. Ellis (JH) 175
Drag on an oscillating rod with longitudinal and torsional motion. Mario J. Casarella and Patricio A. Laura (JH) 180
Lift reduction in additive solutions. Jin Wu (JH, EN) 198
Surface deformations in a draining liquid. Barry T. Lubin and George S. Springer (JSR, EN) 203
Motion of a bubble in a rotating liquid. James V. Clifton, Richard A. Hopkins, and Donald W. Goodwin (JSR, EN) 215
A study of baffle effects on flow behavior under low-g conditions. C. C. Lee (JSR, EN) 499
Energy dissipation in an oscillating sphere filled with a viscous fluid. R. Aprahamian, R. L. Johnson, and L. R. Koval (AIAA J, TN) 1793

Nonsteady Aerodynamics

Unsteady aerodynamic and stall effects on helicopter rotor blade airfoil sections. Jaan Liiva (JA) 46
Flapping response of lifting rotor blades to atmospheric turbulence. Gopal H. Gaonkar and Kurt H. Hohenemser (JA) 496
Stability of oscillating wedges and caret wings in hypersonic and supersonic flows. Wai How Hui (AIAA J) 1524
Large-amplitude low-frequency oscillation of a slender wedge in inviscid hypersonic flow. H. K. Kuiken (AIAA J) 1767
A numerical method for the calculation of nonlinear, unsteady lifting potential flow problems. R. Harijono Djojodihardjo and Sheila E. Widnall (AIAA J) 2001
Universal scaling laws for nose bluntness effects on hypersonic unsteady aerodynamics. Lars Eric Ericsson (AIAA J) 2222
Sudden acceleration of a laminar boundary layer by a moving belt. A. Mager (AIAA J) 2247
Effect of nose bluntness on hypersonic unsteady aerodynamics. Lars Eric Ericsson and Ira M. Scholnick (JSR, EN) 321
Low-frequency approximation in unsteady aerodynamics. Gunter W. Brune (JA, EN) 478
Aerodynamic frequency response measurements of a wind anemometer. J. D. Laferty and L. V. Schmidt (JSR, EN) 1080
Simple formulas for unsteady pressure on slender wedges and cones in hypersonic flow. K. J. Orlik-Rückemann (JSR, EN) 1209
Pressure induced by weak interaction with unsteady hypersonic boundary layers. E. Reshotko and C. M. Rodkiewicz (AIAA J, TN) 1609
Experiments on vortex shedding from rotating circular cylinders. J. F. Jaminet and C. W. Van Atta (AIAA J, TN) 1817
Effect of angle-of-attack oscillation on the stability of liquid films. Ali Hasan Nayfeh (AIAA J, TN) 2026
Upwash interference on an oscillating wing in slotted-wall wind tunnels. Ching-Fang Lo (AIAA J, TN) 2168

STRUCTURAL MECHANICS AND MATERIALS

Structural Static Analysis

Creep stress concentration at a circular hole in an infinite plate. Sharad A. Patel, Michael R. Birnbaum, and B. Venkatraman (AIAA J) 54
Axisymmetric stress distribution in anisotropic cylinders of finite length. Joab J. Blech (AIAA J) 59
An investigation of residual stresses in tempered glass plates of aircraft windshields. Y. F. Cheng (JA) 156
A shock-tunnel driver for use with hydrogen at elevated temperatures and pressures. C. E. Smith, D. G. Hajjar, and W. G. Reinecke (JSR) 190
Damage tolerance and logistic transport design. W. T. Shuler and D. S. Morcock (JA) 416
Finite element analysis of inelastic structures. R. M. Richard and J. R. Blacklock (AIAA J) 432
Simplified design equations for buckling of axially compressed sandwich cylinders with orthotropic facings and core. C. D. Reese and C. W. Bert (JA) 515
A comparison of approximate methods for the solution of plate bending problems. A. W. Leissa, W. E. Clausen, L. E. Hulbert, and A. T. Hopper (AIAA J) 920
Bending stiffness of an inflated cylindrical cantilever beam. William J. Douglas (AIAA J) 1248
Generalized variational principles in the finite-element method. B. E. Greene, R. E. Jones, R. W. McLay, and D. R. Strome (AIAA J) 1254
Influence of transverse shear on the small displacement theory of circular plates. Terry F. Lehnhoff and Robert E. Miller (AIAA J) 1499
Analysis of shells of revolution having arbitrary stiffness distributions. A. P. Cappelli, T. S. Nishimoto, and P. P. Radkowski (AIAA J) 1909
Effect of internal pressure on an infinite cylindrical shell subjected to concentrated radial loads. Paul Seide (AIAA J) 1944
Static and dynamic applications of a high-precision triangular plate bending element. G. R. Cowper, E. Kosko, G. M. Lindberg, and M. D. Olson (AIAA J) 1957
Matrix algorithm for structural modification based upon the parallel element concept. Jaroslaw Sobieszczanski (AIAA J) 2132
A finite element solution for Saint-Venant torsion. Joseph L. Krahula and Gerald F. Lauterbach (AIAA J) 2200
Maximum stress of a stiffened circular cylinder under bending. Tsai-Chen Soong (JA, EN) 68
Stress analysis of incompressible solids of revolution by point matching. F. R. Wallis (JSR, EN) 86
Clamped annular plate under a concentrated force. Rene Amon and O. E. Widera (AIAA J, TN) 151
Stiffness matrices for sector elements. I. S. Raju and A. K. Rao (AIAA J, TN) 156
Exact solution of certain problems by finite-element method. Pin Tong (AIAA J, TN) 178
——Comment on "Exact solution of certain problems by finite element method." Carlos A. Prato (AIAA J, TC) 1215
A rapidly converging triangular plate element. James A. Stricklin, Walter E. Haisler, Patrick R. Tisdale, and Richard Gunderson (AIAA J, TN) 180
Elastostatic problems of arbitrarily shaped doubly connected plates. Stanley S. H. Chen and Dick D. D. Chiang (JH, EN) 196
Some problems in thermoelasticity with temperature-dependent properties. Sam Tang (JSR, EN) 217
A special variational principle for the finite element method. Richard W. McLay (AIAA J, TN) 533
Strain resultants in certain finite elements. Robert D. Cook (AIAA J, TN) 535
A note on Love's stress function. Guilherme De La Penha and Bart Childs (AIAA J, TN) 540
Discrete-element plastic analysis of structures in a state of modified plane strain. Gabriel Isakson (AIAA J, TN) 545
An efficient higher-order difference method for two-dimensional structures. Donald E. Johnson (AIAA J, TN) 548
Analysis of open noncircular cylindrical shells. Donald E. Boyd (AIAA J, TN) 563
Analysis of damaged structure. Harold Switzky (JA, EN) 567
Two-dimensional finite-difference equations for shallow spherical shells. Atis A. Liepins (AIAA J, TN) 737
Gradient methods for finite-element eigenproblems. Isaac Fried (AIAA J, TN) 739
Bending of parabolic and cardioidal plates. Neville I. Robinson (AIAA J, TN) 962
Stress analysis of solid-propellant rocket charges by point matching. F. R. Wallis (JSR, EN) 1082
A note on the analysis of finite solid cylinder. K. Chandrashekhara (AIAA J, TN) 1161
Bending of swept cantilever thin elastic plates. B. Basava Raju and C. G. Shah (AIAA J, TN) 1177
Does the center of flexure depend on Poisson's ratio? Toma Leko (AIAA J, TN) 1187
Reduction of the equations of the membrane theory of shells. G. V. Krishna Reddy (AIAA J, TN) 1199
Integration of area and volume coordinates in the finite-element method. C. A. Brebbia (AIAA J, TN) 1212
Comment on "Exact solution of certain problems by finite element method." Carlos A. Prato (AIAA J, TC) 1215
Some aspects of the natural coordinate system in the finite-element method. Isaac Fried (AIAA J, TN) 1366
Analysis of cylindrical tubes under torsional and transverse loads. A. V. Krishna Murty (AIAA J, TN) 1394
Plastically nonhomogeneous shells under internal pressure. J. G. Chakravorty (AIAA J, TN) 1601
A refined mixed-type plate bending element. W. Visser (AIAA J, TN) 1801
Deflection of an arbitrarily loaded rectangular plate. M. N. Reddy (AIAA J, TN) 1805
Generalized stiffness matrix of a curved-beam element. Hwa-Ping Lee (AIAA J, TN) 2043
Some plane quadrilateral "hybrid" finite elements. Robert D. Cook and Jaafar K. Al-Abdulla (AIAA J, TN) 2184
Torsion testing for shear modulus of thin orthotropic sheet. B. M. Lempriere, R. W. Fenn Jr., D. D. Crooks, and W. C. Kinder (AIAA J, TN) 2341
A numerical method for the solution of a shell problem. Dusan Krajcinovic (AIAA J, TN) 2350
Cylindrical shells of variable wall thickness. Thomas J. Lardner (AIAA J, TC) 191
Comment on "An automatic node-relabeling scheme for bandwidth minimization of stiffness matrices." John Barlow and Christopher G. Marples (AIAA J, TC) 380
——Reply by author to J. Barlow and C. G. Marples. Fevzican A. Akyuz (AIAA J, TC) 381

Errata: "General solution for two-dimensional couple-stress elasticity." C. W. Bert and F. J. Appl (AIAA J, TC) 384
Solving problems of elasto-plastic flow. J. L. Swedlow (AIAA J, TC) 1214
——Reply by author to J. L. Swedlow. Fevzican A. Akyuz (AIAA J, TC) 1214
Errata: "A curved, cylindrical-shell, finite element." Gilles Cantin and Ray W. Clough (AIAA J, TC) 1824

Structural Stability Analysis

Creep buckling of a circular cylindrical shell. Lars Åke Samuelson (AIAA J) 42
Buckling of cylindrical shells with eccentric spiral-type stiffeners. Tsai-Chen Soong (AIAA J) 65
——Comments on "Buckling of cylindrical shells with eccentric spiral-type stiffeners." R. R. Meyer (AIAA J, TC) 2047
——Reply by author to R. R. Meyer. Tsai-Chen Soong (AIAA J, TC) 2047
Evaluation of aerothermoelasticity problems for unmanned Mars-entry vehicles. E. G. Menkes and J. C. Houbolt (JSR) 178
Axisymmetric dynamic snap-through of elastic clamped shallow spherical shells. N. C. Huang (AIAA J) 215
——Erratum: "Axisymmetric dynamic snap-through of elastic clamped shallow spherical shells." N. C. Huang (AIAA J, TC) 1664
Buckling of cylindrical and conical sandwich shells with orthotropic facings. Charles W. Bert, W. C. Crisman, and Gene M. Nordby (AIAA J) 250
——Erratum: "Buckling of cylindrical and conical sandwich shells with orthotropic facings." Charles W. Bert, W. C. Crisman, and G. M. Nordby (AIAA J, TC) 1824
Torsional stability of shallow shells of revolution. Louis L. Bucciarelli Jr. (AIAA J) 648
Fracture mechanics in cost-effective pressure vessel design. L. Raymond and R. J. Usell (JSR) 735
Buckling and initial postbuckling behavior of spheroidal shells under pressure. D. A. Danielson (AIAA J) 936
Dynamics of composite, sandwich, and stiffened shell-type structures. Charles W. Bert and Davis M. Egle (JSR, SA) 1345
Buckling modes of circular cylindrical shells under axial compression. R. C. Tennyson (AIAA J) 1481
Influence of damping on the snapping of a shallow arch under a step pressure load. G. A. Hegemier and F. Tzung (AIAA J) 1494
Dynamic buckling loads of imperfection-sensitive structures from perturbation procedures. D. A. Danielson (AIAA J) 1506
Buckling of stiffened two-layered shells of revolution with a circumferentially cracked unbonded layer. Robert M. Jones (AIAA J) 1511
Finite-element postbuckling analysis of thin elastic plates. D. W. Murray and E. L. Wilson (AIAA J) 1915
Dynamic stability criteria for clamped shallow arches under timewise step loads. C. S. Hsu, Chin-Tun Kuo, and R. H. Plaut (AIAA J) 1925
A finite-element method for the plastic buckling analysis of plates. Allan Pifko and Gabriel Isakson (AIAA J) 1950
Axisymmetric static and dynamic buckling of spherical caps due to centrally distributed pressures. Wendell B. Stephens and Robert E. Fulton (AIAA J) 2120
Buckling of axisymmetric imperfect circular cylindrical shells under axial compression. R. C. Tennyson and D. B. Muggeridge (AIAA J) 2127
Elastic stability of a circular plate under unidirectional compression. Sam Tang (JSR, EN) 78
Comparison of inflation rigidized wire-film and shell-film cylinders in axial compression and bending. Paul E. Wilson (JSR, EN) 200
Buckling of eccentrically stiffened cylinders under combined loads. George J. Simitses (AIAA J, TN) 335
Plate buckling analysis using a fully compatible finite element. William Grant Carson and R. E. Newton (AIAA J, TN) 527
Influence of prebuckling deformations on the buckling of circular cylindrical shells under external pressure. Noboru Yamaki (AIAA J, TN) 753
Stability of a column subjected to a time-dependent axial load. E. F. Infante and R. H. Plaut (AIAA J, TN) 766
Buckling of a stiffened cylindrical shell with transverse shear load. Ru-Lin Lee (AIAA J, TN) 768
Eigenvalue problems with a "mixed" plate element. Robert D. Cook (AIAA J, TN) 982
Buckling of deep arches at large deflections. Robert Schmidt and Donald A. DaDeppo (AIAA J, TN) 1182
Buckling of eccentrically stiffened, thin circular plates. George J. Simitses and Charles M. Blackmon (AIAA J, TN) 1200
Buckling of parabolic and semi-elliptic plates. Neville I. Robinson (AIAA J, TN) 1204
Dynamic buckling of clamped spherical caps under step pressure loadings. James A. Stricklin and J. Edwardo Martinez (AIAA J, TN) 1212
Buckling of thick rectangular plates. S. Srinivas and A. K. Rao (AIAA J, TN) 1645
Concerning the determinant of the expanded form of [A + iB]. L. L. Bucciarelli Jr. (AIAA J, TN) 1823
An experimental investigation of the buckling of toroidal shells. B. O. Almroth, L. H. Sobel, and A. R. Hunter (AIAA J, TN) 2185
Buckling of clamped and simply supported shallow spherical shells. Gerald A. Cohen (AIAA J, TN) 2346
Errata: "Buckling of eccentrically stiffened cylinders under torsion." George J. Simitses (AIAA J, TC) 576
Comment on "Effect of nonlinear prebuckling state on the postbuckling behavior and imperfection-sensitivity of elastic structures." J. R. Fitch and J. W. Hutchinson (AIAA J, TC) 1407
——Reply by author to J. R. Fitch and J. W. Hutchinson. Gerald A. Cohen (AIAA J, TC) 1407
Errata: "Buckling of circular cylindrical shells with multiple orthotropic layers and eccentric stiffeners." Robert M. Jones (AIAA J, TC) 2048

Structural Dynamic Analysis

Survey of dynamic analysis methods for flight control design. Alfred C. Robinson (JA, SA) 81
Dynamics of composite, sandwich, and stiffened shell-type structures. Charles W. Bert and Davis M. Egle (JSR, SA) 1345
A computer method for dynamic structural analysis using stiffness matrices. John J. Sciarra (JA) 3
Vibrations of thin cylindrical shells under axisymmetric thermal stresses. Chung-Chun Ong and George Herrmann (AIAA J) 27
Stress waves in a temperature-dependent viscoelastic half-space subjected to impulsive electromagnetic radiation. G. A. Hegemier and L. W. Morland (AIAA J) 35
Dynamic analysis and development of response histories and tradeoff study charts for spherical impact limiters. Harvey M. Berkowitz and David A. Rodriguez (JSR) 50
Some aspects of nonlinear mechanical behavior of a composite propellant. E. C. Francis and C. H. Carlton (JSR) 65
Solution to beam vibrations problems with mixed response-excitation input information. James W. Straight (AIAA J) 73
Influence of a rigid top mass on the response of a pressurized cylinder containing liquid. Daniel D. Kana and Wen-Hwa Chu (JSR) 103
Axisymmetric dynamic snap-through of elastic clamped shallow spherical shells. N. C. Huang (AIAA J) 215
Axisymmetric and beam-type vibrations of thin cylindrical shells. Kevin Forsberg (AIAA J) 221
Finite, inelastic deformations of clamped shell membranes subjected to impulsive loadings. Charles Lindbergh and Donald E. Boyd (AIAA J) 228
Axisymmetric vibrations of a cylindrical-hemispherical tank partially filled with a liquid. C. W. Coale (AIAA J) 235
Dynamics of a flexibly bonded two-layered Timoshenko-type cylindrical shell. J. P. Jones and J. S. Whittier (AIAA J) 244
Wobble-spin technique for spacecraft inversion and earth photography. Norman H. Beachley and John J. Uicker Jr. (JSR) 245
Continuous and discrete RAE structural models. James L. Farrell and James K. Newton (JSR) 414
Dynamic stresses in a case-bonded cylinder due to transient angular accelerations. James L. Hill and Eric B. Becker (AIAA J) 439
Computer analysis of large structural systems. Robert Melosh, Theodore Lang, Robert Bamford, and Larry Schmele (JSR) 448
A method for predicting longitudinal stability derivatives of rigid and elastic airplanes. J. Roskam and A. Dusto (JA) 525
An analytical and experimental study of the vibration of orthogonally stiffened cylindrical shells. R. M. Scruggs, C. V. Pierce, and J. R. Reese (JSR) 603
Transient response of a case-bonded nonlinear viscoelastic cylinder. Edward B. Magrab (AIAA J) 628
Dynamic response of a composite shell. G. W. Knobeloch and Yechiel Shulman (AIAA J) 635
The eigenvalue problem for structural systems with statistical properties. Jon D. Collins and William T. Thomson (AIAA J) 642
Motion and stability of a spinning spring-mass system in orbit. S. A. Crist and J. G. Eisley (JSR) 819
Asymptotic analysis of stress waves in inhomogeneous elastic solids. C. R. Steele (AIAA J) 896
Thermally induced vibration and flutter of a flexible boom. Yi-Yuan Yu (JSR) 902
Dynamic behavior of a cylinder with a cutout. F. Brogan, K. Forsberg, and S. Smith (AIAA J) 903
Modeling the blast response of structures using dissimilar materials. Wilfred E. Baker and Peter S. Westine (AIAA J) 951
Optimal configuration for hinged, two-body satellites. Gary M. Connell (JSR) 1024
A comment on complex structural response to random vibrations. J. L. Zeman and J. L. Bogdanoff (AIAA J) 1225
Optimal estimation of rotation-coupled flexural oscillations. James L. Farrell, James K. Newton, James A. Miller, and Eliezer N. Solomon (JSR) 1290
Finite deformation of a spinning elastic membrane. Seh-Ieh Chou and Gary D. Blomstrom (AIAA J) 1476
Stress-wave propagation in a class nonhomogeneous elastic media. Shun-Chin Chou, R. Greif, and D. E. Johnson (AIAA J) 1710

Gyroscopically induced vibrations of circular plates. A. L. Schlack Jr. and P. G. Kessel (AIAA J) 1932
Random acoustic response of a cylindrical shell. Chintsun Hwang and W. S. Pi (AIAA J) 2204
Free vibration of simply supported parallelogrammic plates. Somayajulu Durvasula (JA, EN) 66
Possible effects of boom flutter on the attitude dynamics of the Ov1-10 satellite. G. M. Connell and V. Chobotov (JSR, EN) 90
Dynamic behavior of thrust-balance systems. L. H. Luehr and L. L. Bickford (JSR, EN) 92
Friction damping of deployed structures in a weightless state. E. V. Wilms (JSR, EN) 318
Dissolved gas and Helmholtz resonance in rocket injectors. Warren Juran and E. B. Zwick (JSR, EN) 347
Ordinary coherence functions and mechanical systems. Richard L. Barnoski (JA, EN) 372
Gust design envelope of interacting loads. Kenneth L. Roger (JA, EN) 380
Degree-of-freedom requirements for hinged multibody satellites. Gary M. Connell (JSR, EN) 501
Clough-Tocher triangular plate-bending element in vibration. S. M. Dickinson and R. D. Henshell (AIAA J, TN) 560
Natural vibration of isotropic plates with temperature-dependent properties. Sam Tang (AIAA J, TN) 725
Vibration of a cantilever subjected to a tensile follower force. J. M. Anderson and W. W. King (AIAA J, TN) 741
Orthogonalization of measured modes and calculation of influence coefficients. Jean McGrew (AIAA J, TN) 774
Stress waves in layered materials. James R. Hutchinson (AIAA J, TN) 786
Free vibrations of semi-infinite multilayer composite cylinders. W. W. Boyd (JSR, EN) 957
Free vibrations of anisotropic conical shells. R. E. Martin (AIAA J, TN) 960
Eigenvalue problems with a "mixed" plate element. Robert D. Cook (AIAA J, TN) 982
Failure of solid rocket motors undergoing sudden case failure. Glenn A. Secor (JSR, EN) 1075
Vibration analysis by dynamic partitioning. Robert L. Goldman (AIAA J, TN) 1152
Natural frequencies and modes of clamped skew plates. Somayajulu Durvasula (AIAA J, TN) 1164
Finite-element analysis of time-dependent phenomena. I. Fried (AIAA J, TN) 1170
Nonlinear differential equations and the terrestial brachistochrone. Joseph F. deSpautz and Robert A. Lerman (AIAA J, TN) 1173
Derivation of axisymmetric flexural vibration equations of a cylindrically aeolotropic circular plate. Ki S. Joung (AIAA J, TN) 1386
Permanent deformation of an axial rod subjected to dynamic loading. D. O. Blackketter and L. E. May (AIAA J, TN) 1651
Free vibration of a centrally clamped spinning circular disk. Walter Eversman and Robert O. Dodson Jr. (AIAA J, TN) 2010
Dynamic plastic response of finite bars. E. R. Wood and T. H. Liu (AIAA J, TN) 2158
Nonzero free-free frequencies of structures idealized by matrix methods. Malcolm Newman and I. U. Ojalvo (AIAA J, TN) 2343
Fundamental natural frequencies of circular sandwich plates. Jao-Shiun Kao and Robert J. Ross (AIAA J, TN) 2353
The siren revisited. William P. Rodden (AIAA J, TC) 382
——Reply by author to W. P. Rodden. N. O. Myklestad (AIAA J, TC) 382
Comments on "Natural frequencies of clamped cylindrical shells." Geoffrey B. Warburton (AIAA J, TC) 382
Erratum: "Natural frequency of longitudinal modes of liquid propellant space launch vehicles." C. Desmond Pengelley (JSR, TC) 767
Comments on "Rates of change of eigenvalues and eigenvectors." Aldo Cella (AIAA J, TC) 1655
——Reply by authors to Aldo Cella. R. L. Fox and M. P. Kapoor (AIAA J, TC) 1655

Aeroelasticity and Hydroelasticity

A strip method for prediction of damping in subsonic wind tunnel and flight flutter tests. William P. Rodden and Bernhard Stahl (JA) 9
Application of matrix displacement methods in the study of panel flutter. Kariappa and B. R. Somashekar (AIAA J) 50
Further calculations of the flutter speed of a fully submerged subcavitating hydrofoil. Wen-Hwa Chu and H. Norman Abramson (JH) 168
Evaluation of aerothermoelasticity problems for unmanned Mars-entry vehicles. E. G. Menkes and J. C. Houbolt (JSR) 178
A perturbation method for treating nonlinear panel flutter problems. Luigi Morino (AIAA J) 405
Nonlinear flutter of curved plates. E. H. Dowell (AIAA J) 424
An analytical and experimental study of the vibration of orthogonally stiffened cylindrical shells. R. M. Scruggs, C. V. Pierce, and J. R. Reese (JSR) 603
Aeroelastic stability characteristics of cylindrical shells considering imperfections and edge constraint. Gerald W. Barr and Ronald O. Stearman (AIAA J) 912
Optimization of structures to satisfy flutter requirements. M. Jonathan Turner (AIAA J) 945
Membrane flutter paradox—An explanation by singular-perturbation methods. John H. Spriggs, Arthur F. Messiter, and William J. Anderson (AIAA J) 1704
A comparison of membrane and panel flutter. C. H. Ellen (AIAA J, TN) 544
Bending of swept cantilever thin elastic plates. B. Basava Raju and C. G. Shah (AIAA J, TN) 1177
Flutter boundary for simply supported unstiffened cylinders. Sidney C. Dixon and M. Latrelle Hudson (AIAA J, TN) 1390
Errata and Addenda: "Theoretical considerations of panel flutter at high supersonic Mach numbers." John Dugundji (AIAA J, TC) 1663

Hypervelocity Impact

Stress waves in a temperature-dependent viscoelastic half-space subjected to impulsive electromagnetic radiation. G. A. Hegemier and L. W. Morland (AIAA J) 35
Hypervelocity impact of small right circular cylinders. W. G. Reinecke and W. L. McKay (AIAA J) 1921
A penetration criterion for double-walled structures subject to meteoroid impact. J. P. D. Wilkinson (AIAA J) 1937
A cumulative damage concept in rain erosion study. Chi-Hung Mok (AIAA J, TN) 751
Projectile size and density effects on hypervelocity penetration. R. J. Arenz, S. J. (JSR, EN) 1319
Particle cloud impingement damage. A. J. Laderman and C. H. Lewis (JSR, EN) 1327
Effect of debris shielding on energy partition. C. H. Lewis and A. J. Laderman (JSR, EN) 1470
A correction technique for structural impact modeling using dissimilar materials. J. M. Horowitz and G. E. Nevill Jr. (AIAA J, TN) 1637

Properties of Materials

An investigation of residual stresses in tempered glass plates of aircraft windshields. Y. F. Cheng (JA) 156
A shock-tunnel driver for use with hydrogen at elevated temperatures and pressures. C. E. Smith, D. G. Hajjar, and W. G. Reinecke (JSR) 190
Development of metal-matrix composite blading for gas-turbine engines. J. A. Mangiapane, S. A. Sattar, D. F. Gray, and J. A. Timoshenko (JA) 318
NASA programs for development of high-temperature alloys for advanced engines. John C. Freche and Robert W. Hall (JA) 424
Fracture mechanics in cost-effective pressure vessel design. L. Raymond and R. J. Usell (JSR) 735
Fracture-toughness measurements on 12% Ni maraging steel weldment. F. R. Stonesifer and H. L. Smith (JH, EN) 54
In situ vacuum testing—A must for certain elastomeric materials. John P. Mugler Jr., Lawrence R. Greenwood, William S. Lassiter, and Robert A. Comparin (JSR, EN) 219
——Comments on "In situ vacuum testing—A must for certain elastomeric materials." Norman Fishman (JSR, TC) 1213
——Reply by authors to N. Fishman. John P. Mugler Jr., Lawrence R. Greenwood, William S. Lassiter, and Robert A. Comparin (JSR, TC) 1214
Laser-induced teflon char. W. Brandkamp, A. DeCecco, and J. Hanson (JSR, EN) 1087
Unusual Poisson's ratios of pyrolytic graphite. Charles W. Bert (AIAA J, TN) 1814
Comments on "Vacuum effects on fatigue properties of magnesium and two magnesium alloys." R. A. Munroe (JSR, TC) 223

Structural Composite Materials (Including Coatings)

Development of the shim-joint concept for composite structural members. J. P. Wong, B. W. Cole, and A. L. Courtney (JA) 18
Development of metal-matrix composite blading for gas-turbine engines. J. A. Mangiapane, S. A. Sattar, D. F. Gray, and J. A. Timoshenko (JA) 318
Titanium diffusion-bonded honeycomb—optimum structure for material, joining medium, and configurations. Aaron L. Kolom (JA) 410
Thermal control of a Mars entry capsule. J. W. Stultz (JSR) 609
Biaxial fracture strength and mechanical properties of graphite-base refractory composites. Tu-Lung Weng (AIAA J) 851
Comparison of composite and noncomposite structural tubes. B. W. Cole and R. V. Cervelli (AIAA J) 1488
A new technique for joining porous refractory metals. C. Forbes Dewey Jr. (AIAA J, TN) 1192
Comparison of inflation rigidized wire-film and shell-film cylinders in axial compression and bending. Paul E. Wilson (JSR, EN) 200
Lightweight, high-thermal-capacity force models for use in arc tunnels. James G. Fowke and James N. Mueller (JSR, EN) 326
Structural research on an impact limiter system for Mars "hub- and tire-" type hard landers. A. C. Knoell (JSR, EN) 491
Free vibrations of semi-infinite multilayer composite cylinders. W. W. Boyd (JSR, EN) 957
Large deflections of circular air-mat plates. Charles H. Haight (AIAA J, TN) 1630

Exploratory tests on fiber-reinforced plates with circular holes under tension. B. I. Hyman, A. DeTurk, R. Diaz, and G. DiGiovanni (AIAA J, TN) 1820
Bending of a beam made of a fiber-reinforced viscoelastic material. R. Ray Nachlinger and J. R. Leininger (AIAA J, TN) 2016
Material coupling in the analysis of orthotropic layered shells. Richard F. Parisse and John N. Rossettos (AIAA J, TN) 2331

Optimal Structural Design

Simplified design equations for buckling of axially compressed sandwich cylinders with orthotropic facings and core. C. D. Reese and C. W. Bert (JA) 515
Fracture mechanics in cost-effective pressure vessel design. L. Raymond and R. J. Usell (JSR) 735
Synthesis of waffle plates with multiple rib sizes. Lawrence D. Hofmeister and Lewis P. Felton (AIAA J) 2193
Feasibility of full stress design. Pasala Dayaratnam and Suryanarayana Patnaik (AIAA J, TN) 773
Optimal design of structural systems: An energy formulation. J. E. Taylor (AIAA J, TN) 1404
Minimum-weight stiffened shells with slight meridional curvature designed to support axial compressive loads. W. Jefferson Stroud and Nancy P. Sykes (AIAA J, TN) 1599

Thermal Stresses

Creep of conical membrane sheils under aerodynamic heating and loading. F. A. Cozzarelli and R. P. Vito (AIAA J) 412
Stresses in long cylinder due to rotating line source of heat. Ryszard B. Hetnarski (AIAA J) 419
Thermally induced vibration and flutter of a flexible boom. Yi-Yuan Yu (JSR) 902
Temperature distribution and curvature produced in long solid cylinders in space. S. Sikka, M. Iqbal, and B. D. Aggarwala (JSR) 911
Measurement of solid rocket motor thermally induced radial bond stresses. W. H. Miller (JSR) 1253
Some problems in thermoelasticity with temperature-dependent properties. Sam Tang (JSR, EN) 217
Thermal stresses in a rotating cylinder heated by solar radiation. Robert C. Petrof and Severin Raynor (AIAA J, TN) 744
Stresses due to a nucleus of thermoelastic strain in an infinite elastic solid with two rigid circular inserts. Bimalendu Das (AIAA J, TN) 755
Finite-element analysis of time-dependent phenomena. I. Fried (AIAA J, TN) 1170
Thermal stresses in a transversely isotropic, hollow, circular cylinder. D. B. Longcope, M. J. Forrestal, and W. E. Warren (AIAA J, TN) 2174

INTERDISCIPLINARY TOPICS

Electric Power Generation Research

Direct current MHD generators with variable conductivity, velocity, and magnetic field. John J. Roberts, W. Roy Wessel, and Michael Petrick (JSR) 729
Characteristics of a finite-length MHD traveling-wave cylindrical accelerator or generator. Jerry L. Jester and Jerome B. Fanucci (AIAA J) 864
A supercritical thermodynamic power cycle with MHD generator. J. Braun and A. S. Roberts Jr. (AIAA J, TN) 771
Diagonal conducting wall MHD generator channel flows. Richard V. Shanklin III (AIAA J, TN) 975
Optimization of Faraday generators with nonequilibrium ionization. V. Zampaglione (AIAA J, TN) 1619

Atmospheric, Space, and Oceanographic Sciences

Thunderstorm turbulence and its relationship to weather radar echoes. J. Burnham and J. T. Lee (JA) 438
A subsatellite concept for Martian fields and particles measurements. Carle A. Privette and Samuel Urcis (JSR) 443
Radio propagation experiments with interplanetary spacecraft. Glenn A. Reiff (JSR) 551
An experiment to determine the structure of a planetary atmosphere. Simon C. Sommer and Layton Yee (JSR) 704
Gravity field exploration by a new gradient technique. Paul H. Savet (JSR) 710
Improvement of astronomical constants and ephemerides from pioneer radio-tracking data. J. D. Anderson and D. E. Hilt (AIAA J) 1048
Characteristics of atmospheric turbulence as related to wind loads on tall structures. George H. Fichtl, John W. Kaufman, and William W. Vaughan (JSR) 1396
Lunar gravitational field as determined from lunar orbiter tracking data. John P. Gapcynski, W. Thomas Blackshear, and Harold R. Compton (AIAA J) 1905
Modeling of solar cosmic ray events based on recent observations. M. B. Baker, R. E. Santina, and A. J. Masley (AIAA J) 2105
Calculated dose rates in Jupiter's Van Allen belts. J. W. Haffner (AIAA J) 2305
A small satellite concept for lower-thermosphere measurements. P. Levine and R. Driscoll (JSR, EN) 221
Geosynchronous meteorological satellite. V. E. Suomi and T. H. Vonder Haar (JSR, EN) 342
Distribution of lengths of high-altitude clear air turbulent regions. Edward V. Ashburn (JA, EN) 381
Effects of an isobaric, inhomogeneous atmosphere on sonic boom. W. F. Merzkirch (JA, EN) 477
A compatible satellite meteorological data collection system. H. W. Hill and C. F. Whistler (JSR, EN) 741
Effect of neglected gravity coefficients on computed satellite orbits and geodetic parameters. R. J. Anderle, C. A. Malyevac, and H. L. Green Jr. (JSR, EN) 951
A meteoroid stream model for evaluation of the stream hazard to interplanetary flight. R. D. Dycus and A. J. Richardson (JSR, EN) 1070
Aerodynamic frequency response measurements of a wind anemometer. J. D. Laferty and L. V. Schmidt (JSR, EN) 1080
Reobservation of the tenth satellite of Jupiter. Milton L. Charnow (AIAA J, TN) 1151
Model atmospheres of Mercury. Otha H. Vaughan Jr. (JSR, EN) 1171
Average relative velocity of sporadic meteoroids in interplanetary space. Donald J. Kessler (AIAA J, TN) 2337

Navigation, Control, and Guidance Theory

Survey of dynamic analysis methods for flight control design. Alfred C. Robinson (JA, SA) 81
Iterative guidance applied to generalized missions. Helmut J. Horn, Doris C. Chandler, and Volis L. Buckelew (JSR) 4
Effects of energy dissipation on the attitude stability of dual-spin satellites. D. L. Mingori (AIAA J) 20
Performance characteristics of a "Damped" mass expulsion attitude control system. William C. Englehart (JSR) 148
Explicit upper bounds for error propagation in the n-body field. Albert Rosen (AIAA J) 211
A description of the CMG and its application to space vehicle control. B. J. O'Connor and L. A. Morine (JSR) 225
Orbit determination from the satellite. Alvise Braga-Illa (JSR) 232
Asynchronous finite-state machines—A novel control system class. Charles R. Walli and Irving S. Reed (AIAA J) 385
Canonical transformation applications to optimal trajectory analysis. William F. Powers and Byron D. Tapley (AIAA J) 394
An algorithm for the optimization of trajectories with associated parameters. C. P. Van Dine (AiAA J) 400
Automatic satellite station-keeping. Alvise Braga-Illa (JSR) 430
Spring-restrained, momentum-wheel orientation and stabilization system for exoatmospheric vehicles. F. T. Murray, M. R. Weinberger, and E. C. Graves (JSR) 436
Region of Kalman filter convergence for several autonomous navigation modes. N. F. Toda, F. H. Schlee, and P. Obsharsky (AIAA J) 622
Limit cycle oscillations in pulse-modulated systems. Robert N. Clark and Gene F. Franklin (JSR) 799
Satellite attitude determination from celestial sightings. Pranas A. Grusas (JSR) 1007
Optimal low-thrust rendezvous control. Edward A. Euler (AIAA J) 1140
Adaptive control for Mars entry based on sensitivity analysis. C. N. Shen and P. J. Cefola (AIAA J) 1145
An algebraic solution of the state estimation problem. I. A. Gura (AIAA J) 1242
Sensitivity analysis of discrete filtering and smoothing algorithms. R. E. Griffin and A. P. Sage (AIAA J) 1890
A derivation of the optimum continuous linear estimator for systems with correlated measurement noise. J. J. Deyst (AIAA J) 2116
Analytic guidance and control of low-thrust rendezvous. C. N. Shen and W. S. Gelon (AIAA J) 2312
Optimum estimation and coordinate conversion for radio navigation. W. D. Bard and T. E. Perfitt (AIAA J) 2318
Euler's rotational equations for bodies with the inertia tensor varying due to mass redistribution and mass loss. Wecheslav K. Hrushow (AIAA J, TN) 337
Lagrange multipliers and the state transition matrix for coasting arcs. David R. Glandorf (AIAA J, TN) 363
A note concerning a class of nonclassical forced-motion problems. E. J. Brunelle (AIAA J, TN) 374
A technique for the analysis of Monte Carlo results. F. J. Mullin and B. H. Whalen (JSR, EN) 757
Two formulations for optimization problems with state-variable inequality constraints. G. J. Lastman (AIAA J, TN) 1378
Dispersion analysis by the simultaneous application of tolerances. Abram Lazarus (AIAA J, TN) 2022
Optimal linear regulators with exponentially time-weighted quadratic performance indices. F. T. Man (AIAA J, TN) 2167
Comments on "Class of nonlinear third-order systems reducible to equivalent linear systems." Iwao Sugai (AIAA J, TC) 190

Research Facilities and Instrumentation

A shock-tunnel driver for use with hydrogen at elevated temperatures and pressures. C. E. Smith, D. G. Hajjar, and W. G. Reinecke (JSR) 190

Development of a laser-Doppler particle sensor for the measurement of velocities in rocket exhausts. Howard L. Morse, Barclay J. Tullis, Howard S. Seifert, and Wayne Babcock (JSR) 264
A one-component, magnetic support-and-balance system. Kenneth R. Sivier (JA) 398
Performance characteristics of a multiple-arcjet wind tunnel. Charles Cason and T. A. Barr Jr. (JSR) 878
Radio-frequency plasma simulation of gas-core reactor. Merle L. Thorpe (JSR) 923
Flotation technique for laboratory calibration of low-level accelerometers. Barry K. Likeness and Robert H. Cannon Jr. (JSR) 991
A technique for controlling the position of a burning solid-propellant sample in a combustion bomb. R. L. Derr and J. R. Osborn (JSR) 1120
Colloid microthruster test stand. Sidney Zafran and Robert F. Kemp (JSR) 1144
Energy transfer mechanism in shock-tube arc-heated drivers. G. J. Mullaney and H. G. Ahlstrom (AIAA J) 1353
Experimental study of high-enthalpy shock-tunnel flow. Part I: Shock-tube flow and nozzle starting time. Michael G. Dunn (AIAA J) 1553
——Experimental study of high-enthalpy shock-tunnel flow. Part II: Nozzle-flow characteristics. Michael G. Dunn (AIAA J) 1717
Mercury cadmium telluride as a 1–20 μm wavelength infrared detector for space applications. Richard D. Packard (AIAA J) 1570
Use of heavy gases in explosive-driven shock tubes. A. F. Emery and W. T. Ashurst (AIAA J) 1731
Effect of turbulent fluctuations in an optically active fluid medium. George W. Sutton (AIAA J) 1737
Performance of a 500-kjoule MHD wind tunnel. W. R. Grabowsky, D. A. Durran, and H. Mirels (AIAA J) 1846
Measurement of electron temperature and number density in shock-tunnel flows. Part II: $NO^+ + e^-$ dissociative recombination rate in air. Michael G. Dunn and John A. Lordi (AIAA J) 2099
Heat-transfer telemetry for models using thermocouple sensors. Dean R. Harrison and William K. Lockman (JSR, EN) 76
Dynamic behavior of thrust-balance systems. L. H. Luehr and L. L. Bickford (JSR, EN) 92
The hypersonic slipper bearing—A test track problem. R. H. Korkegi and R. A. Briggs (JSR, EN) 210
In situ vacuum testing—A must for certain elastomeric materials. John P. Mugler Jr., Lawrence R. Greenwood, William S. Lassiter, and Robert A. Comparin (JSR, EN) 219
Lightweight, high-thermal-capacity force models for use in arc tunnels. James G. Fowke and James N. Mueller (JSR, EN) 326
Modified expansion tube. J. H. Spurk, E. J. Gion, and W. B. Sturek (AIAA J, TN) 345
Impurity concentration in the expansion tube. J. H. Spurk and E. J. Gion (AIAA J, TN) 346
Thermocouple total-temperature, probe-radiation errors. F. K. Hube and F. Shahrokhi (AIAA J, TN) 749
Multiple-function probe for airflow research. George E. Glawe, Lloyd N. Krause, and Thomas J. Dudzinski (AIAA J, TN) 776
Determination of the position of a shock wave from pitot tube experiments. W. J. Bannink and C. Nebbeling (AIAA J, TN) 796
Experiments on the use of dry ice ablating wind-tunnel models. David L. Kohlman and Richard W. Richardson (JSR, EN) 1061
Vibrational temperature measurements using the electron beam. J. W. L. Lewis and W. D. Williams (AIAA J, TN) 1202
A novel use of a telescope to photograph metal diaphragm openings. Dah Yu Cheng, Robert E. Dannenberg, and Walter E. Stephens (AIAA J, TN) 1209
Rocket combustion stability monitoring by temporal radiometry. W. F. Herget, R. L. Proffit, and J. E. Witherspoon (JSR, EN) 1336
Interpretation of pressure measurements behind the reflected shock in a rectangular shock tube. R. J. Sanderson (AIAA J, TN) 1370
Production of free sodium atoms for the spectrum-line reversal technique. Michael J. Lewis, Michael J. Teague, David J. Malcolme-Lawes, and Leonard Bernstein (AIAA J, TN) 1798
Computation of axisymmetric contractions. Hartmut H. Bossel (AIAA J, TN) 2017
Plasma velocity determination by electrostatic probes. Billy H. Johnson and David L. Murphree (AIAA J, TN) 2028
Analysis of turbulence by Schlieren photography. Leslie L. Thompson and Leonard S. Taylor (AIAA J, TN) 2030
Wind-tunnel diagnostics by holographic interferometry. J. K. Beamish, D. M. Gibson, R. H. Sumner, S. M. Zivi, and G. H. Humberstone (AIAA J, TN) 2041
Generalized gram-charlier method for curve-fitting statistical data. Fred R. Payne (AIAA J, TN) 2045
Uncertainties of calculated characteristics of a transpiration-cooled arc. Ekkehard Marschall (AIAA J, TN) 2142
Supersonic wake flow visualization. Thomas J. Mueller, Charles R. Hall Jr. and Wayne P. Sule (AIAA J, TN) 2151
Response characteristics of thin foil heat flux sensors. Robert L. Ash (AIAA J, TN) 2332

Aerospace Technology Utilization

Domestic communications serivices via satellites: Comsat pilot program. Robert D. Briskman (JSR) 835
An evaluation of television broadcast satellite systems. R. W. Hesselbacher (JSR) 1124
Predicted air entrainment by subsonic, free round jets. E. B. Cook and J. M. Singer (JSR, EN) 1066
Capacity of small-car transit systems. J. Edward Anderson (AIAA J, TN) 1821

Computer Technology and Computer Simulation Techniques

A manned air-to-air combat simulator. F. W. Prilliman, W. W. Huff Jr., and J. T. Hooks Jr. (JA) 353
F-111D computer complex. D. H. Daggett and R. Q. Lee (JA) 432
Computer analysis of large structural systems. Robert Melosh, Theodore Lang, Robert Bamford, and Larry Schmele (JSR) 448
Titan III propulsion system performance evaluation. Leonard A. Beck (JSR) 583
Inline hybrid computer for simulation of passively stabilized satellites. Rafael Gluck and Albert Wong (JSR) 812
Satellite attitude control using a torqued, 2-axis-gimbaled boom as the actuator. James A. Gatlin, A. G. Buckingham, and W. H. Pleasants (JSR) 1013
A liquid rocket performance model based on vaporization interactions. D. L. Kors, L. B. Bassham, and R. E. Walker (JSR) 1133
Optimal estimation of rotation-coupled flexural oscillations. James L. Farrell, James K. Newton, James A. Miller, and Eliezer N. Solomon (JSR) 1290
Onboard computer requirements for navigation of a spinning and maneuvering vehicle. W. E. Vander Velde, G. K. Bentley, J. H. Fagan, and W. T. McDonald (JSR) 1371
Matrix eigenvalues by numerical integration. D. J. Shippy (AIAA J, TN) 531
More on gradient iterative methods in finite-element analysis. Isaac Fried (AIAA J, TN) 565
A real-time hybrid solution of human body dynamics used to simulate zero-g activity. Larry M. Hunt (JSR, EN) 752

Checkout Systems

Aerospace Management

Law, History, Policy, and Sociology

Reliability, Quality Control, and Maintainability

An engineering approach to hazard rate distribution functions. Jack W. Nicholas and Diana J. Gaskell (JA) 349
Reliability and maintainability analysis of a two-year manned spacecraft mission. Hugh A. Jennings (JSR, EN) 327
Canadian helicopter inboard magnetic anomaly detection evaluation. A. K. Honig (JA, EN) 168

Safety

Injury potential of ejection seat cushions. Peter R. Payne (JA) 273
A new criterion for mission selection—Abort capability. R. R. Titus (JSR) 403
A three-man space escape system. J. Quillinan, H. Bloom, B. Gerberg, J. Axelson, E. Dziedziula, and A. Carter (JSR) 1229
Inerting and extinguishment of aerozine-50 with water and/or CF_3Br. D. S. Burgess, G. H. Martindill, J. N. Murphy, F. J. Perzak, J. M. Singer, and R. W. Van Dolah (JSR) 1259
A hazards model for exploding solid-propellant rockets. J. C. McMunn, Jon D. Collins, and Billings Brown (JSR) 1423
Re-entry safety of isotopic systems. Stewart F. Kahn and Clark V. Dohner (JSR, EN) 939
Comment on "Re-entry of radioactive power sources." C. A. Willis (JSR, TC) 864
——Reply by authors to C. A. Willis. M. J. Brunner, C. V. Dohner, and R. L. Lawit (JSR, TC) 864

Information for Contributors to Journals of the AIAA

Manuscripts: Send all manuscripts, with covering letter, to the Managing Editor, AIAA Scientific Publications, 1290 Avenue of the Americas, New York, N. Y. 10019. Each manuscript must be accompanied by written assurance as to security clearance in the event the subject matter lies in a classified area or if the paper originates under government sponsorship. Full responsibility rests with the author. Signed assurance must be given that the manuscript or its equivalent *has not been submitted for publication elsewhere.* The AIAA has prior publication rights to any paper presented at its meetings. Preprints of AIAA meeting papers will be considered for publication only if the author requests it. All manuscripts and preprints must meet the requirements given below in order to be considered for publication.

Send 3 complete copies of each manuscript and 3 sets of figures. The manuscript must be typed *double spaced* on one side of the page only, with wide margins to allow for instructions to the printer. Footnotes, references, and figure captions also should be typed double spaced. Use standard-size ($8\frac{1}{2} \times 11$ in.) good-quality bond paper. Manuscripts must be submitted in English. Every manuscript must include at least a brief assessment of prior work by others and an explanation of how the paper fits into the field.

Manuscripts must be as **brief and concise** as the proper presentation of the ideas will allow. In terms of standard-size *double-spaced* typed pages, a typical maximum length is 22 pages of text (including equations), 1 page of references, 1 page of abstract, and 12 illustrations. Fewer illustrations permit more text, and vice versa. Greater length usually will be unacceptable and may be the basis for return of the paper to the author for reduction prior to review.

Short manuscripts, not more than one-quarter of the maximum length stated for full articles, may qualify for publication as Technical Notes or Technical Comments. They may be devoted to new developments requiring prompt disclosure or to comments on previously published papers. They must, in the judgment of the Editors, contribute interesting or significant information. Such manuscripts are published a few months after date of receipt.

Titles and Author's Names: The title should be brief. Lengthy titles will be shortened by the Editor. The author's name should be typed on the line below the title, and it is preferable to use the full name. The company affiliation should follow on the next line, with the author's official title given in a footnote.

Abstract: Each full-length paper must be accompanied by a 100- to 200-word abstract, written as a single paragraph, below the company affiliation. It should be a summary (not an introduction!) and complete in itself (no numerical references). The abstract should indicate the subjects dealt with in the paper and should state the objectives of the investigation. Newly observed facts and conclusions of the experiment or argument discussed in the paper must be stated in summary form. An inadequate abstract will be sufficient cause for delay in publication. For detailed instructions on the preparation of abstracts, see the Style Manual of the American Institute of Physics, page 5.[1]

Mathematics: Equations and symbols may be handwritten or typewritten; clarity for the printer is essential. Greek letters and unusual symbols should be identified in the margin. If handwritten, distinguish between capital and lower case letters; between the letter o and zero; ell, the number one, and prime; k and kappa; u and mu; v and nu; n and eta; indicate subscripts and superscripts.

Always use the solidus for fractions in the text and for simple fractions in displayed equations. Avoid the radical sign for indicating square root; use parentheses and fractional superscripts instead. Complicated special symbols should be avoided, such as letters with both a dot and a bar over them. Use angular brackets $\langle\ \rangle$ rather than a bar over a group of symbols to denote average.

References: References are to be grouped at the end of the manuscript and are to be given as follows:

1) Journals: Walker, R. E., Stone, A. R., and Shandor, M., "Secondary Gas Injection in a Conical Rocket Nozzle," *AIAA Journal*, Vol. 1, No. 2, Feb. 1963, pp. 334–338.

2) Books: Turner, M. J., Martin, H. C., and Leible, R. C., "Further Development and Applications of Stiffness Method," *Matrix Methods of Structural Analysis*, 1st ed., Vol. 1, Macmillan, New York, 1964, pp. 203–266.

Segrè, E., ed., *Experimental Nuclear Physics*, 1st ed., Vol. 1, Wiley, New York, 1953, pp. 6–10.

3) Reports: Book, E. and Bratman, H., "Using Compilers to Build Compilers," SP-176, Aug. 1960, Systems Development Corp., Santa Monica, Calif.

4) Transactions/Proceedings: Soo, S. L., "Boundary Layer Motion of a Gas-Solid Suspension," *Proceedings of the Symposium on Interaction between Fluids and Particles*, Institute of Chemical Engineers, Vol. 1, 1962, pp. 50–63.

Always give inclusive page numbers for references to journal articles and a page or chapter number for books. Each reference must be cited in the text.

Illustrations: Line drawings must be clear and sharp to make clear engravings. Use black ink on white paper or tracing cloth. Lettering should be large enough to be legible (at least $\frac{1}{16}$ in. high) after reduction. Plan figures for reduction to column width ($3\frac{1}{4}$ in.). Photographs should be glossy prints, not matte or semimatte. Each figure must have a caption; captions should be listed on a separate sheet. Write your name and the figure number in the margin of each figure. Cite each figure in numerical order in the text.

Tables: Tables should be planned to fit the page width of the Journal (7 in.). Avoid tables that must be placed sideways. Use a double rule at the top and bottom and a single rule under the column headings. Avoid vertical rules, which are expensive to set. Table footnotes should be placed under the final double rule and should be indicated by letters, a, b, c, etc. Do not number table footnotes consecutively with text references. Each table must have a caption. Cite each table in numerical order in the text.

Symbols and Units: Use standard symbols whenever possible, preferably those recommended by the American Standards Association. For a list of special symbols available to most printers, see the AIP Style Manual.[1] The metric or dual system of units (metric and English) should be used, wherever possible, in accordance with an endorsement by the AIAA Board of Directors. Although such use is not mandatory, authors are urged to comply.

Alterations: Take great care that the manuscript is typographically accurate. A few corrections in proof are permissible, but authors will be charged for the cost of making extensive alterations. Likewise, they will be charged for the cost of remaking an engraving because of an incorrect original drawing.

Check List:

1) Letter of submittal with written assurance that article or its equivalent has not been submitted elsewhere and is not classified
2) 3 copies, typed original manuscript, 3 sets of figures
3) Abstract
4) Original line drawings of figures, glossy prints of photographs, preferably not larger than $8\frac{1}{2} \times 11$ in.
5) List of figure captions typed on separate page
6) References typed in style shown above
7) All references, figures, and tables numbered consecutively and cited in numerical order in the text
8) Greek letters and unusual symbols identified

SAVE ON JOURNAL COSTS

These four journals of the AIAA are available to members at exceptionally low costs.

***AIAA JOURNAL*—Regularly $33 per year, member price just $8**

Each month the AIAA Journal carries authoritative and lasting contributions on fundamental research in your specialty—new ideas, complete treatments, recent data, and fundamental reviews emphasizing basic research and exploratory developments in all aerospace fields.

***JOURNAL OF SPACECRAFT AND ROCKETS*—Regularly $30 per year, for members just $7**

The Journal of Spacecraft and Rockets carries authoritative articles on space technology—basic engineering systems studies and advances. *Monthly* issues contain timely engineering notes in propulsion, power systems, life systems, guidance, material, and all other disciplines in the space flight field—plus an average of 17 articles.

***JOURNAL OF AIRCRAFT*—Nonmembers pay $18 yearly, your cost only $5**

The Journal of Aircraft provides informative professional articles on current aeronautical engineering topics and special reviews on the technological, operational, and design problems of military and commercial aircraft and ground effect vehicles. This basic journal publishes up to a dozen full-length articles *bimonthly* plus engineering notes of current interest to aeronautical engineers.

***JOURNAL OF HYDRONAUTICS*—$12 a year for nonmembers, $4 for you**

This quarterly carries significant articles that contribute to the advancement of science and engineering concerning all types of marine craft, installations, and instrumentation. Launched in July, 1967, the *Journal of Hydronautics* deals with the hydromechanics of propulsion, the stability and control of surface vessels and submersibles, and methods for providing mobility and habitation in water. A *quarterly*.

PROGRESS IN ASTRONAUTICS AND AERONAUTICS

Series Editor: MARTIN SUMMERFIELD

VOLUME 22

STRATOSPHERIC CIRCULATION

edited by WILLIS L. WEBB

U. S. Army Electronics Command, White Sands Missile Range, New Mexico

This volume brings together a group of important papers on stratospheric circulation that have arisen from recent research, most of them from the programs of two seminars on this subject held in London in 1967 and in Tokyo in 1968. These seminars were sponsored by the Committee on Space Research (COSPAR) of the International Council of Scientific Unions (ICSU). Efficient use of the data produced by the global synoptic rocket network requires a general background knowledge of the new rocket systems, measurement techniques, observational programs, and data applications which have evolved during the first decade of the Meteorological Rocket Network. This volume provides a source of such material for the uninitiated as well as a comprehensive reference volume for the experienced rocket scientist.

SECTIONS: METEOROLOGICAL ROCKET SYSTEMS, STRATOSPHERIC METEOROLOGICAL SENSORS, UPPER ATMOSPHERIC CLOUDS, PHOTOCHEMISTRY, DYNAMICS OF THE STRATOSPHERIC CIRCULATION, A CLIMATOLOGY OF THE UPPER ATMOSPHERE, and NEW MEASURING SYSTEMS.

1969, 600 pp., $15.00

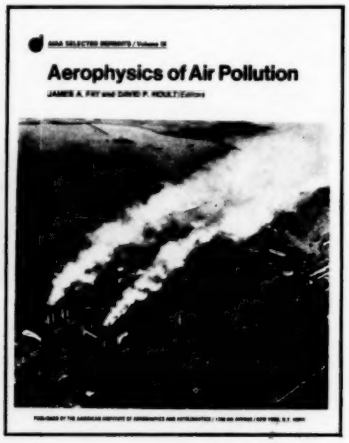
Aerophysics of Air Pollution

Edited by J. A. Fay and D. P. Hoult

MASSACHUSETTS INSTITUTE OF TECHNOLOGY



Do you want to learn how a knowledge of fluid dynamics can help solve pollution problems? The increasing consumption of energy, with a growing population, portend that future air pollution problems will be of increasing importance. A solution will require a more complete understanding of the basic physical processes which control the air environment.

The problem of the distribution of a pollutant, released at a given point in the atmosphere, is difficult because of turbulent processes. However, semi-empirical methods have proven helpful. Important papers treating the problem of diffusion of pollutants in the atmosphere are in this volume.

A paper by Friedlander treats the size distribution of aerosol particles in the atmosphere, and a paper by Haagen-Smit delineates the photochemistry of smog.

Finally, the meteorological properties of the atmospheric boundary layer are described and show the important role it plays in how pollutants are dispersed.

This volume of selected reprints contains the key papers in the aerophysics of air pollution together with an extensive bibliography of the field. No one working in the field of air pollution can afford to be without this timely volume.

Selected Reprint Series
Editor-in-Chief
Robert A. Gross, Columbia University

Volume I
ATMOSPHERIC ENTRY
Editor: A. J. Eggers, Jr., NASA

Volume II
MAGNETO FLUID DYNAMICS
Editor: W. R. Sears, Cornell University

Volume III
